EXECUTIVE SUMMARY

China's accession to the World Trade Organization in December 2001 was an historic event and a great experiment. Given China's size, the growing importance of its economic expansion to world trade, and its history of state involvement in resource allocation and economic decisions affecting the market, China's accession presented the dual challenges of incorporating China into the WTO's rules-based system and of China conforming its trade regime to meet its commitments and obligations under the Protocol of Accession and the WTO agreements.

It is now almost six years since China joined the WTO, and the five-year transition period envisioned to allow China to make its trade laws and practices consistent with WTO rules has passed. China worked hard over the transition period to reform its legal and regulatory system and has in fact complied with many of its WTO obligations. Tariff reduction commitments was one of the more important obligations assumed by China in joining the WTO and China has generally implemented its tariff reductions in a timely manner. So also, China has revised many of its laws and regulations and modified its trade practices to make them consistent with obligations under the WTO agreements.

Notwithstanding the accomplishment of WTO compliance in many areas, however, the United States and other WTO Members, through the Transitional Review Mechanism and other fora, have voiced serious concerns that China has not yet fully complied with all its WTO commitments, most notably in such areas as intellectual property rights, industrial policies (*e.g.*, standards; export restrictions on coke and other products), the elimination of prohibited subsidies, the discriminatory application of value-added taxes, continued restrictions on trading and distribution rights, agriculture, services (*e.g.*, capitalization and other requirements in the

EXECUTIVE SUMMARY

banking, insurance, construction/engineering, express courier and other sectors that are trade restrictive and exceed international norms), and transparency.

In the initial years of China's WTO membership, other Members refrained from invoking the WTO's dispute settlement process to resolve trade problems with China. After six years, however, there now have been eight dispute settlement cases initiated at the WTO against China, one each by the European Communities, Canada, and Mexico, and five by the United States. The eight disputes are Value-Added Tax on Integrated Circuits (US); Measures Affecting Imports of Automobile Parts (US, EC, Canada); Certain Measures Granting Refunds, Reductions or Exemptions from Taxes and Other Payments (US, Mexico); Measures Affecting the Protection and Enforcement of Intellectual Property Rights (US); and Measures Affecting Trading Rights and Distribution Services for Certain Publications and Audiovisual Entertainment Products (US).

In addition to the five disputes concerning China that the United States has brought to the WTO so far, there are a host of other areas where longstanding non-compliance by China warrants consideration as potential subjects for the WTO consultations and dispute settlement process, including such subjects as intellectual property rights enforcement, investment obligations under the TRIMs Agreement, and services.

While the WTO offers a forum for resolving trade disputes with China, there are also a number of trade remedy measures under U.S. law that are available to address trade problems with China. These measures include a China-specific product-specific safeguard and a China-specific textile safeguard. The China-specific product-specific safeguard, also known as Section 421, is intended to address import surges from China during its WTO transition period, but it has

EXECUTIVE SUMMARY

proven to be practically ineffective. To date, only six petitions have been filed and, although the U.S. International Trade Commission made affirmative decisions in four cases, the President chose not to provide relief in any case. Legislative efforts to modify the Section 421 measure to make it more effective and less dependent on presidential discretion are pending. With respect to textile safeguards, after an initial series of petitions and safeguards imposed against Chinese textile imports, the United States and China agreed to a Memorandum of Understanding in November 2005 that limits the import amounts of certain Chinese textile products through 2008.

China's managed floating exchange rate policy has been the focus of much concern. It has been estimated that China's currency is undervalued by as much as 40 percent, and that this currency misalignment effectively acts as a tax on U.S. exports and a subsidy to China's exports. There are a variety of pending legislative proposals to address China's currency misalignment, such as treating currency misalignment as a financial contribution that qualifies as a countervailable subsidy under U.S. countervailing duty law.

Until recently, the United States did not apply countervailing duty law to non-market economy countries such as China. In 2006, however, a countervailing duty petition was filed concerning coated free sheet paper from China. In the course of that proceeding, the Department of Commerce reconsidered its practice of non-application of countervailing duty law and, in 2007, concluded that the factual bases underlying its prior policy had changed and that it could apply countervailing duty law to China. Consequently, Commerce then made a preliminary determination that China had provided countervailable subsidies upon a Chinese producer. Since that decision, four additional countervailing duty investigations involving Chinese imports have been initiated by Commerce.

EXECUTIVE SUMMARY

Antidumping duty law is a trade remedy that is applicable to China. Under U.S. law, Commerce has determined that China is a non-market economy country. Pursuant to NME status, Commerce applies a special factors-of-production methodology to determine normal value for purposes of calculating an antidumping margin. In recent years, Commerce has made modifications to aspects of its NME methodology such as application procedures for NME respondents who seek separate rates, the valuation of market economy inputs, and labor valuation (wages). Commerce is actively considering further changes, such as in the manner that it selects surrogate countries for NME countries.

In a recent antidumping duty investigation concerning lined paper from China, China sought to change its status under to U.S. antidumping law to that of a market economy. In 2006, after review of the relevant factors, however, Commerce determined to maintain China's status as an NME. Under China's Protocol of Accession, the United States is entitled to treat China as an NME and apply NME methodology for antidumping purposes for fifteen years after China's accession.

INTRODUCTION

This paper reviews aspects of the progress of China's compliance with and implementation of its WTO commitments and obligations during 2005-2006 and into 2007. The paper is the fourth review of China's WTO compliance prepared by the Law Offices of Stewart and Stewart. As such, it updates compliance information from the last report which covered the year 2004. China acceded to the WTO in December 2001. Thus, the period covered by this paper is primarily the fourth and fifth years of China's transition period into the WTO.

The paper first focuses on the WTO compliance concerns of the United States government and U.S. industry groups as expressed in the annual compliance reports of the U.S. Trade Representative and reports issued by a number of private sector U.S. industry groups with practical experience of the successes or deficiencies of China WTO compliance efforts. The paper also reviews the compliance concerns of other WTO Members as expressed in the Transitional Review Mechanism process, with a brief review of compliance issues noted in the 2006 Trade Policy Review of China.

The second section of the paper looks at the dispute settlement cases that have been brought against China at the WTO to date. Next, section three reviews areas of long-standing non-compliance which the U.S. Trade Representative could consider as subjects for potential consultations and dispute settlement at the WTO. Finally, section four of the paper reviews the effectiveness of various trade remedy measures that the United States has employed or could employ against imports from China. These include special China-specific safeguard measures (both product-specific and textile), measures that could be used to address currency

misalignment, the countervailing duty law remedy and its application to China and other non-market economy countries, and the antidumping duty law remedy. This section also looks at proposed legislation to make these remedies more effective, as well as recent administrative modifications to aspects of the non-market economy country methodology applied by the International Trade Administration in antidumping proceedings.

I. REVIEW OF CHINA'S WTO COMPLIANCE: 2005--2007

In many respects, China made great strides in 2005, 2006, and 2007 in meeting its WTO obligations and commitments. However, China failed to make adequate progress in a number of areas. The following sections review WTO compliance issues identified in the reports issued by the U.S. Trade Representative and selected private sector groups, as well as issues raised by other trading partners at the WTO.

A. MAJOR COMPLIANCE CONCERNS

In 2005-2007, the primary China WTO compliance concerns noted by the U.S. and private sector interested parties may be summarized as follows:

- Intellectual property rights (IPR)
 - China's enforcement of its IPR laws remained grossly inadequate, with some industry observers indicating that IPR infringement may have worsened in 2005 and 2006. China demonstrated an unwillingness to reform its criminal code to provide for enhanced protection of IPR.
- Industrial policies
 - China maintained industrial policies that erect market access barriers to foreign industry while adopting policies that provide considerable assistance to domestic industry. Some examples of these policies included:
 - Regulations on auto part tariffs that extended proscribed local content requirements;

- Pursuit of unique national standards in numerous high technology industries that could result in unwilling technology transfer from foreign right holders;
 - Provisions in a 2005 policy that called for near total state management of China's steel industry;
 - Maintenance of longstanding export restrictions on raw materials such as coke;
 - Continuing regulatory intervention in commercial negotiations over royalty payments to IP rights holders in the area of 3G standards; and
 - Unwarranted subsidization of an extensive array of Chinese domestic industries.
- Trading and distribution rights
 - China continued to restrict market access on several kinds of products, including foreign publications such as books, periodicals and audio and video products, in seeming violation of its trading and distribution rights commitments. The restrictions on the importation and distribution of these copyrighted materials provided incentives for IP infringement.
 - China also had not fully implemented its direct selling (sales away from a fixed location) commitments, maintaining superfluous restrictions on the business operations of foreign direct sellers.
- Agriculture
 - China had become the U.S.'s fourth largest agricultural market, with U.S. agricultural exports to China totaling \$5.2 billion in 2005, and 2006 potentially an even more successful year.
 - Some problems persisted from previous years, including:
 - Selective intervention in the market by China's regulatory authorities which caused delays and stoppages of shipments;
 - SPS standards with dubious scientific rationales; and
 - Lack of transparency and predictability in its regulatory regime.
- Services
 - The U.S. saw a considerable surplus in trade in services with China in 2005 and 2006.
 - However, despite having made several encouraging promises, China had not fully implemented its commitments to enhance market access and lift restrictions affecting a variety of services sectors, including:
 - Financial services (banking; insurance)
 - Chinese regulatory authorities distributed troubling draft proposals in connection with China's implementation of its financial services commitments, scheduled to be phased in by December 11, 2006.

- Telecom services
 - Construction and engineering services
 - Express delivery services
 - Financial information services
 - In September 2006, China's state news agency, Xinhua, promulgated rules that seemingly violated China's WTO obligations by imposing new restrictions on foreign providers of financial information.
- Transparency
 - China has made significant progress in improving transparency in many ways, at both the national and provincial levels, including the establishment of a single official journal in March 2006. However, some concerns remained, including:
 - China's failure to ensure that all relevant government bodies are participating in the national journal; and
 - The continued lack of a mandatory notice-and-comment practice; this system remained optional.

B. USTR'S 2005 AND 2006 REPORTS ON CHINA'S WTO COMPLIANCE

On December 11, 2005 the Office of the U.S. Trade Representative (USTR) issued its fourth annual review of China's compliance with its WTO accession commitments and obligations.¹ On December 11, 2006, USTR issued its fifth annual review.² The USTR conducted its monitoring of China's compliance efforts and published its reports, *2005 Report to Congress on China's WTO Compliance* and *2006 Report to Congress on China's WTO Compliance*, pursuant to Congress' statutory directive and mandate. See U.S.-China Relations Act of 200, P.L. 106-286, section 421; 22 U.S.C. § 6951. The USTR's China Compliance Reports examine nine broad categories of China's WTO commitments, noting both progress

¹ See USTR, *2005 Report to Congress on China's WTO Compliance* (December 11, 2005), available at http://www.ustr.gov/assets/Document_Library/Reports_Publications/2005/asset_upload_file293_8580.pdf.

² See USTR, *2006 Report to Congress on China's WTO Compliance* (December 11, 2006), available at http://www.ustr.gov/assets/Document_Library/Reports_Publications/2006/asset_upload_file688_10223.pdf.

achieved since China's accession and continuing shortcomings regarding China's performance of its commitments. USTR's reports do not provide an exhaustive examination of the many non-controversial areas where China has satisfactorily complied with WTO commitments. Rather, the reports' main focus is on the trade concerns deemed most pressing by U.S. business interests, or stakeholders.

USTR's reports note that while considerable progress was made in market liberalization during the few years before and after China's WTO accession, such progress has slowed, stymied in large part by China's evident unwillingness to fully embrace the key WTO principles of market access, non-discrimination and national treatment. The reports highlights problems with China's enforcement of intellectual property rights (IPR), China's failure to fully incorporate market mechanisms and to make its trade regime predictable and transparent, and its use of industrial policy tools to promote or protect favored sectors and industries in contradiction of its WTO obligations.

As identified in USTR's 2005 and 2006 reports, the following tables summarize USTR's findings with respect to China's compliance with WTO obligations in the 2005-2006 period. USTR's reports identified both China's compliance deficiencies (bold text in the summary tables), as well as China's compliance successes.

1. Trading Rights and Distribution Services³
<p><i>Trading Rights</i></p> <ul style="list-style-type: none">• "Trading rights" involves two elements: the right to import goods (into China) and the right to export goods (from China). "Trading rights" are critical to the ability of U.S. businesses to

³ See USTR, *2005 Report to Congress on China's WTO Compliance*, at 11-21 (December 11, 2005); USTR, *2006 Report to Congress on China's WTO Compliance*, at 13-25 (December 11, 2006).

1. Trading Rights and Distribution Services³

operate and expand in China and to be able to receive the value of other commitments made by China.

- In 2005 and 2006, U.S. companies reported few problems with the new trading rights registration process instituted in 2004.
- **USTR notes the following deficiencies:**
 - **In 2005, China had not yet implemented its trading rights commitments relating to the importation of pharmaceuticals, though China's accession agreement creates no exception for pharmaceuticals. Foreign pharmaceutical companies are still required to hire Chinese importers to bring their finished products into the country.⁴**
 - **China has not yet implemented its trading rights commitments regarding the importation of books, newspapers, periodicals, electronic publications and audio and video products, though the U.S. has expressed its concerns both in high-level bilateral talks and before the WTO.**

Distribution Services

- With limited exceptions, China committed to end national treatment and market access restrictions on foreign enterprises providing distribution services through a local presence within three years of China's accession.⁵
- While 2005 saw implementation delays and uncertainty regarding eligibility for distribution services, MOFCOM resolved most of those issues by allowing provincial authorities to grant distribution licenses.
- **USTR notes the following deficiencies:**
 - **Some technical difficulties remained in distribution, and MOFCOM still restricted the distribution of certain products, such as foreign publications.**
 - **In the area of direct selling, or sales away from a fixed location, MOFCOM issued final rules in August 2005, after a nine-month delay, and clarifications of these final rules in September 2006. However, progress in this area in 2005 and 2006 was inadequate.⁶**
 - **China still lacks cohesive, organized distribution networks, since no Chinese distribution companies have nationwide networks and no Chinese distribution company holds a market share greater than two percent.**
 - **Certain measures remain that impose compliance requirements with municipal commercial development rules on foreign enterprises, but not on domestic enterprises, in apparent violation of China's national treatment commitments with regard to distribution services.**
 - **MOFCOM has proposed rules with regard to retail distribution that could facilitate cities' rejection of applications for approval of new retail outlets on the basis that they would "disrupt" extant local commerce.**
 - **China issued regulations in December 2006—without providing for prior public comment—to implement its commitments to liberalize its wholesale distribution market**

⁴ USTR's 2006 Report makes no mention of this issue.

⁵ Protocol of Accession of the Peoples Republic of China, WT/L/432, Pt. I art. 5 (23 November 2001).

⁶ *See Measures for the Administration of Direct Selling* (August 2005); *Regulations on the Administration of Anti-Pyramid Sales Schemes* (August 2005); *Administrative Measures on the Establishment of Service Network Points for the Direct Sales Industry* (September 2006).

1. Trading Rights and Distribution Services³

for crude oil and processed oil by December 11, 2006. These regulations seemed to construct high thresholds and other barriers to market entry for foreign enterprises.⁷

Wholesaling Services and Commission Agents' Services

- In April 2004, MOFCOM issued regulations that eliminated market access and national treatment restrictions on wholly foreign-owned enterprises engaging in retail services and eliminated all remaining quantitative and geographical restrictions as of the scheduled phase-in date of December 11, 2004.⁸
- China committed to a gradual phase-in of wholesaling services and commission agents' services by foreign-invested enterprises regarding goods made by other enterprises in China or imported goods, with full services allowed to wholly-foreign invested enterprises by December 11, 2004.
- In 2005 and 2006, China took several steps to resolve the problems stemming from the initial lack of guidance on the application and approval processes for wholesaling and commission agents' services licenses, as well as those stemming from inconsistent imposition of restrictions and registered capital requirement amounts.
 - By July 2005, Chinese authorities had drastically reduced the backlog of distribution license applications.
 - In July and September 2005, MOFCOM and the General Administration of Customs (Customs Administration) elucidated the wholesaling license application procedures for enterprises located in Free Trade Zones, thereby reducing bureaucratic hurdles for existing enterprises wishing to expand their business scope to include wholesale distribution.⁹
 - In February 2006, MOFCOM issued further clarifications on the wholesaling license application and approval processes which all but eliminated most of the problems with those processes, largely by devolving the right to issue licenses from the central authorities to the provincial-level authorities.¹⁰
- In 2005, China began to implement rules governing the distribution of automobiles by foreign enterprises.¹¹
- China's acceptance of applications from foreign pharmaceutical companies for wholesale distribution licenses in the latter half of 2005 was a welcome, albeit delayed development.
- **USTR notes the following deficiencies:**
 - **China continued to restrict the rights of foreign enterprises to take on wholesale (and retail) distribution of books, newspapers, periodicals, electronic publications and audio and video products.**
 - **For some products in these categories, only Chinese state-owned enterprises may engage in distribution.**
 - **For other such products, distribution is either limited to Chinese-foreign joint**

1. Trading Rights and Distribution Services³

ventures with minority foreign ownership or foreign enterprises are subject to restrictive requirements not imposed on domestic enterprises.

- As with trading rights, China continued to rely on the general exception for the protection of the public morals in Article XX of GATT 1994 to support its position that it can rightfully bar foreign enterprises from distributing books, newspapers, periodicals, electronic publications and audio and video products, though it can accomplish its monitoring and censorship goals without these restrictions.
- The implementing rules regarding foreign enterprise distribution of automobiles, while generally welcomed by U.S. business interests, contain some restrictions on foreign enterprises that may not apply to domestic enterprises.¹²
- China continued to restrict the pharmaceuticals sector in ways which preclude foreign pharmaceutical companies from fully benefiting from China's wholesale distribution commitments.
- U.S. industry is concerned about the provision in the April 2004 regulations that permits local approving authorities to refrain from granting wholesale distribution licenses when urban commercial network plans have not yet been devised, as is the case in most cities.¹³
- The regulations China issued in December 2006 to implement its commitments to liberalize its wholesale distribution market for crude oil and processed oil by December 11, 2006 seem to construct high thresholds and other barriers to foreign enterprises attempting to engage in wholesale distribution.

Retailing Services

- In April 2004, MOFCOM issued regulations that eliminated market access and national treatment restrictions on wholly foreign-owned enterprises engaging in retail services and eliminated all remaining quantitative and geographical restrictions as of the scheduled phase-in date of December 11, 2004.¹⁴
- Initially, several of the same problems that afflicted the wholesaling approval and application processes arose in the retailing services sector. In February 2006, MOFCOM issued clarifications on the implementation of the application and approval processes that helped resolve many of those problems.¹⁵
- **USTR notes the following deficiencies:**
 - As with wholesaling, U.S. industry is still concerned about the provision in the April 2004 regulations that permits local approving authorities to refrain from granting retail distribution licenses in cities that have not yet devised urban commercial network plans, which most cities have not done.¹⁶
 - **China may have employed this provision in a discriminatory manner: MOFCOM issued a notice in April 2006 stating that foreign-invested enterprises would not be**

¹² See *Implementing Rules for the Administration of Brand-Specific Automobile Dealers* (February 2005); see also *Rules for Auto External Marks* (November 2005); see also *Implementing Rules for the Evaluation of Eligibility of Auto General Distributors and Brand-specific Dealers* (January 2006).

¹³ See *Measures on the Management of Foreign Investment in the Commercial Sector* (April 2004).

¹⁴ See *Measures on the Management of Foreign Investment in the Commercial Sector* (April 2004).

¹⁵ See *Notice on Entrusting National Economic and Development Zones with the Authority to Approve Foreign-Funded Distribution Firms and International Forwarding Agents* (February 2006).

¹⁶ See *Measures on the Management of Foreign Investment in the Commercial Sector* (April 2004).

1. Trading Rights and Distribution Services³

eligible for approvals in cities with no completed urban commercial network plan, but domestic enterprises have continued to receive approvals for their projects in such cities.

- China did not fully implement its commitment to allow foreign enterprises to sell processed oil at the retail level, claiming that gas stations are chain stores, for which only joint ventures with minority foreign ownership are permitted.
- China continued to rely on the general exception for the protection of the public morals in Article XX of GATT 1994 to support its position that it can rightfully bar foreign enterprises from retailing books, newspapers, periodicals, electronic publications and audio and video products, though it can accomplish its monitoring and censorship goals without these restrictions.

Franchising Services

- MOFCOM's new rules governing the supply of franchising services in China went into effect in February 2005.¹⁷
- USTR notes the following deficiencies:
 - The new rules contain provisions requiring franchisers to own and operate at least two units in China before becoming eligible to offer franchises in China. Such provisions adversely affect many U.S. franchising companies, including large hotel chains, because they depend solely on franchisees to distribute goods and services and do not own and operate units.
 - Moreover, the new rules impose high capital requirements and call for broad and vague information disclosure by franchisers, without adequately explaining liability for failing to meet these disclosure requirements.

Sales Away from a Fixed Location (Direct Selling)

- China issued regulations to implement its direct selling commitments in August 2005 (nine months late), which went into effect in December 2005, and issued clarifications to those regulations in September 2006.¹⁸
- USTR notes the following deficiencies:
 - While the direct selling measures made improvements to various draft provisions, other provisions remain worrisome:
 - Prohibition of direct selling enterprises from paying compensation based on team sales, where upstream personnel are compensated based on downstream sales, a multi-level marketing practice allowed in every other country in which the U.S. operates.
 - Other provisions include a three-year experience requirement applicable only to foreign enterprises, a cap on single-level compensation, restrictions on the cross-border supply of direct selling services, high capital requirements that may limit smaller enterprises' access to the market, and ambiguous service center regulations that could be unduly onerous for small and medium-sized direct sellers.
 - USTR also notes that the opaque license review process has proved to be confusing, and that both foreign and domestic companies have had to wait many months for their applications to be reviewed, despite a regulatory requirement that such reviews are to be completed within ninety days.

¹⁷ See *Measures for the Administration of Commercial Franchises*.

2. Import Regulation¹⁹

Tariffs

- In general, USTR found that China implemented its scheduled tariff reductions for 2005 and 2006 as required. These reductions covered primarily motor vehicles and motor vehicle parts, office machinery, large appliances, furniture and chemicals.²⁰

Customs and Trade Administration

Customs Valuation

- While the U.S. has sought to assist China in its efforts to more uniformly adhere to WTO customs valuation rules by conducting technical assistance programs for Chinese government officials on WTO customs compliance, many of the previously reported problems still plagued China's customs valuation procedures in 2005 and 2006.
- **USTR notes the following deficiencies:**
 - **China did not uniformly implement its customs valuation regulations with the result that U.S. exporters still encountered valuation problems at Chinese ports.²¹ These problems include: (1) valuation based on reference pricing instead of transaction value; (2) automatic addition of royalties and license fees to the dutiable value of imported software, in contravention of explicit provisions of the implementing rules that state that such fees are to be added only where the software is import-related and a condition of sale for the goods in question; (3) valuation of high-value electronic media to be used to produce multiple copies of products (e.g., DVDs) based on the estimated value of the future copies instead of the value of the carrier medium itself; and (4) general inefficiency and inconsistency in customs clearance procedures, including procedural variances from port to port, massive delays at port, and seemingly excessive and rapidly rising fees.**

Rules of Origin

- USTR did not raise concerns about China's implementation of its rules of origin obligations in 2005 and 2006, except to note that China has not been adequately transparent in drafting and issuing its implementing regulations.

Import Licensing

- China committed to adhere to the Agreement on Import Licensing Procedures (Import Licensing Agreement) by not forming barriers to trade through its import licensing systems.

¹⁸ See *Measures for the Administration of Direct Selling* (August 2005); see also *Regulations on the Administration of Anti-Pyramid Sales Scams* (August 2005).

¹⁹ See USTR, *2005 Report to Congress on China's WTO Compliance*, at 22-32 (December 11, 2005); USTR, *2006 Report to Congress on China's WTO Compliance*, at 25-35 (December 11, 2006).

²⁰ Included as Appendix 1 is a comparison of China's accession commitments on tariff reductions and China's implementation of tariff reductions as reflected in China's tariff schedules for 2003, 2004, 2006 and 2007. In accord with USTR's finding, Appendix 1 demonstrates that China has implemented its annual tariff reductions and tariff bindings as set out in its Schedule of Commitments.

²¹ See *Measures for Examining and Determining Customs Valuation of Imported Goods* (January 2002); see also *Rules on the Determination of Customs Value of Royalties and License Fees Related to Imported Goods* (July 2003).

2. Import Regulation¹⁹

- Import licensing issues of significant concern to the U.S. have arisen in a range of specific contexts, including import licensing procedures for iron ore, the administration of tariff-rate quota systems, sanitary and phytosanitary (SPS) measures and inspection related requirements (discussed below in the sections on Tariff-rate Quotas on Industrial Goods, Tariff-rate Quotas on Bulk Agricultural Commodities, Sanitary and Phytosanitary Issues and Inspection-Related Requirements).
- **USTR notes the following concern:**
 - **The Chinese government began imposing new import licensing procedures for iron ore without prior WTO notification in May 2005, after Chinese steel producers had finalized contracts with major foreign iron ore suppliers.²² China purportedly restricted licenses to 48 traders and 70 steel producers—without making public a list of the qualified enterprises or the qualifying criteria used—in possible violation of China's obligations under the Import Licensing Agreement to establish solely import licensing procedures that do not have a restrictive effect on trade. This development is particularly troubling because it could set a dangerous precedent for the handling of imports of other raw materials.**

Non-tariff Measures

- USTR notes that China succeeded in eliminating all of its import quotas as well as all of its other non-tariff measures (NTMs) by January 1, 2005, as agreed. China even abolished NTMs for some categories of products ahead of schedule.
- **USTR notes that China's import quota system was plagued with problems, including:**
 - **Delay by the State Council in issuing necessary regulations**
 - **Delays in the allocation of quotas by MOFTEC and the State Economic and Trade Commission (SETC)**
 - **Lack of transparency which made it difficult to gauge whether the quotas had been issued in accordance with China's agreements**
 - **Considerable disruptions of the wholesale and retail operations for imported autos due to problems with the auto import quota system**

Tariff-rate Quotas on Industrial Products

- China agreed to implement a transparent system of TRQs to provide market access for three industrial products, including fertilizer, a major U.S. export.
- China instituted a temporary reduction of the in-quota tariff rate for fertilizer from four percent to

²² See *MOFCOM Decree No. 26 – Measures on Administration of Automatic Import Licensing for Goods* (December 10, 2004); see also *MOFCOM Decree No. 27 – Measures on Administration of Import Licenses for Goods* (December 10, 2004). These measures subject certain products, such as iron ore, to China's automatic import licensing regime and provide that, "so long as the content and format of the application are correct, the issuing entity should, to the extent practicable, grant the license immediately, or under special circumstances, no more than 10 working days. . . . [and] the license [for such products] can be granted immediately upon request." *China—Responses to Questionnaire on Import Licensing Procedures*, Committee on Import Licensing, G/LIC/N/3/CHN/5 (October 3, 2006) at paras. 5, 7(a)-7(b) (explaining the measures relating to automatic import licensing). See also Committee on Import Licensing, *Minutes of the Meeting Held on 30 October 2006*, G/LIC/M/24 (December 20, 2006) at para. 3.4 (in which China explained, in answer to questions from the U.S. and Australia in connection with the 2006 transitional review, that the import licensing procedures being applied to iron ore fall under the above-mentioned measures).

2. Import Regulation¹⁹

one percent, effective November 2006; at the time of USTR's 2006 Report, it was too early to assess what effect this would have on U.S. fertilizer exports to China.²³

- U.S. fertilizer exporters expected exports into China to increase after December 11, 2006, when China was scheduled to begin permitting foreign enterprises to participate in wholesale and retail distribution of fertilizer within China.
- **USTR notes the following deficiencies:**
 - **As noted in previous years, China has implemented its TRQ system slowly, failed to meet its transparency requirements, and has discouraged TRQ holders from freely using their quotas. This had not improved perceptibly in 2005 and 2006.**
 - **While 2005 saw a modest increase in U.S. fertilizer exports to China, in 2006 U.S. fertilizer exports fell dramatically—from January through September 2006, such exports declined by 32%, totaling \$151 million, in contrast to \$223 million during the same time period in 2005.**

Other Import Regulation

Antidumping

- One of the primary users of antidumping (AD) measures, in 2005 China had a total of 69 AD measures covering 19 countries in place and 38 new AD investigations in progress. In 2006, China maintained a total of 86 final AD measures covering 18 countries, with 25 ongoing AD investigations.
- The U.S. was successful on one occasion of persuading China in early 2006 to withdraw AD duties it had imposed on imports of unbleached Kraft linerboard by notifying China that it would be filing a request for consultations to challenge the duties.
- **USTR observes that despite the few advances noted above, transparency and procedural fairness were still sorely lacking in the area of AD in 2005 and 2006.**
 - **As noted in previous years, China failed to provide adequate detailed information on its AD investigations to interested parties.**
 - **The bureau charged with making injury determinations failed to consistently make available to foreign respondents materials generated and submitted in the course of its injury investigations.**
 - **China's AD authorities failed to provide non-confidential summaries of submissions by Chinese producers; such summaries are necessary for interested parties to fully understand all the potentially significant facts and data at issue.**
 - **China's AD authorities maintained their highly limited disclosure of the facts and calculations on which it bases its AD determinations.**
 - **China's AD authorities did not allow interested parties sufficient opportunity to provide input for their deliberations, particularly with regard to injury determinations. Moreover, these authorities conducted their injury determinations in a perfunctory manner, particularly with regard to the causal link between injury and dumping.**
 - **In every injury determination involving the U.S., the bureau charged with making the determinations has found that U.S. exports have caused injury to China's domestic industry, despite compelling arguments raised to the contrary.**

²³ The total value of U.S. exports of fertilizer to China for the first quarter of 2006 was \$54,916 (USD thousands); for the same period in 2007, the total value of U.S. exports of fertilizer to China was \$63,219 (USD thousands). See TradeStats Express™ - National Trade Data: HS 31 – FERTILIZERS, 2006 Exports to China, available at <http://tse.export.gov/NTDChartDisplay.aspx?UniqueURL=5sszqhm3xmmhnum0jcmghd45-2007-8-13-9-11-46>.

2. Import Regulation¹⁹

- **Though the legal framework for China's AD system appeared to be in place, China still had not notified key pieces of legislation to the WTO, precluding meaningful multilateral analysis of China's AD regime, particularly of its judicial review mechanisms and information access and disclosure in injury determinations.**

Countervailing Duties

- USTR finds that China's regulations and procedural rules generally conform to the Subsidies Agreement. However, in some areas, important provisions are either absent or ambiguous.
- China has not yet initiated any subsidies proceedings.

Safeguards

- USTR finds that China's rules and regulations generally conform to the WTO Safeguards Agreement.
- China had initiated only one safeguard proceeding (steel products from various countries, including the U.S.), terminated in December 2003.
- **USTR notes the following concerns:**
 - **China's rules and regulations contain some possible contradictions to the Safeguard Agreement, as well as some omissions and ambiguities. Also, some provisions of China's regulations have no counterparts in the Safeguards Agreement.**
 - **The U.S. continued to be concerned about several issues raised in earlier transitional reviews; namely, transparency, determination of developing country status, treatment of non-WTO members, protection of confidential data, access to non-confidential information, refunding of safeguard duties collected pursuant to provisional measures when definitive measures are not imposed, and the conditions governing the extension of a safeguard measure.**

3. Export Regulation²⁴

- China agreed to maintain export restrictions in accordance with WTO rules, which generally prohibit (with exceptions) export restrictions (other than duties, taxes or other charges) (GATT Article XI).
- **USTR notes the following deficiencies:**
 - **In 2005 and 2006, China resisted pressure from the U.S. and other WTO members to eradicate its longstanding export quota on blast furnace coke, which had a significant adverse effect on U.S. steel producers in 2004, though it raised the quota to pre-2004 levels. This export quota kept world coke prices artificially high in 2006, and a considerable disparity persisted between China's domestic prices and world coke prices. In addition to trying to direct market outcomes by maintaining the export quota on coke, in October 2006 China imposed a five percent duty on exports of coke.**
 - **In an apparent bid to support its downstream producers of various products derived from fluorspar, China continued to impose both quotas and license fees on fluorspar exports. China lowered the export quota on fluorspar each year and, in October 2006, levied a ten percent duty tax on exports of fluorspar.**

²⁴ See USTR, *2005 Report to Congress on China's WTO Compliance*, at 32-34 (December 11, 2005); USTR, *2006 Report to Congress on China's WTO Compliance*, at 35-37 (December 11, 2006).

4. Internal Policies Affecting Trade²⁵

Non-discrimination

- China agreed to abide by the core GATT principles of Most-Favored Nation (MFN), or non-discrimination (“normal trade relations”), and national treatment, and to repeal or revise laws inconsistent with these principles.
- **USTR notes the following deficiencies:**
 - **As in previous years, while China has revised many of its laws that conflicted with MFN and national treatment, it did not apply these core principles in all areas in 2005 and 2006.**
 - **China continued to apply the value-added tax (VAT) in a manner that unfairly discriminates between imported and domestic goods, both through official undertakings and extemporaneously (discussed below under Taxation).**
 - **China continued to discriminate in the application of SPS measures (discussed below under Agriculture).**
 - **New industrial policies on automobiles and steel apparently discriminate against both foreign producers and imported goods (discussed below under Investment).**

Taxation

- China agreed that its tax laws would conform to MFN and national treatment principles.

VAT Policies

- In October 2005, the U.S. and China notified the WTO that they had resolved their dispute over China's application of discriminatory VAT rates to imports of semiconductors.
- **USTR notes the following deficiencies, all continuing from previous years:**
 - **China resisted pressure to change its VAT policies which benefit domestic producers by exempting all phosphate fertilizers except DAP (a fertilizer the U.S. exports to China) from a 13 percent VAT.**
 - **Numerous U.S. industries complained that Chinese producers can still avoid VAT payments (through poor collection processes, special deals or even fraud) while importers must pay the full VAT.**
 - **China continued to apply preferential import duties and VAT treatment to certain products (particularly from Russia).**

Consumption Taxes

- **USTR notes the following national treatment deficiencies in China's consumption taxes:**
 - **The effective consumption tax rate on an array of imported products (e.g., spirits/alcoholic beverages, tobacco, cosmetics and skin/hair products, jewelry, fireworks, rubber, motorcycles and automobiles) remains substantially higher than the rate applied to domestic products because China continues to use different tax bases to compute consumption taxes for domestic and imported products**

Subsidies

- Upon accession, China assumed the obligations of the WTO Subsidies Agreement, including the elimination of prohibited subsidies (export subsidies and import subsidies).

²⁵ See USTR, *2005 Report to Congress on China's WTO Compliance*, at 34-48 (December 11, 2005); USTR, *2006 Report to Congress on China's WTO Compliance*, at 37-54 (December 11, 2006).

4. Internal Policies Affecting Trade²⁵

- In April of 2006, China finally submitted its much belated subsidies notification to the WTO's Subsidies Committee.
- **The USTR notes the following deficiencies:**
 - **China's subsidies notification was conspicuously incomplete, failing to notify any subsidies China's state-owned banks or provincial and local government authorities may have made. Moreover, China failed to commit to withdrawal of apparently prohibited subsidies it did notify, and did not notify other seemingly prohibited subsidies. These subsidies impact a broad array of industries and include both export subsidies and import subsidies.**
 - **The U.S. and other WTO members tendered comprehensive questions and comments regarding China's notification in July 2006, but China has not responded.**
 - **The injurious effects of China's subsidies in the U.S. market as well as in China and third-country markets prompted several U.S. industries, including the steel, paper and textiles industries, to express their concern.**
 - **In a petition filed with Commerce for the initiation of a CVD investigation in October 2006, the U.S. paper industry alleged injury from subsidized imports of coated free sheet paper from China. Commerce launched an investigation in November 2006, indicating that it would rule on the applicability of U.S. CVD law to China (the U.S. practice was not to apply U.S. CVD law to China as a non-market economy (NME)).²⁶**

Price Controls

- Upon accession to the WTO, China agreed that it would not restrict the level of imports of goods or services with the use of price controls.
- China continued to subject certain products and services to government-set pricing (including pharmaceuticals, tobacco, natural gas and certain telecommunications services), and other products and services to government-guidance pricing (including gasoline, kerosene, diesel fuel, fertilizer, cotton, various grains, various forms of transportation services, certain professional services, and certain telecommunications services).
- USTR notes that the U.S. sought clarifications from China regarding its price control system in connection with China's Trade Policy Review, conducted in April 2006, and during the transitional review before the Subsidies Committee in October 2006.

Standards, Technical Regulations and Conformity Assessment Procedures

- China assumed the obligations of the Agreement on Technical Barriers to Trade which sets rules

²⁶ Commerce issued its preliminary determination on March 30, 2007, in which it found that (1) China is subject to U.S. CVD law; and (2) Chinese producers and exporters had received net countervailable subsidies in a range of 10.90 percent to 20.35 percent. Commerce thus changed its longstanding practice of not applying U.S. CVD law to NMEs, such as China, based on the differences between the conditions of China's economy today and those of the 1980s Soviet-bloc countries which supplied the rationale for the non-application of U.S. CVD laws to NMEs. *See Coated Free Sheet Paper from the People's Republic of China: Amended Preliminary Affirmative Countervailing Duty Determination*, 72 Fed. Reg. 17484, 17486 (April 9, 2007); *see also Countervailing Duty Investigation of Coated Free Sheet Paper from the People's Republic of China - Whether the Analytical Elements of the Georgetown Steel Opinion are Applicable to China's Present-Day Economy*: Memorandum from Shauna Lee-Alaia and Lawrence Norton, Office of Policy, Import Administration, to David M. Spooner, Assistant Secretary for Import Administration (March 29, 2007), available at <http://ia.ita.doc.gov/download/prc-cfsp/CFS%20China.Georgetown%20applicability.pdf>.

4. Internal Policies Affecting Trade²⁵

and procedures regarding the development, adoption and application of voluntary product standards, mandatory technical regulations, and test/certification procedures. The TBT Agreement is directed to preventing the use of technical requirements as unnecessary barriers to trade.

Restructuring of Regulators

- As USTR noted in previous years, China has made considerable improvement to its standards and technical regulations regime.
- USTR notes the following deficiencies that persisted in 2005 and 2006:
 - Despite China's changes to its standards testing regime, in some sectors, foreign products are tested in specially designated laboratories that are separate from those laboratories used to test domestic products. This disparate testing can lead to uneven treatment. Furthermore, some of the regulations dictate only that products are to be inspected upon entry into China's customs territory, without specifying whether or how the regulations apply to domestic producers.

Transparency

- USTR notes the following deficiencies that persisted in 2005 and 2006:
 - China's notifications of proposed technical regulations and conformity assessment procedures have been submitted almost solely by two agencies, AQSIQ or SAC; measures from other agencies that seemingly require notification (*e.g.*, Ministry of Health, Ministry of Information (MII), State Environmental Protection Administration (SEPA) and the State Food and Drug Administration) have not been included. Thus, measures from such agencies have been enacted without first having been subject to comment from foreign companies, and without providing for transition periods during which foreign companies may make any required modifications.
 - When TBT measures have been notified, in some cases, the comment periods have been unacceptably short, and/or the comments disregarded.
 - MII's attempts to adopt the *Administrative Measures for Controlling Pollution Caused by Electronic Information Products* (the China RoHS) in 2006 are of particular concern. Foreign stakeholders have not had adequate opportunity to comment or request clarification on the proposed regulation, which, though modeled after the existing European Union regulation, "Restriction on Hazardous Substances Directive" (the EU RoHS), differs from it markedly. The China RoHS does not address fundamental information such as the specific products to be covered, labeling and marking requirements, maximum limits of hazardous substances and acceptable testing methodologies, leaving U.S. companies fearful that they will not have time to adapt their

²⁷ See Chinese Ministry of Information Industry, *Measures for the Administration of the Control of Pollution by Electronic Information Products* (February 28, 2006). The China RoHS became effective March 1, 2007.

²⁸ At the JCCT meeting in April 2006, China had agreed to take action by the end of May 2006 to eliminate duplicative testing and certification requirements applicable to medical devices. See The U.S.-China Joint Commission on Commerce and Trade (JCCT) Outcomes on U.S. Requests (April 11, 2006), http://www.ustr.gov/assets/Document_Library/Fact_Sheets/2006/asset_upload_file91_9286.pdf.

²⁹ At the JCCT meeting in April 2006, China had agreed to ensure that telecom service providers would be allowed to make their own choices about which standard to adopt and to issue licenses for 3G standards in a neutral manner. See The U.S.-China Joint Commission on Commerce and Trade (JCCT) Outcomes on U.S. Requests (April 11, 2006), http://www.ustr.gov/assets/Document_Library/Fact_Sheets/2006/asset_upload_file91_9286.pdf.

4. Internal Policies Affecting Trade²⁵

products to China's new conditions.²⁷

Standards and Technical Regulations

- USTR reports that China has made steady progress in conforming its technical regulations to international standards.
- In May 2005, Commerce funded a new U.S. private sector standards office in Beijing, with the goals of strengthening relationships with Chinese government regulatory authorities, industry associations and standards developers.
- 2006 saw three new positive developments:
 - In August, China notified a proposed modification to its distilled spirits standard which would abolish the requirement for tolerance levels of superior alcohols, or fusel oil. China also indicated that it was accepting public comment on the proposal.
 - The U.S. Trade and Development Agency (TDA) unveiled the U.S.-China Standards and Conformity Assessment Cooperation Project in Beijing to provide Chinese policy makers education and training in U.S. standards and conformity assessment procedures.
 - The American National Standards Institute, with Commerce backing, announced the opening of a Standards Portal with SAC with dual language educational materials on the U.S. and Chinese standards systems, a database of U.S. and Chinese standards and access to other countries' standards.
- **USTR notes the following deficiencies:**
 - **In 2005 and 2006, China continued to develop unique requirements in some sectors even where there are well-established international standards (e.g., autos, telecommunications equipment, Internet protocols, wireless local area networks, radio frequency identification tag technology, audio and video coding, and fertilizer).**
 - **Despite China's pledge to suspend indefinitely its proposed implementation of WAPI as a mandatory standard, it declared in December 2005 that products incorporating the WAPI standard should be given preference in government procurement.**
 - **In March 2006, the International Organization for Standardization rejected the adoption of China's WAPI as an international standard.**
 - **China continued to exert pressure on Chinese businesses to select China's 3G telecommunications standard, even declaring in February 2006 that TD-SCDMA is the "national standard" for 3G telecommunications, despite promises to the contrary in 2004, and despite renewing those promises in April 2006.²⁸**
 - **USTR continued to monitor draft regulations, public statements by Chinese officials and the *ad hoc* approaches of some Chinese standards organizations that indicate China may begin requiring foreign companies to trade their patented technologies, royalty-free, for the chance to participate in developing standards.**

Conformity Assessment Procedures

- China has established one safety mark ("China Compulsory Certification" or "CCC" mark), issued to both foreign and domestic products.
- **USTR notes the following deficiencies:**
 - **In 2005 and 2006, U.S. companies' complaints that the CCC mark regulation lacked clarity persisted.**
 - **China continued to apply the CCC mark inconsistently, allowing the sale of many domestic products that do not have the mark.**
 - **Despite some modifications made to the regulations, U.S. companies continued to complain of duplication in certification requirements, particularly for radio and telecommunications equipment, medical equipment²⁹ and automobiles.**
 - **China has granted over one hundred accreditations to test and certify for the CCC mark**

4. Internal Policies Affecting Trade²⁵

to Chinese enterprises. Despite national treatment commitments for accreditation, China has not granted accreditation to any foreign conformity assessment bodies, nor has it created any alternatives that are less trade-restrictive (e.g., recognition of a supplier's declaration of conformity).

- China has entered into one Memorandum of Understanding (MOU) with a U.S. conformity assessment entity for follow-up inspections only, but refuses to grant any more to U.S. entities, claiming it is only permitting one MOU per country. However, Japan purportedly has two such MOUs (Germany has one).
- China maintained its duplicative certification requirements for imported medical equipment, despite having committed to eliminate them.

Other Internal Policies

State-Owned and State-Invested Enterprises

- China agreed that purchases of goods and services by state-owned and state-invested enterprises for commercial non-governmental purposes would be subject to WTO rules, in particular that they would be based on commercial considerations.
- In past years, U.S. companies did not voice many complaints in this area, though the lack of transparency precludes thorough evaluation.
 - In 2005, some U.S. companies began to question China's role in the choices of state-owned enterprises considering foreign acquisitions, especially in the oil and gas sectors.
 - China added to U.S. companies' concerns in 2006 with the issuance of several regulations limiting the power of state-owned and state-invested enterprises to receive foreign investment.

State Trading Enterprises

- China agreed that state trading enterprises would provide full information on their pricing mechanisms and ensure transparent and WTO-consistent import purchasing procedures.
- USTR notes the following deficiency:
 - As in previous years, China continued to provide only general information in response to requests for information regarding the pricing and purchasing practices of state trading enterprises, thereby curtailing assessment of China's compliance efforts.

Government Procurement

- China is not a member of the WTO Agreement on Government Procurement (GPA) but committed to initiate negotiations to accede to the GPA. In the interim, China agreed that central and local governments would conduct procurement in a transparent manner.
- The USTR notes the following concerns:
 - China's preference for the purchase of domestic software by central and local governments continued to be of great concern to U.S. industry.
 - As noted above (in the Standards and Technical Regulations section), China has demonstrated a clear preference for domestic products incorporating the WAPI standard.
 - In early 2006, China introduced plans for its science and technology sectors which include preferences for the purchase of domestic goods as a valuable industrial policy tool, despite having acknowledged in 2005 U.S. concerns regarding proposed restrictions on the purchase of foreign software by central and local governments.

5. Investment³⁰

- China committed to eliminate export performance, local content and foreign exchange balancing requirements from its laws, regulations and other measures. China agreed that importation or investment approvals would not be conditioned on these requirements or other requirements such as technology transfer and offsets.
- **USTR notes that 2005 and 2006 were particularly worrisome in the area of investment, with China appearing to regress to a more restrictive investment regime, and to espouse reliance on government direction of the market, instead of progressing to reliance on market mechanisms:**
 - China continued to encourage technology transfer, and effectively required it in practice in many areas.
 - Chinese officials continued to consider factors such as export performance and local content when making investment approval decisions.
 - China's auto industrial policies continued to be particularly disconcerting to U.S. business interests:
 - Measures issued in 2005 to implement the new automobile industrial policy strengthened the discriminatory provisions that discourage the importation of auto parts and encourage the use of domestic technology (*e.g.*, such measures impose a charge equal to the tariff on finished automobiles (usually 25%) if the number or value of imported parts in an assembled vehicle surpasses stipulated thresholds, rather than the tariff assessed on auto parts (usually 10%).³¹
 - In September 2006 the U.S., the EC and Canada requested the formation of a WTO panel to hear a dispute regarding these measures. The DSB established the panel in October 2006.
 - In July 2005, China issued its Steel and Iron Industry Development Policy, which limited foreign investment in several ways:
 - Foreign investors are required to have proprietary technology or intellectual property, even though they may not have a controlling share in steel or iron industries; this results in a *de facto* technology transfer requirement, in contravention of China's commitments.
 - It violates the principle of national treatment by discriminating against foreign equipment and technology imports.
 - It provides for various types of government financial support for steel and iron products that use domestic equipment, encouraging local content use.
 - In direct contradiction to China's commitment in its accession agreement not to condition the right of investment or importation on the absence of competing domestic producers, this policy further requires the use of domestically-produced equipment and technologies whenever domestic supplies are available.
 - It dictates the number and size of steel producers in China, their locations, the types of products that they may produce, and the technology to be used.
 - China continued to prohibit the production and development of genetically-modified plant seeds, an exception to China's progress in opening up other sectors not covered in its accession agreement to foreign investment.
 - As noted above in the Trading Rights and Distribution Services sections, China

³⁰ See USTR, *2005 Report to Congress on China's WTO Compliance*, at 49-52 (December 11, 2005); USTR, *2006 Report to Congress on China's WTO Compliance*, at 54-59 (December 11, 2006).

³¹ See *Measures on the Management of Parts Import Constituting an Entire Automobile* (April 1, 2005).

5. Investment³⁰

- continued to disregard its foreign investment commitments with regard to the importation of books, newspapers, periodicals, electronic publications, and audio and video products.
- In June 2006, China issued a measure which promotes the expansion and development of the domestic market share in 16 categories of equipment manufacturing. The measure has a dual approach:
 - It imposes preferential import duties on parts and research and development materials, encourages domestic procurement of new major technical equipment, establishes a fund for capital market financing for domestic businesses, and requires strict assessment of imports.
 - It contemplates new restrictions on foreign investment in these sectors, including new rules that bolster government control of equipment and machinery imports and restrict foreign majority ownership or control.
 - In August 2006, China issued new mergers and acquisitions measures that fortified MOFCOM's supervisory role over foreign investment and gave it the authority to determine whether the value of a domestic acquisition target has been properly assessed.

6. Agriculture³²

Tariffs

- As in previous years, in 2005 and 2006, China implemented required tariff changes on agricultural goods on schedule. China's compliance with its tariff reduction commitments have contributed to a significant increase in certain U.S. exports to China.

China's Biotechnology Regulations

- As reported in previous years, in 2004 the U.S. and China resolved U.S. concerns with China's regulations for issuing final safety certificates. As a result, U.S. exports of soybeans to China have risen, increasing by 12 percent in the first nine months of 2006 over the same period in 2005. China remained the foremost export destination for U.S. soybeans.
- **USTR notes that other U.S. concerns persisted in 2005 and 2006:**
 - Unnecessary and onerous approval requirements were still in place (prior to submission in China for approval, a product must first be approved in the U.S.; new applications are limited to two per year).
 - Lack of clarity remained on specifications applicable to products with multiple traits, and China still imposed duplicative and often unprecedented testing requirements.
 - Safety certifications for cotton, soybeans, corn and canola would begin expiring in February 2007, but the Ministry of Agriculture did not issue an announcement regarding renewal requirements for safety certifications covering biotechnology crops imported for processing purposes until November 2006. Because of the tight time frame, trade in these products might be disrupted, even if the approval process advances rapidly.

³² See USTR, *2005 Report to Congress on China's WTO Compliance*, at 52-63 (December 11, 2005); USTR, *2006 Report to Congress on China's WTO Compliance*, at 59-69 (December 11, 2006).

6. Agriculture³²

Tariff-Rate Quotas on Bulk Agricultural Commodities

- USTR notes that despite much improvement in China's operation of its TRQ system since the issuance of new regulations in 2004, transparency continued to be a problem in 2005 and 2006.

Sanitary and Phytosanitary Issues

- Through the SPS Agreement, China committed that SPS measures would address legitimate scientific-based concerns, not discriminate arbitrarily and not be disguised restrictions on trade.

BSE-Related Bans on Beef and Low-Risk Bovine Products

- In early 2006, after several bilateral meetings and technical discussions, the U.S. resumed exporting certain low-risk bovine-origin products—bovine semen and bovine embryos—to China, though trade in protein-free tallow, which falls in the same category as the other two products, has not been permitted.
- By January 2006, the U.S. had resumed exporting the full range of its non-ruminant feed and fat products (previously banned, though these products present no BSE-related risk) to China.
- USTR notes the following deficiencies:
 - China maintained its ban on imports of U.S. cattle, beef and processed beef products, despite the U.S. having provided China with comprehensive information on its internationally approved BSE-related surveillance and mitigation measures.
 - China unilaterally announced a limited market opening for boneless beef in June 2006, and then announced 22 burdensome entry conditions. However, these unilateral announcements had no effect on the resumption of trade; the U.S. and China need to construct mutually satisfactory language for actual export safety certificates prior to resumption of U.S. beef exports into China.
 - China had not offered any scientific rationale for its maintenance of the ban.

Pathogen Standards and Residue Standards for Raw Meat and Poultry Products

- As previously reported, China has applied some non-science-based standards to raw poultry and meat imports that are not applied to domestic products.
- In late 2005 and early 2006, China de-listed fourteen U.S. pork and poultry plants for supposed violations of zero tolerance standards for pathogens (generally considered unachievable without irradiation) or detection of chemical residues. Most of these plants were re-listed in April 2006 as approved to ship product to China.
- USTR notes the following deficiencies:
 - Two raw meat and poultry plants remained de-listed in 2006 without scientific justification from China.
 - In 2005 and 2006, China continued to uphold maximum residue levels (MRLs) for certain heavy metals and other residues that do not conform to Codex or other international standards. Moreover, China's enforcement of zero tolerance rules for some residues contradicts Codex guidelines which have been adopted by many of China's major trading partners.

Avian Influenza

- China exhibited improvement in adhering to OIE guidelines by imposing limited poultry bans when AI has been found in U.S. poultry (e.g., a limited ban on poultry from New York in early 2005, a limited ban on poultry from Pennsylvania), rather than a nationwide ban such as the one in 2004.
- However, USTR notes that, in 2006, China banned the importation of heat-treated and

6. Agriculture³²

cooked poultry and poultry products, in contravention of the OIE's position that products heat-treated to neutralize the AI virus should not be banned.

Wheat

- USTR notes that, as in previous years:
 - China's imposition of a maximum residue level (MRL) for selenium that is below the international standard threatened all U.S. wheat exports to China; and
 - Although there is no international standard, China continued to impose a MRL for vomitoxin in wheat. USTR noted, however, that China apparently has not enforced these measures.

Food Additive Standards

- USTR notes that China continued to impose overly restrictive standards that block imports of many U.S. processed food products. The banned food additives are widely used in other countries and are approved by the World Health Organization.
 - In July 2005, China notified its proposed *Hygienic Standard for Uses of Food Additives* to the TBT Committee. The document is 237 pages and covers nearly 1,000 commodities, it often uses domestic classifications rather than internationally recognized technical terms, rendering assessment of the regulation's impact on specific products problematic.

Fire Blight

- In accordance with a WTO Appellate Body report issued in November 2003, and after two years of U.S. urging, in December 2005 China finally consented to lift quarantine restrictions on imports of U.S. plum varieties; it still restricted imports of two varieties of apples and other stone fruit from the U.S.

Inspection-Related Requirements

- USTR notes the following deficiencies:
 - Concerns that arose from China's Decree 73 (*Items on Handling the Review and Approval for Entry Animal and Plant Quarantine*), issued in 2004 to improve AQSIQ's import licensing procedures, persisted, including:
 - Uncertainty created by delays in issuing Quarantine Inspection Permits (QIPs), required contract terms and commercial risk;
 - Increased financial risk for exporters shipping commodities to China; and
 - General downward pressure on world prices of commodities such as soybeans.³³
 - In 2006, foreign industry noted that not only were they subject to limited QIP quantities, but that MOFCOM also insisted that some companies use up the majority of a QIP before being eligible for another, and required other companies to use up their QIPs or be de-listed. These practices make the QIP system less dependent on market forecasts.
 - MOFCOM's separate import system for commodities such as poultry products lacks transparency and flexibility.

Export Subsidies

- China committed to eliminate all export subsidies upon its WTO accession.

³³ See *Items on Handling the Review and Approval for Entry Animal and Plant Quarantine (Decree 73)* (June 2004); see also *Administrative Measures for the Entry-Exit Inspection and Quarantine for Grains and Feed Stuff* (March 1, 2002); see also *Administrative Measures for Entry Animal and Plant Quarantine* (September 1, 2002).

6. Agriculture³²

- USTR notes that in 2005 and 2006, U.S. concerns regarding China's possible use of subsidies and excessive VAT rebate rates for its corn exports persisted.

7. Intellectual Property Rights³⁴

Legal Framework

- USTR observes that, overall, China's IPR laws are generally in compliance with the TRIPS Agreement, though some improvements still need to be made.
- China has taken many positive steps in the area of IPR in the past two years, including:
 - Agreeing in July 2005 to take specific actions aimed to increase prosecutions of IPR violators, improve enforcement at the borders, counter piracy of movies, audio-visual products and software, address Internet-related piracy, and assist small and medium-sized U.S. companies encountering China-related IPR problems;
 - Becoming more willing to circulate draft proposals for public comment and to confer with interested trading parties and stakeholders on its proposals;
 - Amending rules regarding the transfer of administrative and customs cases to criminal authorities;
 - Taking enforcement actions against plants that produce pirated optical discs;
 - In 2006, issuing new measures that move China closer to its 2004 pledge to accede to the WIPO Internet treaties, such as a significant Internet-related measure designed to enhance protection of electronic data (though more needs to be done to achieve full implementation);
 - Issuance of two new Action Plans for IPR protection in 2006 and 2007, outlining China's intentions to:
 - Draft or revise various laws, regulations, rules and administrative measures on trademark, copyright, and customs protection, in addition to several judicial interpretations and guidelines
 - Conduct numerous enforcement campaigns, including, inter alia, special crackdowns on piracy of textbooks and teaching supplements; cyber infringements; street vendors and booths selling audiovisual products; protection of Olympic logos; false use of famous brand trademarks; special enforcement checks to protect geographical indications for certain food products; and continued special actions against unauthorized computer software preloading
 - Implement several day-to-day enforcement measures, such as continuing clampdowns at exhibitions and fairs, high incidence areas and sectors, and in wholesale and retail commodity markets
 - Ask for public comment on proposed revisions of its IPR laws³⁵
 - In 2006, mandating the pre-installation of licensed operating system software in computers, and requiring government agencies to buy only computers meeting this requirement;³⁶ and

³⁴ See USTR, *2005 Report to Congress on China's WTO Compliance*, at 63-73 (December 11, 2005); USTR, *2006 Report to Congress on China's WTO Compliance*, at 70-72 (December 11, 2006).

³⁵ "China's Action Plan on IPR Protection 2006," People's Daily Online, April 30, 2006, available at http://english.people.com.cn/200604/30/eng20060430_262334.html; "China's Action Plan on IPR Protection 2007," National Working Group for IPR Protection, April 4, 2007, available at http://english.ipr.gov.cn/ipr/en/info/Article.jsp?a_no=67391&col_no=925&dir=200704.

7. Intellectual Property Rights³⁴

- Drafting other proposed regulations governing monopolies and the treatment of IPR by standards-setting entities.
- **USTR notes the following concerns:**
 - **China's IPR laws continued to contain a number of flaws that significantly hamper its criminal enforcement (and the 2006 Action Plan does not contemplate reform of the criminal laws), such as:**
 - **High legal thresholds for criminal liability that effectively provide legal safe harbor for commercial infringers;**
 - **Lack of criminal liability for certain acts of copyright infringement;**
 - **A profit motive requirement in copyright cases;**
 - **In counterfeiting cases, a requirement of identical trademarks;**
 - **The distinction between individual and enterprise liability;**
 - **An array of weaknesses in China's laws that do not deter, and may foster, some infringing activity (e.g., "squatting" of foreign company names, designs and trademarks, theft of trade secrets, registration of other companies' trademarks as design patents and vice versa, use of falsified/misleading documents to make counterfeiting operations seem legitimate, and bogus indications of geographic origin of products); and**
 - **General lack of minimum, proportionate sentences and clear standards for initiating criminal investigations where a reasonable suspicion of criminal activity exists.**
 - **In November 2006, at China's request to resolve the issue through bilateral talks, the U.S. postponed its decision to formally request consultations on the issue of high thresholds for criminal liability and other IPR enforcement issues.³⁷**
 - **China's Customs Administration intensified its efforts to effectively enforce against counterfeit and pirated goods intended for export, but some troubling aspects of its regulations and implementing rules remain, including:**
 - **The requirement that infringing goods be auctioned after removal of infringing features, as opposed to destruction of such goods not purchased by the right holder or employed for public welfare; and**
 - **An excessively short deadline for a right holder to apply for seizure of suspect goods held by the Chinese authorities.**
 - **China's legal framework as applied to the pharmaceutical sector is still beset with problems, including:**
 - **Insufficient protection against unfair commercial use of undisclosed test and other data presented by foreign companies pursuing marketing approval;**
 - **Delays in the marketing approval system which provide incentive for counterfeiting; and**

³⁶ However, Chris Israel testified in 2006 that sales data from U.S. industry did not support China's claim that it completed its government software legalization program, and there was no other evidence indicating that China had taken steps towards purchasing and using solely legal software. *See Piracy and Counterfeiting in China, Hearing before the US-China Economic and Security Review Commission, 109th Congress (June 7, 2006)* (Testimony of Chris Israel, U.S. Coordinator for International Intellectual Property Enforcement before the US-China Economic and Security Review Commission).

³⁷ The bilateral talks failed to achieve mutually satisfactory resolution, and the U.S. formally requested WTO consultations on April 10, 2007. *See China – Measures Affecting Trading Rights and Distribution Services for Certain Publications and Audiovisual Entertainment Products, Request for Consultations by the United States, WT/DS363/1 (16 April 2007).*

7. Intellectual Property Rights³⁴

- **Inadequate regulatory oversight for China's domestic pharmaceuticals industry, contributing to an environment conducive to counterfeiting.**

Enforcement

- Under the WTO TRIPS Agreement, China is obligated to implement effective IPR enforcement procedures, including deterrent-effective civil and criminal remedies.
- In 2005 and 2006, China continued to sponsor anti-counterfeiting and anti-piracy campaigns, with the immediate result of high numbers of seizures of infringing materials.
- China's 2006 Action Plan (April 6, 2007) calls for more such "special crackdown efforts" to combat IPR infringement.
- Chinese businesses have increasingly taken an active role in fighting for IPR protection and enforcement:
 - Chinese right holders own the bulk of design patents, utility models, trademarks and plant varieties in China and have become the chief filers of invention patents.
 - Most of the IPR enforcement measures in China are now conducted at the request of Chinese right holders trying to safeguard their interests.
- The U.S. has also benefited from its increased cooperation with other WTO members, particularly Japan, Switzerland and the EC in its pursuit of greater IPR enforcement in China.
- **USTR notes the following concerns:**
 - **Piracy and counterfeiting remained widespread in China during 2005 and 2006, despite the government's anti-piracy campaigns, and despite the increasing number of civil IPR cases in Chinese courts. Some trade association reports indicate that the IPR situation in China has worsened since 2004, and U.S. industry estimates that levels of piracy in all lines of copyright business ranged between 85-93% in 2006.**
 - **China's poor enforcement of its IPR laws affects a broad array of industries: film, music and sound recordings, publishing, business and entertainment software, pharmaceuticals, chemicals, information technology, apparel, athletic footwear, textile fabrics and floor coverings, consumer goods, food and beverages, electrical equipment, automotive parts and industrial products, among others.**
 - **In early 2005, USTR conducted an out-of-cycle review, finding that China had not addressed serious deficiencies in its IPR enforcement regime. Consequently, USTR elevated China to the Special 301 "Priority Watch" list.**
 - **As in previous years, the high rates of IPR infringement stem from lack of coordination among Chinese government ministries and agencies, lack of training, resource constraints, lack of transparency in the enforcement process and its outcomes, and local protectionism and corruption.**
 - **Though China committed at the July 2005 JCCT³⁸ meeting to aggressively combat movie piracy, including improved enforcement for titles not yet authorized for distribution, right holders indicate that there has been very little progress in squelching**

³⁸ The JCCT (U.S.-China Joint Commission on Commerce and Trade) is a government-to-government consultative mechanism that provides a forum to resolve trade concerns and promote bilateral commercial opportunities. The JCCT was established in 1983 and has provided a formal process whereby the U.S. and China are able to meet and discuss trade issues of mutual interest and concern, generally on a yearly basis.

7. Intellectual Property Rights³⁴

- piracy of pre-release titles in several cities.
- USTR notes that in 2005, the percentage of infringing goods seized at the U.S. border of Chinese origin increased to 69% from 63% in 2004, a percentage ten times larger than that of any other U.S. trading partner.³⁹
- China's maintenance of market access barriers, such as import restrictions and restrictions on wholesale and retail distribution, makes its domestic market even more conducive to IPR infringement by curtailing the ingress of legitimate foreign products.

Administrative Enforcement

- USTR notes the following concerns:
 - China's administrative enforcement actions against IPR infringers continued to be plagued by the problems noted in previous years:
 - Imposition of extremely low fines (because the value of the infringing goods is based on the price for infringing goods, not the genuine goods);
 - Insufficiency of evidence of warehousing infringing goods to prove intent to sell them;⁴⁰
 - Infrequency of administrative authorities forwarding administrative cases to the Ministry of Public Security for criminal investigation; and
 - Failure to shut down blatant IPR infringement by roaming vendors, retail markets and wholesale markets throughout China (e.g., the Silk Street market in Beijing).

Criminal Enforcement

- USTR notes the following concerns:
 - In 2005 and 2006, despite China's pledges to apply criminal sanctions to a wider range of IPR-infringing activities and to increase the penalties for IPR violations, criminal prosecutions stayed low compared to administrative cases, and criminal enforcement was not an adequate deterrent for IPR-infringers.
 - U.S. industry continued to complain of the police force's lack of resources and training to combat IPR infringement, as well as an apparent lack of interest in doing so.
 - Prosecution of IPR crimes requires coordination between national and local agencies, but coordination remained problematic in 2005 and 2006.
 - As noted above, criminal liability thresholds remain too high and are seldom met. They also require proof of sales of infringing goods, which is often not available.

Civil Enforcement

- Civil actions brought for monetary damages or injunctive relief for IPR infringement continued to

³⁹ Data for 2006 show that the percentage of infringing goods seized at the border that are of Chinese origin increased to 81 percent; Hong Kong was second with 6 percent. *See FY 2006 Top IPR Commodities Seized*, Department of Homeland Security, United States Customs and Border Protection and United States Immigration and Customs Enforcement. Through mid-year FY 2007, China's share of seized infringing goods remained at 81 percent, with a total domestic value of \$89.2 million. *See U.S. Government IP Enforcement Quarterly Update*, United States Immigration and Customs Enforcement (July 2007), available at www.stopfakes.gov/pdf/Quarterly_Report_FY07Q2_July2007.pdf.

⁴⁰ In late 2006, in Shanghai Changning District Court, the Court found a distributor of counterfeit golf clubs guilty of "attempt" based primarily on the amount of inventory the distributor had in his possession. Officials seized 1,755 counterfeit golf clubs, with a value of RMB4.7 million (\$570,000). The defendant was sentenced to 18 months in jail and a fine of RMB 30,000 (\$3,700). *See Prison Sentences for Counterfeit Golf Equipment Dealers, TaylorMade-adidas Golf*, November 16, 2006, available at www.tmag.com/media/pressreleases/2006/111606_counter.htm.

7. Intellectual Property Rights³⁴

increase in 2005 and 2006, due in large part to the ineffectiveness of the administrative and criminal enforcement processes.

- China continued to attempt to upgrade its judicial system, leading to an increase in the sophistication of its IPR courts.
- **USTR notes the following concerns:**
 - **U.S. companies continued to criticize the civil enforcement system for local protectionism, judges' lack of technical training, and vague or ineffective court rules regarding evidence, expert witnesses, and protection of confidential information.**
 - **Moreover, in the patent area, where civil remedies are of particular importance, a single case still takes several years to complete, thereby making the damages provisions that China adopted to comply with its TRIPS Agreement less significant.**

8. Services⁴¹

Financial Services—Banking

- The five-year phase-in period ended on December 11, 2006, by which time China had committed to lift remaining geographic limitations and to permit foreign banks to conduct domestic currency business with Chinese individuals.
 - In December 2005, the China Banking Regulatory Commission (CBRC) opened up seven additional cities to foreign banks (five more than had been scheduled to be opened by that time), bringing the total of Chinese cities in which foreign banks can do business to 25.
 - By September 2006, 191 foreign banks, including numerous U.S. banks, had branches of representative offices in China, despite high capital requirements and other barriers.
 - The total assets of foreign banks in China had reached \$105 billion, approximately two percent of the total banking assets in China.
 - The domestic currency business has expanded greatly, despite some Chinese protectionism in this area.
- **USTR notes the following concerns:**
 - **Despite having agreed to allow qualified foreign financial institutions to set up Chinese-foreign joint banks immediately after its accession, without enumerating any restriction on the percentage of foreign ownership in such banks, China limited the sale of equity stakes in existing state-owned banks to a single foreign investor to 20 percent, and limited the total equity share of all foreign investors to 25 percent.**
 - **China has continued to protect domestic banks from foreign competition in some ways, (e.g., by limiting product innovation by foreign banks).**
 - **China issued *Regulations for the Administration of Foreign-Funded Banks* in November 2006 that contain worrisome provisions:**
 - **To be eligible for incorporation in China, foreign-funded banks must show that they have had a representative office in China for two years and that their total assets exceed \$10 billion.**
 - **After incorporating, these banks may offer full domestic currency services to Chinese individuals only if they can show that they have had three years of operation in China and two consecutive years of profits. The scope of activities in**

⁴¹ See USTR, *2005 Report to Congress on China's WTO Compliance*, at 73-88 (December 11, 2005); USTR, *2006 Report to Congress on China's WTO Compliance*, at 78-95 (December 11, 2006).

8. Services⁴¹

which foreign banks operating through branches (not subsidiaries) may engage is also constrained, in particular with regard to the domestic currency business.

- Foreign bank branches may only take domestic currency deposits of RMB 1 million (\$125,000) or more from Chinese individuals, and may not make any domestic currency loans to Chinese individuals (these restrictions do not apply to foreign bank branch dealings with Chinese businesses).
- Foreign bank branches also may not issue credit cards to Chinese individuals or businesses.

Financial Services—Insurance

- As of October 2006, with all geographic restrictions and most business scope restrictions lifted, 44 foreign insurers were doing business in China, including many U.S. insurers. While foreign insurers had captured only a six percent share of the national market, they have been expanding their operations in China, particularly in major coastal municipalities.
- U.S. and Chinese industry experts have had several opportunities to discuss their concerns about the insurance industry in China with U.S. and Chinese government representatives in working group meetings of the China Insurance Regulatory Commission (CIRC).
- **USTR notes the following concerns:**
 - As previously reported, CIRC issued final implementing rules in May 2004, which have been improved and clarified, but remained problematic for U.S. insurers in 2005 and 2006.
 - Some consider the capital requirements to be too high.
 - Various licensing application procedures remain unclear.
 - The rules regarding branching rights are still inadequate and in some ways ambiguous.
 - Long delays in the application approval process are routine, with CIRC as yet unable to consistently comply with its own regulatory requirement of 60 days.
 - The rules do not address CIRC's continuing practice of granting foreign insurers new branch approvals on a consecutive basis, while granting domestic insurers new branch approvals on a concurrent basis, despite assurances to the U.S. that it would stop this unfair practice.
 - Uncertainty remains concerning China's reinsurance regulations, particularly with regard to whether insurers in China must offer cessions to domestic reinsurers that would not conform to China's WTO commitments.

Financial Services—Credit Cards

- China committed to eliminate market access restrictions and extend national treatment to foreign suppliers providing credit, charge and debit cards, among other things, including the provision and transfer of financial information, financial data processing and advisory, intermediation and other financial services ancillary to payments and money transmission services. This commitment was due to take effect with regard to the RMB business of retail clients by December 11, 2006.
- **USTR notes the following concerns:**
 - China continued to restrict foreign credit card companies' access to the Chinese market.
 - Banks in China may only issue a credit card with a foreign logo on it if the card also carries the logo of China Union Pay (CUP), a body created by the PBOC and owned by participating Chinese banks.
 - Foreign credit card companies' networks may only be used to process foreign currency transactions; all RMB transactions must go through CUP's network.

8. Services⁴¹

- China added to these concerns in the second half of 2006, as PBOC-backed CUP proposals apparently designed to solidify CUP's hold on the credit card section came to light.
 - The proposals designate CUP as the sole provider of payment and money transmission services for Chinese consumers for RMB processing, and bar other providers from entering this market.

Financial Services—Motor Vehicle Financing

- As previously reported, China implemented its commitment to open up the motor vehicle financing sector to foreign non-bank financial institutions without any limitations on market access or national treatment in October 2004.

Financial Services—Financial Information Services

- In its WTO accession agreement, China committed to establish an independent regulatory authority to oversee its financial information services sector.
- USTR notes the following deficiencies:
 - To date, China has not established an autonomous regulator for the financial information services sector, continuing to rely on Xinhua, the state news agency and a major market competitor, to perform regulatory oversight.
 - Xinhua's issuance of new rules in September 2006 caused great concern in the U.S. and elsewhere.⁴² Among other things, the new rules contravene China's national treatment commitments by barring foreign providers of financial information services from engaging directly with domestic Chinese clients.
 - Such foreign suppliers must go through a Xinhua-designated agent; Xinhua has designated one agent—a Xinhua affiliate.
 - These restrictions do not apply to domestic providers of financial information services, and curtail rights foreign providers of financial information services had enjoyed since 1996, before China's WTO's accession.
 - After immediate objections from the U.S. and EC, Xinhua stated that the new rules would not apply to foreign providers of financial information services until it had issued implementing rules.

Legal Services

- As previously reported, China's efforts to open its legal services sector to foreign law firms have had several shortcomings. Though some U.S. firms have been able to open a second office in China, these problems persist.
- USTR notes that there has been little progress in addressing the previously cited problems with establishing foreign law offices in China—economic needs test, unreasonable restrictions on types of legal services, and unnecessarily time-consuming procedures.

Telecommunication Services

- Though in 2005 the U.S. convinced China to commit its telecommunications regulator, MII, to a bilateral working group to discuss the problems noted in previous reports, and though in 2006

⁴² See *Administrative Measures on News and Information Release by Foreign News Agencies within China* (September 2006).

8. Services⁴¹

China pledged to improve its regulations governing the telecommunications services sector to better conform to its WTO obligations, little progress has been made in this sector.

- **USTR notes the following concerns:**
 - **High capital requirements (especially for basic telecommunications services) remain, effectively barring entry for many potential foreign suppliers.⁴³**
 - **China has not established an independent regulator, depending on the nominally separate MII, which continues to exert extensive influence and control over telecommunications operations and uses its regulatory authority to disadvantage foreign firms.**
 - **MII retains restrictions on what services are eligible for classification as “value-added,” relegating several telecommunication services to the “basic” category, which imposes a slower liberalization schedule and higher capitalization requirements. This classification system is in contrast to international norms and has limited U.S. telecommunications firms’ access to the Chinese market.**
 - **MII’s licensing process remains very slow. As of its 2006 report, USTR was unaware of the completion of any domestic or foreign application for a license to provide basic services.**
 - **Though China began internally circulating a draft of its *Telecommunications Law* in 2004, it had yet to circulate the draft for public comment.**

Construction and Related Engineering Services

- On accession, China agreed to permit foreign companies to provide construction and related engineering services in joint ventures with Chinese companies, limited to foreign invested projects and subject to capitalization requirements. Within three years of accession, China committed to remove these restrictions and to allow wholly foreign-owned subsidiaries to provide services in four types of projects.
- In November 2006, China agreed to engage in a dialogue on international best practices in the construction sector, to take place in May 2007.
- **USTR notes the following concerns:**
 - **In September 2002, China issued its *Rules on the Administration of Foreign-Invested Construction Enterprises* (Decree 113) and *Rules on the Administration of Foreign-Invested Construction Engineering Design Enterprises* (Decree 114). Decree 113 went into effect in April 2004; draft implementing regulations for Decree 114 were issued in December 2006. These decrees created new and more restrictive conditions than those extant prior to China’s WTO accession. Remaining problematic provisions include:**
 - **Measures barring the same company from providing construction services and project management services on a single project have not been changed, though implementing rules have not been issued. U.S. companies often provide all of these services in combination.**
 - **A requirement that foreign firms obtain qualification certificates, effective October 2003.**

⁴³ At the JCCT meeting in April 2006, China had committed to make appropriate adjustments to its registered capital requirements for telecom service providers. See The U.S.-China Joint Commission on Commerce and Trade (JCCT) Outcomes on U.S. Requests (April 11, 2006), http://www.ustr.gov/assets/Document_Library/Fact_Sheets/2006/asset_upload_file91_9286.pdf.

8. Services⁴¹

- A requirement that foreign-invested enterprises incorporate in China.
- High minimum registered capital requirements and technical personnel staff requirements that many foreign firms have difficulty meeting.
- Circular 159, which temporarily lifted the incorporation requirements of the previous rules, allowing foreign providers of construction services and related construction engineering design services to operate on a project-by-project basis, expired in July 2005. As a result, U.S. and foreign companies' decisions to participate in projects in China are riddled with uncertainty.
- The draft implementing regulations for Decree 114 issued in December 2006 include provisions that may restrict market access for U.S. and other foreign companies (*e.g.*, they only temporarily suspend the foreign residency and personnel requirements and require two years of domestic experience for foreign companies applying for higher-level licenses).

Express Delivery Services

- China committed to allow foreign express delivery companies in joint ventures with Chinese companies to increase their stake over time, and to allow wholly foreign-owned subsidiaries within four years of accession. In addition, China committed to establish an independent regulator for this sector.
- In August 2006, China completed its plan to separate the regulatory and operations functions of China Post, with the State Postal Administration (SPA) as the regulator and a new state-owned entity—the China Post Group Corporation—as conductor of China's postal business, and scheduled to be established in 2006.
 - In September 2006, SPA proclaimed the creation of 31 provincial-level Postal Management Bureaus to aid in the regulatory effort.
- USTR notes the following concerns:
 - The eighth draft of the *Postal Law*, circulated in late 2006, contained troubling provisions:
 - A minimum weight restriction on domestic and international letters weighing less than 150 grams;
 - Exclusion of foreign service providers from the domestic express delivery market; and
 - A tax to fund universal mail service in China.
 - The U.S. was frustrated by the State Council's failure to make public its July 2005 Postal Reform Plan and to clarify certain outstanding issues (*e.g.*, whether express delivery services providers will be required to pay into a fund to support universal mail service in China).

Aviation Services

- As previously reported, China's 2004 agreement to increase market access for U.S. providers of aviation services was an important step in trade liberalization.
- In April 2006, the U.S. and China launched the first round of negotiations for a bilateral Open Skies Agreement, contemplated in the 2004 agreement. The U.S. would push for resumption of these negotiations in 2007.

Maritime Services

- The USTR notes no significant developments in the maritime services sector since China's 2003

8. Services⁴¹

signing of a bilateral agreement to increase market access for U.S. providers of maritime services.

Other Services

- As previously reported, in some sectors (e.g., several types of professional services, tourism and travel-related services, educational services and environmental services), China has implemented, and in some cases exceeded, its commitments to phase in market access.
- **USTR notes the following concerns:**
 - **China continued to treat its commitment to permit twenty foreign films per year as an upper limit rather than as a minimum. This policy, along with distribution and marketing restrictions and protracted film approval requirements, fosters illegal copying and sale of foreign films in China.**

9. Legal Framework⁴⁴

Transparency

Official Journal

- In accordance with its commitment to establish or designate an official journal for publication of its trade-related laws, in March 2006 China released a notice instructing all central, provincial and local government entities to send copies of all of their trade-related measures to MOFCOM for immediate publication in the *MOFCOM Gazette*.
- **USTR, having monitored whether all government entities regularly publish their trade-related measures in the *MOFCOM Gazette* and whether all types of measures are being published, notes that observance of the State's Council's notice is far from complete.⁴⁵**

Public Comment

- China continued to improve its record in making new or revised laws available to the public in 2005 and 2006.
- The U.S. continued to supply assistance to improve Chinese government officials' appreciation of the workings and benefits of an open and transparent rulemaking process.
- **USTR notes the following deficiencies:**
 - **China continued to be inconsistent in complying with its basic notice-and-comment commitment.**
 - **China's deficiency in providing translation of its trade-related laws and regulations persisted.**

Enquiry Points

- USTR notes that U.S. companies have by and large found China's enquiry points (where any WTO member or foreign company or individual may obtain information) to be responsive, helpful and prompt. Some ministries and agencies have also set up websites to supply answers to frequently asked questions and other guidance.

⁴⁴ See USTR, *2006 Report to Congress on China's WTO Compliance*, at 96-100 (December 11, 2006).

⁴⁵ At the JCCT meeting in April 2006, it was noted that the "General Office of the State Council of the Chinese government has issued a notice requiring that all laws, regulations and other measures of all government ministries and agencies at all levels pertaining to or affecting trade in goods, services, TRIPS or the control of

9. Legal Framework⁴⁴

Uniform Application of Laws

- **USTR notes the following deficiencies:**
 - **The actual operation of China's internal review mechanism, established in 2002 to examine instances of non-uniform application of trade-related laws, remains unclear.**
 - **Some problems persist with the uniformity China's application, implementation and administration of its trade laws, regulations and other measures (reviewed in the sections on Customs, Taxation, Investment and Intellectual Property Rights).**

Judicial Review

- In 2005 and 2006, as in previous years, the U.S. continued to monitor the courts designated to handle administrative decisions related to international trade issues and intellectual property rights, but, so far, foreign companies have not had sufficient experience with these courts to provide much data.
- **USTR notes the following deficiencies:**
 - **Judges without little, and in some cases, no legal training (grandfathered in after China began requiring judges to be appointed on the basis of merit, education and experience) remain in the judiciary.**
 - **Concern about the independence of China's judiciary persists, with many U.S. companies observing that Chinese judges are often influenced by political, government or business pressures, particularly outside of China's big cities.**

C. U.S. INDUSTRY REPORTS ON CHINA'S WTO COMPLIANCE

In addition to the annual reports issued by USTR, various U.S. private sector groups also issue reports concerning China's WTO compliance efforts and deficiencies. This section reviews several of these reports.

foreign exchange shall be published in a single official journal, i.e. , the China Foreign Trade and Economic Cooperation Gazette, issued by the Ministry of Commerce." See The U.S.-China Joint Commission on Commerce and Trade (JCCT) Outcomes on U.S. Requests (April 11, 2006), http://www.ustr.gov/assets/Document_Library/Fact_Sheets/2006/asset_upload_file91_9286.pdf.

1. American Chamber of Commerce—PRC

In February 2006, the American Chamber of Commerce in China (AmCham) issued its *White Paper 2006: American Business in China* (2006 White Paper);⁴⁶ in April 2007, AmCham issued its *White Paper 2007: American Business in China* (2007 White Paper).⁴⁷ These reports cover a range of issues concerning the business climate in China, including the impact and implementation of China's WTO commitments.

Noting that 2007 is the last year of new WTO commitments for China, the 2006 White Paper generally indicates that China's efforts to comply with its WTO commitments have created significant inroads and a bright future for U.S. businesses in China:

This year's [annual Business Climate] survey confirms that not only have U.S. businesses been able to significantly expand the range of products and services provided to the domestic China market – by far the primary goal of U.S. business operating in China – they have expanded investment beyond China's first tier coastal cities and taken advantage of increasingly flexible investment structures.

* * *

There are very attractive opportunities for American businesses to access the China market, and our member companies, optimistic on the whole about prospects for continuing success, plan to increase investment in China.⁴⁸

At the same time, however, the 2006 White Paper observes that certain problems continued to plague China's regulatory regime in 2006, noting that, "The list of top-ranking

⁴⁶ American Chamber of Commerce-PRC, *2006 White Paper: American Business in China* (February 2006), available at <http://www.amcham-china.org.cn/amcham/show/content.php?Id=1570&menuid=&submid=>.

⁴⁷ American Chamber of Commerce-PRC, *2007 White Paper: American Business in China* (April 2007), available at <http://www.amcham-china.org.cn/amcham/show/content.php?Id=2361&menuid=&submid=>.

⁴⁸ 2006 White Paper at 6.

operating challenges – unclear regulations, bureaucracy, lack of transparency, and inconsistent regulatory interpretation – has remained the same since 1999, though members note signs of improvement.”⁴⁹

As with its 2006 White Paper, AmCham's 2007 White Paper notes the positive impact that China's WTO membership has had on U.S. interests:

China's entry in to the WTO has had an enormous positive benefit on American exports to China and the competitiveness of U.S. firms globally. Between 2002 and 2006, U.S. exports to China have grown two and a half times faster than U.S. exports to the rest of the world. In the last year, U.S. exports to China increased by a third. China has gone from being the ninth to the fourth largest export market for the United States. In 2006, U.S. exports grew 32 percent (USD55 billion versus USD41 billion for 2005). In 2001, following China's accession to the WTO, U.S. exports were USD19.1 billion, increasing almost threefold to USD55 billion in 2006.⁵⁰

However, the 2007 White Paper goes on to indicate that several problems remain with regard to China's implementation of its WTO commitments, and that while

The WTO road map transitioned much of the economy to market forces . . . the pattern of economic growth of the past 25 years is now widely judged unsustainable The problems include severe environmental degradation, inefficient use of scarce natural resources, poor capital allocation, an aging population, and growing regional income disparities.⁵¹

While indicating that China had made improvement in several areas in 2006, the 2007 White Paper noted several areas of concern, including the following:

CHINA'S COMPLIANCE WITH WTO COMMITMENTS AND OBLIGATIONS: 2005-2007 UPDATE
TRADE LAWYERS ADVISORY GROUP
SEPTEMBER 2007

AMCHAM-PRC 2007 WHITE PAPER	
Issue	Areas of Concern
Transparency	<p>“China’s lack of transparency is becoming more obvious as foreign participation shifts from export sectors to the broad domestic economy, and from major coastal cities to second-tier cities and inland areas. More than 40 percent of members surveyed recognize the lack of transparency as one of their top five business challenges in China. China still lacks one central repository for all published laws and regulations related to all commercial activities in China . . . the opportunity to comment is not established by law and the system lacks standard guidelines, including published time limits to offer comment.”⁵²</p>
Standards	<p>“China’s standards setting regime and its inherent lack of transparency are particularly opaque and troublesome for firms in a host of sectors, but are particularly so in sectors in which the U.S. is most competitive. Also of concern is the promotion of domestic technologies under the banner of ‘indigenous innovation.’ In this effort to support ‘indigenous innovation,’ the Chinese Government is promoting Chinese technical standards in ways that may create barriers to entry for foreign companies.”⁵³</p> <p>The 2007 White Paper notes six general areas of concern:</p> <ul style="list-style-type: none"> • Lack of interagency coordination on standards, conformity assessment and technical regulations; • Lack of transparency with respect to standards, conformity assessment and technical regulations; • Current requirements that most certification and testing for regulatory compliance be conducted in China by Chinese laboratories and certification bodies; • Lack of Chinese participation and investment in global standards processes; • Certain environment, health and safety related requirements are being conducted in an opaque fashion, potentially without provision of adequate details on technical requirements; • The convergence of IP and standardization policies, which could hamper U.S. efforts to protect patented technology in standardization processes and to compete in the Chinese market.⁵⁴
Intellectual Property Rights	<p>“Although it is clear more attention is being paid to IPR protection by the Chinese Government . . . the present level of activity of the Chinese Government, although substantial, is either not enough or is not of the right kind. From those companies which indicated IPR infringement as a problem, 40 percent said the volume of counterfeit of their products produced in China increased; 56 percent indicated it stayed the same; and only 4 percent indicated the volume of counterfeits decreased . . . material damage to China or global operations was felt by 70 percent of those companies where IPR was important to their business. . . . For those companies taking administrative action, over half of respondents felt the result would offer little or no deterrence to infringers. For counterfeiters in China, the risk of seizures, fines or damages resulting from counterfeit</p>

SEPTEMBER 2007

AMCHAM-PRC 2007 WHITE PAPER	
Issue	Areas of Concern
	<p>activities appears to remain relatively inconsequential and can be factored in as a cost of doing business.”⁵⁵</p> <p>“While the number of criminal cases in China is increasing, the level is still not high enough to mark a decrease in the level of infringements. Many attribute this to the structure of China’s legal system in which illegal activities must reach specific thresholds to be considered criminal; otherwise the matter is handled administratively without the threat of jail time. . . . In China . . . organizational restraints or lack of communication between agencies results in the IPR case usually being handled by only one agency. The infringer receives no punishment for many other laws or regulations being broken under the jurisdiction of other Chinese agencies.”⁵⁶</p> <p>“[I]n China, patent protection has been weak. Inventors and companies fear theft if they showcase their inventions through the public disclosure of patent application, thus leaving them unable to raise funds to develop products. In many cases when companies develop products, they find they cannot compete against competitors selling fake foreign products illegally at low prices.”⁵⁷</p> <p>The second draft of China’s revised Patent Law was completed on December 27, 2006. “Some previous revision which had strengthened the ability of the patent administrative department to enforce patents were weakened or removed.”⁵⁸</p> <p>“[T]he number of Web sites with illegal content in China is expanding.”⁵⁹</p>
Agriculture	<p>“Technical barriers to trade continue to stymie exports of certain agricultural products, while nontransparent trade rules create uncertainty for U.S. exporters and disadvantage imports. . . . [T]he lack of clarity in technical rules, and the introduction of new measures to regulate agricultural trade [may] provide China with the ability to selectively shut off imports.”⁶⁰</p> <p>China’s administration of its TRQs contravenes its WTO obligations in two ways: “The size of TRQ allocations for commodities such as corn are too small to be commercially viable . . . [and] the government does not publish a list of quota holders once the allocations have been made.”⁶¹</p>
Construction, Engineering and Design	<p>Some of the most troubling provisions of Decree 113 (governing construction activities) and of the Decree 114 Implementation Regulations (governing engineering and design</p>

AMCHAM-PRC 2007 WHITE PAPER	
Issue	Areas of Concern
	<p>activities) outlined in the 2007 White Paper include:</p> <ul style="list-style-type: none"> • Decree 113⁶² <ul style="list-style-type: none"> ○ “Excessive capitalization requirements (USD38 million for a Special Grade construction qualification, i.e. an unlimited qualification to undertake projects of all types and value) unnecessarily restrict construction investments. . . . [and] unlike international contractors under Decree 113, Chinese contractors are not limited to the restricted projects that [wholly foreign-owned enterprises] WFOEs are permitted to undertake.”⁶³ ○ “[T]he concerns mentioned in previous White Papers regarding market exclusions, personnel and experience requirements and upgrading of qualifications remain unresolved.”⁶⁴ • Decree 114⁶⁵ <ul style="list-style-type: none"> ○ “The cost of maintaining such a high percentage of foreign technical personnel [25 percent of total personnel for wholly foreign owned FIDEs and 12.5 percent for JV FIDEs; such personnel must be registered architects or registered engineers in China, and must also remain in China for at least six months per year under Decree 114] and getting them through the relevant Chinese registration process [as required by Decree 114] will not only significantly inflate the operating costs of the FIDE, but will also render the FIDE extremely uncompetitive when viewed against Chinese design institutes.”⁶⁶ ○ The Decree 114 Implementing Regulations (issued December 2006) mitigate the personnel percentage requirements by allowing FIDEs to temporarily hire Chinese registered architects or engineers to meet the percentage, and allow relaxation of the six-month residency requirement if necessary, but again, only temporarily.⁶⁷
Direct Selling	<p>“The nature of [China’s] direct selling regulations has raised serious concerns among international firms as to whether China has met its WTO commitments to allow direct sales in line with common international practices. . . . These concerns are: 1) requirements that direct selling companies establish a significant number of fixed locations as “service centers” in each urban district where direct sellers sell products, which would require 2861 service centers to cover all urban China districts; and 2) drastic limitations on direct sellers’ commissions. . . . At the time of [the 2007 White Paper’s] writing, the Ministry of Commerce (MOFCOM) has only approved 15 direct selling license applications since the Regulations [on the Administration of Direct Selling (Regulations)] were announced. Regulations indicate a 90-day approval process, yet the application period for the 15 companies that have been approved took from 4-11 months</p>

AMCHAM-PRC 2007 WHITE PAPER	
Issue	Areas of Concern
	<p>to get MOFCOM approval and most have yet to obtain subsequent State Administration of Industry and Commerce (SAIC) approval necessary to begin operating direct sales. Over 20 other companies that applied in early 2006 are still waiting for approval with little clarity on timing or what needs to be done to complete the process.”⁶⁸</p> <p>“The Regulations require that the direct selling company shall ensure their direct sellers can sell products only within the areas where service centers in the approved provinces have been established. However, only three of the 15 companies received approval by MOFCOM to conduct direct sales in more than one province in China, which significantly restricts the ability to economically expand their business. More importantly, since direct selling takes place away from fixed locations, these geographical restrictions make it extremely difficult, if not impossible, for companies to ensure that their direct sellers are in compliance.”⁶⁹</p> <p>“The Regulations drastically restrict the ways that direct selling companies can compensate their sales force. Contrary to most industry practice, direct sellers are not allowed to develop networks of sellers. In addition, there is a cap [applying to all income, including commissions, bonuses, rewards, etc.] limiting the amount of compensation based on personal sales revenue to 30 percent that inhibits direct selling companies from sufficiently motivating their sales representatives. . . . [and] putting direct selling companies in China at a great disadvantage relative to businesses using other distribution channels.”⁷⁰</p>
Banking	<p>“Although [China’s WTO commitments] have been met, material barriers to market access, domestic market development, and global integration remain that thwart efforts to improve the efficiency of capital allocation and the quality of economic growth. In particular, new banking regulations require considerable capital commitments and thus prevent all but the biggest banks from registering locally. These standards have de facto made it difficult for well-managed, reputable, but medium-sized banks to enter the market.”⁷¹</p>
Non-bank Financial Institutions	<p>“In areas such as factoring, leasing, auto financing, finance companies, and SME lending, regulations are unclear and, in some cases, continue to deny access to foreign participants.”⁷²</p>
Insurance	<p>“AmCham continues to be concerned . . . that its insurance company members, whose products cover a broad spectrum of the insurance industry, are being denied national</p>

⁶⁸ *Id.* at 82.

⁷⁰ *Id.* at 84.

⁷¹ *Id.* at 88.

⁷² *Id.* at 90.

AMCHAM-PRC 2007 WHITE PAPER	
Issue	Areas of Concern
	<p>treatment in a variety of ways and the opportunity to fully participate in the growth of the industry.”⁷³</p> <p>“AmCham members continue to experience difficulties and long delays in securing approval for their conversion to subsidiaries. . . . The delayed approval on conversion [of foreign branches to subsidiaries] will not only reduce the ability of foreign companies to contribute to China’s P&C market, but most crucially it undermines China’s commitment to honor its WTO obligations by opening the insurance and other financial sectors.”⁷⁴</p>
Transportation and Logistics	<p>“Joint ventures and wholly owned foreign enterprises (WFOEs) in the logistics industry face overly high registered capital requirements compared to international practices. Although a recent circular has repealed the USD5 million registered capital requirement, approval authorities still insist foreign-invested logistic companies meet the condition. Such requirements present a barrier to market entry and expansion for joint ventures and WFOEs operating in China. Because such regulations do not apply to domestic enterprises, AmCham is concerned that they violate China’s national treatment commitment under its WTO agreement. This creates an uneven playing field for foreign-invested companies.”⁷⁵</p> <p>“Foreign-invested logistics companies are not qualified to apply for the class A/B Forwarder licenses. According to the <i>China Air Freight Forwarding Sales Agency Certificate Application Guide</i>, published in March 2006, only joint ventures are qualified to apply for [a] class A/B sales agency certificate. This is a regulatory barrier not in line with China’s national treatment commitments under its WTO agreement.”⁷⁶</p>

With an eye toward ensuring that China continues to increase access to its markets in its post phase-in period under the WTO, the 2007 White Paper recommends, among other things, that the U.S. continue to insist on China’s compliance with its WTO commitments, particularly in key areas such as transparency, standards, market access and IPR protection.⁷⁷

2. U.S. Chamber of Commerce

In September 2006, the U.S. Chamber of Commerce (U.S. Chamber) issued a report assessing China's WTO compliance within the broader context of market access and treatment of the U.S. Chamber's membership within China.⁷⁸ Like its previous annual reports, the 2006 report notes "a steadily improving bilateral trade relationship and an overall positive trend in China's moves to liberalize its markets,"⁷⁹ and that "the bilateral economic relationship represents a significant net positive factor for each country."⁸⁰ However, the report also highlights several areas in which China has not yet fully met its WTO commitments, and states that

China's leaders currently face a choice: either to narrowly interpret WTO commitments and maximize the use of government intervention to protect and nurture Chinese industries, or to apply the letter and spirit of the WTO and recommit to the broadest possible use of markets to drive innovation, job creation, and economic growth.

* * *

"China needs to demonstrate its credentials as a constructive member of the global economy by promptly and fully implementing its WTO commitments and ensuring full market access. * * * Moreover, as China concludes its phase-in period for WTO implementation, it should expand market access that underlies and begins to go beyond the letter and spirit of its WTO commitments. The U.S. business community viewed China's WTO access [sic] as a floor, not a ceiling, for continued progress."⁸¹

⁷⁸ U.S. Chamber of Commerce, *China's WTO Implementation and Other Issues of Importance to American Business in the U.S.-China Commercial Relationship* (September 2006) (*U.S. Chamber 2006 Report*), available at http://www.uschamber.com/assets/international/china_wto_rdc0609.pdf.

⁷⁹ U.S. Chamber 2006 Report at 59.

⁸⁰ *Id.* at 3.

⁸¹ *Id.* at 6.

Particular areas of concern to the U.S. Chamber are identified in the tables below regarding cross-sectoral issues and sectoral issues. In addition to these areas of concern, the U.S. Chamber's 2006 report points to endemic problems with transparency and overly burdensome requirements (*e.g.*, unclear regulations, excessive bureaucracy, lack of transparency, and inconsistent regulatory interpretation) which contravene China's WTO's commitments, and violate the principles of non-discrimination and national treatment.⁸²

U.S. Chamber 2006 Report
Cross-Sectoral Issues
<p><i>Intellectual Property Rights</i></p> <p>The report notes that China's failures in protection and enforcement of IPR remain its most serious deficiencies with respect to fulfillment of its WTO commitments. According to the report, "not only has the IPR situation not significantly improved for the Chambers members, but "if anything, the climate has worsened, as more and more small- and medium-sized enterprises ... complain of the dramatic impact of counterfeits on their businesses worldwide."⁸³</p> <p>"There have been some positive developments since the publication of the [2006] Action Plan [on IPR protection], including a recent crackdown on copyright policy at the retail level, the issuance of regulations on the protection of copyright works on the Internet, regulations intended to promote the transfer of administrative enforcement cases to the police, and regulations on the protection of IP at trade exhibitions."⁸⁴</p> <p>The report urges "China's leadership [to] take bolder and more effective measures to generate tangible results that will lead to true deterrence and a substantial decrease in IPR infringement, with particular attention to the level of trademark counterfeiting and copyright policy. This will require allocation of substantially greater enforcement resources at the local level—particularly in hotspots such as Guangzhou and Shenzhen—improved laws and regulations, careful implementation of enforcement action plans, plans, coordination and accountability among IPR enforcement agencies, and a substantially higher level of transparency regarding the government's enforcement activities."⁸⁵</p>
<p><i>Industrial Policy</i></p> <p>China's use of industrial policies to foster development of strategic sectors could erect market access barriers to U.S. companies and undermine legal protections for foreign technologies. China has been</p>

⁸³ *Id.* at 15.

⁸⁴ *Id.* at 15.

⁸⁵ *Id.* at 20.

U.S. Chamber 2006 Report
Cross-Sectoral Issues
<p>drafting provisions which could adversely affect U.S. businesses in a wide array of areas, including antitrust law, patent law reform, subsidies, government procurement, price controls (especially in health care), backdoor local content requirements, restrictions on foreign investment, unnecessary and unmanageable capitalization requirements, capital controls and standards policy.⁸⁶</p> <p>China's proposed Anti-Monopoly Law (AML) may be problematic: Chinese officials have made statements that indicate that the AML will target multinational companies in China that occupy market positions desired by favored domestic companies. Both the Chinese public and many government officials seem to misinterpret what the appropriate aims of the AML should be, presuming that companies which have significant market share and/or robust portfolios have violated or are likely to violate the AML. The AML also contains provisions that may negatively impact U.S. companies (<i>e.g.</i>, rigid numeric thresholds for establishing dominance and proscription of selling or buying products at "unfairly" high/low prices or refusing to trade "without justification"). Moreover, the AML's treatment of IPR is ambiguous, leaving room for potential abuses of discretion in punishing foreign investors.⁸⁷</p> <p>China's State Intellectual Property Office (SIPO) has proposed amendments to China's patent law, some of which seem to have been crafted to enhance overall product quality, to bolster the operation and efficacy of China's patent system and to harmonize the system with international norms. Certain proposed revisions, however, could potentially hamper innovation and trade by undermining inventors' ability to acquire and enforce patents on novel, useful and non-obvious innovations.⁸⁸</p>
<p><i>Subsidies</i></p> <p>The report notes that China submitted its first subsidies notification four years behind schedule, and that the notification was incomplete.⁸⁹</p> <p>"While we may sympathize with the difficulty China faces in identifying such subsidies, the continued failure of China to produce information in this area is a very serious deficiency and a clear violation of China's commitments to the WTO."⁹⁰</p> <p>The report also observes that the rapid expansion of China's steel industry raises questions about China's support for the industry's growth.⁹¹</p>
<p><i>Government Procurement</i></p> <p>The report notes that while China has taken steps to enhance transparency, curtail corruption and eliminate local protectionism, it has also limited foreign companies' access to government procurement.⁹²</p>

⁸⁶ *Id.* at 23-24.

⁸⁷ *Id.* at 24-25.

⁸⁸ *Id.* at 26.

⁸⁹ *Id.* at 26.

⁹¹ *Id.*

U.S. Chamber 2006 Report
Cross-Sectoral Issues
<p>The report urges China to fulfill its promise to begin negotiations for membership in the Government Procurement Agreement (GPA), and to revise its government procurement regime in accordance with the principles of the GPA.⁹³</p> <p>The report notes its apprehension regarding the possible precedent-setting significance of China's stated preference for WAPI in government procurement. In addition, the report observes that China made three "urgent" (and therefore not requiring the normal comment period) notifications to the WTO regarding its WAPI Notice; China's intentions behind its WAPI Notice and its filing of these notifications are unclear.⁹⁴</p>
<p><i>Standards</i></p> <p>The U.S. Chamber "is encouraged that China has recently become more deeply engaged in international standards-setting bodies and introduced various standardization system reforms."⁹⁵</p> <p>However, the report highlights several troubling practices on the part of the Chinese government that indicate it might attempt to use standards policies in a protectionist and discriminatory manner:</p> <ul style="list-style-type: none">• The implementation of national standards that deviate from existing, widely adopted international standards;• The creation of technology standards in instances where voluntary, market-based standards would be more suitable and would be less likely to pose barriers to trade; and• The adoption of policies that would compel holders of essential patents to license their technologies under low-cost or royalty-free terms, engendering a <i>de facto</i> technology transfer requirement in certain cases in potential contravention of TRIPS Articles 30 and 31.• The <i>11th Five-Year Plan</i> promotes the idea of "self-reliant innovation" with an eye toward increasing domestic research and development, and decreasing reliance on foreign technologies.⁹⁶ <p>China applies, or is seeking to apply, divergent standards to products and services in several industries, including telecommunications, recording media, automotives, distilled spirits and information technology.⁹⁷</p>
<p><i>Distribution, Direct Selling and Franchising Services</i></p> <p><u>Distribution Services</u></p> <p>"In the last year, the Chinese government has implemented improvements in the distribution license application and approval process, including resolution of outstanding tax and customs issues." In addition, MOFCOM has directed local commercial bureaus to start processing the backlog of applications.⁹⁸</p>

⁹⁸ *Id.* at 33.

U.S. Chamber 2006 Report

Cross-Sectoral Issues

The U.S. Chamber notes that despite these improvements, product service restrictions and inconsistent national treatment still riddle China's distribution services licensing process.⁹⁹

The report highlights the following problems:

- Provisions in the April 2004 regulations that permit local approving authorities to refrain from granting wholesale distribution licenses in cities that have not yet devised urban commercial network plans (which most cities have not done) may act as *de facto* constraints on foreign wholesalers.¹⁰⁰
- Article 18 of the *Measures for the Administration on Foreign Investment in the Commercial Sector* limits the capital contribution of a foreign investor in a JV retailer to 49 percent if the JV retailer opens more than thirty stores in China and sells particular commodities (including books, magazines, pharmaceuticals, chemical fertilizers, processed oils, sugar, cotton, tobacco, CDs and DVDs, among others). These restrictions do not apply to domestic retailers and disadvantage U.S. businesses.¹⁰¹
- Though China's laws impose reasonable minimum registered capital requirements on foreign investors in distribution services (approximately \$60,000 for wholesalers and approximately \$36,000 for retailers), MOFCOM typically asks U.S. retailers to increase their registered capital in amounts ranging from \$1 million to \$2.1 million each time they apply for a new outlet. Domestic retailers are not subject to any such provision or practice.¹⁰²

Direct Sales

China's implementing regulations for direct sales do not meet international standards and are inconsistent with China's WTO commitments.

- Volume bonuses and fees for other services are prohibited by provisions barring companies from paying distributors commissions greater than thirty percent of their individual retail sales; no other sector involving commercial sales is subject to such a provision.
- The new chain selling regulation effectively prohibits traditional multi-level marketing plans that are allowed in nearly 170 countries and that are fundamental to the compensation arrangements of over ninety percent of direct sales companies around the world.
- The current direct selling licensing system is not transparent.¹⁰³

Franchising Services

Measures governing franchises contain disconcerting provisions, some of which needlessly constrain the traditional franchising model (*i.e.*, one such provision mandates that franchisers must own and operate at least two units in China for one year prior to offering franchises in China), and some of which are ambiguous.¹⁰⁴

Conformity Assessment

The U.S. Chamber notes that China has not granted accreditation to any foreign-invested conformity

⁹⁹ *Id.* at 33-34.

Cross-Sectoral Issues

assessment bodies, so exporters often must have their products tested in a Chinese lab when the products have already been tested elsewhere. Chinese agencies also have overlapping, duplicative testing requirements that increase costs and delays for imported products, particularly for radio and telecommunications equipment, medical equipment and automobiles.¹⁰⁵

Investment Restrictions

The U.S. Chamber notes that China has issued an assortment of decrees that place onerous restrictions on foreign investors (*e.g.*, requiring foreign companies with roughly \$100 million in sales in China to advise Chinese authorities of proposed mergers, restricting foreign acquisition of certain manufacturing companies, and discouraging foreign involvement in China's emerging industries). The U.S. Chamber further observes that, "These provisions are in addition to the longstanding barriers to entry created through unreasonable high capitalization requirements (notably in the financial services industry), restrictions on the legal form through which companies can operate in China, and unwieldy geographic operating restrictions."¹⁰⁶

Several U.S. Chamber members report that heightened government scrutiny has disrupted their transactions.¹⁰⁷

"In a range of sectors, from automotive to financial services and energy, to telecommunications and postal services, China appears to be accelerating the implementation of barriers to investment by foreign entities.... These restrictions, which will only retard the growth and development of the Chinese economy, are increasingly seen as monopolistic tools by industrial planners to shield inefficient or monopolistic enterprises from competition.... The broad application of investment barriers under such auspices—including increasing restrictions on foreign acquisitions of Chinese companies—is a deeply worrisome trend and stands counter to the market-oriented principles that have been the basis for much of China's economic success over the past few decades."¹⁰⁸

Customs

The U.S. Chamber notes that customs clearance procedures are inefficient and inconsistent, with both systems and fees varying from port to port. Moreover, customs clearance operations have limited hours and erratic customs Electronic Data Interchange systems that trigger considerable delays when they crash (and are run by e-ports and private firms which charge exorbitant fees for their services).¹⁰⁹

¹⁰⁶ *Id.* at 37.

¹⁰⁷ *Id.* at 37.

¹⁰⁸ *Id.* at 10.

¹⁰⁹ *Id.* at 38.

U.S. Chamber 2006 Report

Sectoral Issues

Agriculture

China continues to apply non-transparent sanitary and phytosanitary measures that have no scientific justification and add risk premiums to the imported market price of agricultural products. One such measure is Decree 73, which requires the inclusion of Chinese quarantine requirements as a contract term in all contracts for the importation of soybeans and other products subject to the quarantine entry process. This could shift all of the economic risk of compliance with Chinese quarantine and food safety requirements to the exporter, and could also lead to government-sanctioned defaults on agricultural products contracts.¹¹⁰

The U.S. Chamber notes its concern about China's use of its automatic licensing policy to discriminate against foreign enterprises by issuing licenses only to domestic companies.¹¹¹

The U.S. Chamber observes that China has not yet opened its market to U.S. beef, and that China's insistence on further technical discussions on BSE, as well as its possible issuance of new sanitary and phytosanitary measures, may stymie progress in this area.¹¹²

Intellectual property theft remains a significant problem in the agricultural-chemical industry, with one industry federation estimating that up to thirty percent of agricultural-chemical products sold in some areas of China are counterfeit (and some of those products are exported).¹¹³

On a positive note, the U.S. Chamber observes that China's demand for corn has increased, and that corn could become an important market for U.S. exporters.¹¹⁴

Audiovisual Products

The U.S. Chamber notes that "In addition to the lax enforcement of IPR, market access barriers inhibit providers from building a legitimate audiovisual (AV) market; foreign-owned companies are not allowed to hold a majority share of distribution companies, and are completely forbidden from publishing AV products."¹¹⁵ Also, China bars foreign-controlled retailers from acquiring retail AV licenses, precluding U.S. companies from selling legitimate DVD products in important foreign-controlled hypermarkets.¹¹⁶

"In contrast to the difficulties in selling legitimate AV products, there is little government intervention to prevent the plethora of illegal DVD stores openly selling pirated goods."¹¹⁷ Moreover, if retailers,

U.S. Chamber 2006 Report
Sectoral Issues
<p>distributors or manufacturers are caught, the artificially high criminal thresholds often prevent prosecution.¹¹⁸</p> <p>Copyright violators also take advantage of China's film import quotas, distribution duopoly and release delays for distribution of approved films, filling the resulting void with illegal products.¹¹⁹</p> <p>China has recently instituted a moratorium on the showing of foreign films in order to bolster its domestic film industry, thereby distorting the market and increasing demand for pirated versions of foreign films.¹²⁰</p> <p>China also inhibits U.S. participation in its broadcasting sector by limiting the amount of foreign programming permitted and the number of outlets available for foreign programming.¹²¹</p>
<p><i>Automotive</i></p> <p>The U.S. Chamber notes that China has complied with several of its fundamental WTO commitments in the automotive sector by lowering tariffs, starting to develop the process of permitting wholly foreign-owned vehicle distribution outlets, and easing restrictions on the creation of auto financing entities.¹²²</p> <p>However, the U.S. Chamber observes that China has strengthened discriminatory provisions in its laws that discourage the importation of auto parts and encourage the use of domestic technology. In July 2006, China lifted some portions of these measures until 2008.¹²³</p> <p>The report notes that, as in other sectors, IPR violations represent a significant and increasing challenge for U.S. businesses, particularly at the local level, despite China's efforts to strengthen its IPR laws and fines.¹²⁴</p> <p>As noted above under "Standards," China continues to apply new and unique automotive standards for its marketplace. This practice is not only injurious to U.S. auto businesses by adding extra burdens, but compromises China's health and safety directives, hampers efforts to harmonize global auto standards, and keeps China from fully integrating in the global automotive industry.¹²⁵</p>
<p><i>Aviation</i></p> <p>Though China did not commit to liberalize its aviation services sector, it has made considerable progress in opening its market to U.S. carriers. However, the U.S. Chamber observes that China's aviation</p>

U.S. Chamber 2006 Report
Sectoral Issues
<p>services sector remains lacking in key areas:</p> <ul style="list-style-type: none">• Technical management techniques are expensive and inefficient;• In contravention of the spirit of China's WTO commitments, China maintains restrictions on direct hiring. Current laws require foreign airlines to go through the Foreign Airlines Service Corporation (FASCO) for assignment of personnel, limit employment contracts to two year fixed terms (with extension options), and require foreign airlines to pay employees through FASCO, without knowing what portion of the wages are passed on to the employees. This puts foreign carriers in the untenable position of deciding between paying excessive fees to renew contracts of trained employees, or investing in the hiring and training of new employees every two years.¹²⁶ <p>The U.S. Chamber urges China to allow U.S. carriers to take part in airport and aviation fee development, which would increase transparency and understanding of the fees and the rationale underlying them.¹²⁷</p>
<p><i>Energy</i></p> <p>China maintains a number of market access barriers in its oil sector, despite having made some progress in liberalizing it. These barriers include:</p> <ul style="list-style-type: none">• Restrictions on trade in crude oil and petroleum products by foreign investors;• Specific requirements for wharf size and product capacity that impede non-state traders importation of petroleum products; and• Stringent regulatory controls on foreign investment in wholesale and retail undertakings (e.g., one provision requires a Chinese JV partner to establish more than 30 retail stations).¹²⁸ <p>In addition, newly proposed regulations may violate China's commitment to remove all restrictions on foreign participation in the processed and crude oil products market by December 11, 2006. These regulations put forward high thresholds for foreign entrants, and are vague with regard to the issue of whether supply contracts with state-owned enterprises will be necessary, or if wholly foreign-owned investment will be allowed.¹²⁹</p>
<p><i>Express Delivery Services</i></p> <p>Despite having committed to unlimited market access outside of China Post's monopoly for foreign international and domestic courier services, and having pledged to not rescind the liberal market-access rights it had already granted to express delivery service (EDS) suppliers, China has repeatedly attempted to constrain foreign involvement in its EDS business. The U.S. Chamber enumerates some of the regressive steps China has taken in this regard, including:</p> <ul style="list-style-type: none">• Requiring foreign EDS suppliers to submit entrustment applications to China Post that are granted for limited time periods and have not been recorded at the local level, thereby requiring duplicative entrustment applications and limiting market access;• Constraining wholly foreign-owned enterprises' ability to provide the complete range of international freight forwarding;

<ul style="list-style-type: none">• Drafting revisions to China's postal law, not submitted for public comment, that purportedly would<ul style="list-style-type: none">○ Create a new licensing system in addition to entrustment;○ Narrowly define "express delivery services" contrary to its WTO commitments;○ Incorporate national treatment violations for domestic delivery services,○ Confer new inspection and enforcement powers upon a state postal regulatory authority without government oversight;○ Grant China Post a letter delivery monopoly (with two exceptions: international express letter delivery, and letters and certain official documents of more than 150 grams; the second exception is not available to foreign-invested enterprises);○ Subject mergers and acquisitions of the China operations of EDS companies to review and approval by the State Postal Bureau (SPB);○ Require EDS companies (except for China Post) to pay a tax to the Universal Postal Service Fund, which China Post may use to subsidize its own EDS; and○ Confer several other competitive advantages upon state-owned EDS providers.¹³⁰
<p><i>Freight Forwarding and Logistical Services</i></p> <p>China issued revised international freight forwarding (IFF) rules on December 1, 2005, that implement China's pledge to permit complete foreign ownership of IFF enterprises.¹³¹ However, China's Civil Aviation Administration (CAAC) issued regulations that preclude wholly-foreign owned IFF enterprises from providing the full range of IFF services by denying them the Air Freight Sales Agency Licenses necessary to book cargo on both international and domestic flights.¹³²</p>
<p><i>Financial Services</i></p> <p>The U.S. Chamber notes that "Chinese households have access to very few financial services, have few options for investment, and because their funds have to be placed with the state banks, have very low returns on their savings."¹³³</p> <p>China has made progress toward meeting its WTO commitments regarding the financial services sectors, including opening its health, group and pension/annuity insurance markets to foreign providers, removing geographic restriction on the banking sector on or before its commitment dates, enhancing transparency and streamlining its licensing processes (though some national treatment concerns remain with regard to licensing procedures).¹³⁴</p> <p>China obstructs market access for foreign securities firms. Regulatory restrictions provide for foreign investment in foreign securities firms in two ways: through minority ownership (33%) in JVs with</p>

U.S. Chamber 2006 Report

Sectoral Issues

limited licenses or minority ownership (25%), along with legally shaky management control, in restructured securities companies. Both methods are suboptimal for foreign investing institutions.¹³⁵

With respect to the banking and securities sector, the U.S. Chamber urges China to:

- Allow full ownership for foreign financial services firms;
- Permit foreign financial services firms to provide cross-border services;
- Increase transparency in the regulatory regime;
- Allow foreign banks to open more than one branch per year;
- Eliminate the current twenty percent cap on foreign investment in Chinese banks;
- Remove all non-prudential criteria that constrain ownership, operation, or juridical form of foreign financial enterprises; and
- Permit U.S. financial firms to own 100 percent of the equity in Chinese security firms.¹³⁶

In the insurance sector, the U.S. Chamber notes that while China removed some geographic restrictions and most business scope restrictions, concerns remain in several areas:

- Restrictions on juridical form (branch, subsidiary or JV) of foreign insurance companies;
- Limitations on ownership of investment;
- National treatment shortcomings, particularly with regard to:
 - China's practice of granting foreign firm branch approvals on a consecutive basis while granting domestic branch approvals concurrently; and
 - Reinsurance regulations that require right of first refusal for domestic reinsurers for 50 percent of each primary company's reinsurance program and solicitation of reinsurance from two domestic insurers, bar direct insurers from reinsuring more than eighty percent of a single risk, and require direct insurers to obtain approval from the China Insurance Regulatory Commission (CIRC) for reinsuring with affiliates; and
- Transparency deficiencies in insurance regulatory processes.¹³⁷

The U.S. Chamber urges China to remedy not only the above deficiencies, but also to expand its newly established private pension industry, amend tax laws to allow employers to make tax-deductible contributions to employees' pension plans and permit tax deferrals for individuals who contribute to their own pension accounts, and continue to lift geographic and business scope restrictions on foreign insurance companies.¹³⁸

Medical Technology

The U.S. Chamber notes several deficiencies in China's medical technology sector:

- Chinese regulatory agencies' persistent prejudicial treatment of U.S. exporters of medical devices;
- A proposed medical technology monitoring system that would impose price controls and profit-making restrictions;
- Opaque and redundant product testing and re-registration procedures that are superfluous and costly, and that limit market access; and
- State Council opinions that call for increased financial support for domestic industries, heightened

scrutiny of foreign mergers and acquisitions, and increased tariffs on imported goods. ¹³⁹
<p><i>Pharmaceuticals</i></p> <p>The U.S. Chamber highlights a number of areas of concern regarding China's pharmaceuticals sector, including:</p> <ul style="list-style-type: none">• Limits on U.S. industry's commercial opportunities and restrictions on patient access to new medicines due to fundamental flaws in China's health care system;• A growing market for counterfeit pharmaceuticals, and a criminal supplier network that has grown more and more elaborate and experienced (though the U.S. Chamber welcomes the recent approval of the Shanghai Initiative, which grants police agencies the power to decide on their own whether to initiate criminal investigations when given leads on counterfeiting activities);• Increasing use of price cuts to address burgeoning health care costs, a short term solution which could potentially smother the introduction of new pharmaceuticals to the Chinese market;• Lack of transparency in pricing, regulatory and IPR policies;• Duplicative approval requirements for foreign products;• An unreasonably high threshold for criminal IPR prosecution that a counterfeit drug must "be harmful enough to endanger human health;" and• Current IPR regulations' failure to prohibit the direct or indirect supplying of bulk active pharmaceutical ingredients to drug counterfeiters, and lack of procedural precautions requiring licensing and certification of chemical manufacturers to make, sell, distribute and export active pharmaceutical ingredients.¹⁴⁰
<p><i>Publications</i></p> <p>The U.S. Chamber notes that China has failed to meet fully its commitment to permit foreign-invested enterprises in China to import and distribute foreign books, newspapers and magazines (scheduled to be met by 2004). While China has indicated that foreign businesses may distribute publications in China, it retains measures that restrict the distribution of imported publications to certain state-owned enterprises, without justification.¹⁴¹</p>
<p><i>Sound Recordings</i></p> <p>The U.S. Chamber indicates that inadequate IPR enforcement and the erection of considerable market access barriers have helped foster an environment very conducive to IPR infringements in the recording industry in China, citing an estimate that the U.S. recording industry lost over \$200 million in 2005 to pirate sales in China.¹⁴²</p> <p>These market access barriers include:</p> <ul style="list-style-type: none">• Curtailment of U.S. record companies' activities in China by preventing them from (1) holding majority ownership in their investments, (2) developing talent, and (3) expediting the delivery of their legitimate products to the market;

<ul style="list-style-type: none">• Inconsistencies in the censorship clearance process which disadvantage foreign producers (<i>e.g.</i>, foreign product is subject to Chinese government censorship while domestic producers may “self-censor”);• Criminal penalties insufficient to deter IPR violators, and too few investigations of IPR violations; and• Inadequate protection of electronic data, which could be improved through speedy implementation of the WIPO Internet treaties.¹⁴³
<p><i>Telecommunications Services</i></p> <p>While noting that China agreed to consider reducing its extremely high capitalization requirements for basic telecommunications licenses, the U.S. Chamber also observes that China has taken few steps in this regard, and that overall China continues to maintain barriers to market entry in the telecommunications sector.¹⁴⁴</p> <p>These market access barriers include:</p> <ul style="list-style-type: none">• A requirement that foreign entities wishing to participate in China’s telecommunications market must enter into JVs with one of the existing state-owned telecommunications carriers;• The aforementioned high capitalization requirements for basic service licenses;• The abnormally limited scope of permissible services under a value-added services license;• The unduly lengthy and complex license application process;• Limits on foreign investment in a telecom licensee; and• Lack of transparency and legal stability in the current telecom laws.¹⁴⁵

3. US-China Business Council

The US-China Business Council (USCBC) compiled, for 2005 and 2006, a WTO Scorecard covering a number of China’s services commitments (USCBC Scorecard).¹⁴⁶ The USCBC reported the following regarding successes and failures of China’s compliance with certain services commitments.

¹⁴³ *Id.* at 55-56.

¹⁴⁴ *Id.* at 56.

¹⁴⁵ *Id.* at 56-58.

¹⁴⁶ See US-China Business Council, *China’s WTO Commitments, 2005-06* (September 14, 2006), available at <http://www.uschina.org/public/documents/2006/09/china-wto-commitment-scorecard.pdf>.

2005

Advertising:

- China had met its commitment to open advertising services to wholly-owned foreign-owned enterprises (WFOEs)¹⁴⁷

Banking:

- China met its commitment to open local currency business to foreign financial institutions in Ningbo and Shantou by December 2005; China in fact exceeded the commitment by opening up in five additional cities.

Insurance:

- China met its commitment to (1) eliminate compulsory cession requirements for foreign non-life insurers, and (2) reduce foreign insurers' total asset requirement from \$300 million to \$200 million by December 2005.

Other:

- China opened courier services to WFOEs, but still imposed business scope limitations at odds with its WTO commitment.
- China opened technical testing services to WFOEs, but still imposed business scope limitations.
- China opened freight inspection services to WFOEs, but companies had problems obtaining licenses.
- China opened hotel and restaurant services to WFOEs.
- China opened freight forwarding agency services to WFOEs by issuing in December 2005 *Administrative Measures on Foreign Investment in International Freight Forwarding Agency Services*. However, China's Civil Aviation Authority thereafter issued regulations that limited foreign companies' ability to book space for air cargo.

2006

Architectural, Engineering and Urban Planning Services:

- China opened urban planning services to WFOEs, effective May 1, 2003.¹⁴⁸
- China issued draft measures to open engineering, integrated engineering and architecture services to WFOEs, but final measures had not been issued.¹⁴⁹

¹⁴⁷ See PRC State Administration of Industry and Commerce and PRC Ministry of Commerce, *Management Rules on Foreign-Invested Advertising Companies* (issued March 2004, effective December 10, 2005).

¹⁴⁸ See PRC Ministry of Foreign Trade and Economic Cooperation and PRC Ministry of Construction, *Regulation and Management of Foreign-Invested Urban Planning Services* (issued February 2003, effective May 1, 2003).

Banking:

- China committed to: (1) eliminate geographic limitations on local currency business for foreign financial institutions, (2) permit foreign financial institutions to offer services to all Chinese clients, and (3) eliminate all non-prudential measures limiting ownership, operation and juridical form of foreign financial institutions. China's CBRC issued in August 2006 a draft proposal to require foreign banks to set up Chinese-incorporated subsidiaries to benefit from these openings. CBRC was to issue detailed rules in November 2006.¹⁵⁰

Distribution and Retail:

- China committed to open distribution of chemical fertilizers, processed oil and crude oil to joint venture and WFOE wholesalers and commission agents. China issued draft regulations applicable to WFOEs but the regulations could limit business scope.¹⁵¹
- China committed to open retail sale of chemical fertilizers to WFOE retailers with thirty or fewer outlets. China apparently had not yet issued draft regulations to accomplish this commitment.
- China committed to open retail sale of motor vehicles to foreign majority-owned chain retailers with over thirty outlets. China apparently had not yet issued draft regulations to accomplish this commitment.

Insurance:

- China committed to open reinsurance, large scale commercial risk insurance, international marine, aviation and transportation insurance and reinsurance to WFOEs. CIRC issued regulations (effective December 2005) to open up some types of reinsurance to WFOEs but the regulations failed to address all aspects of China's commitment.

Telecom:

- China committed to (1) eliminate geographic restrictions on mobile voice and data services for foreign joint ventures, and (2) increase the geographic scope of domestic and international telecom services to include 13 new areas, and (3) to

¹⁴⁹ See PRC Ministry of Commerce, *Draft Administrative Measures on Foreign-Invested Construction and Engineering Service Enterprises* (released October 2005). A press release by the U.S. Treasury Department indicates that, with respect to construction and engineering services: "In March [2007], China issued implementing regulations that relaxed residency requirements, allowing regulators to recognize the foreign qualifications of license applications of technical experts." See U.S. Treasury press release HP-419: *Developments Since the First Meeting of the Strategic Economic Dialogue in December 2006* (May 23, 2007); available at <http://www/treasury.gov/press/releases/hp419.htm>.

¹⁵⁰ See China Banking Regulatory Commission, *Regulations for the Administration of Foreign-Funded Banks* (November 2006).

¹⁵¹ See *Draft Measures on the Wholesale Distribution of Crude Oil and Processed Oil* (December 2006).

increase the foreign ownership cap to 35%. China apparently had not yet issued draft regulations to accomplish these commitments.

4. National Association of Manufacturers

The National Association of Manufacturers (NAM) issued its “Review of China’s Compliance with its WTO Commitments” (NAM 2006 Report) on September 18, 2006.¹⁵² Quoting one representative of a major U.S. company who asserted that China “is our most important foreign market—period,”¹⁵³ NAM also noted that

[M]anufacturers currently exporting to China or interested in entering the market have expressed concern about the difficulty of overcoming trade barriers, many of which appear to be inconsistent with China’s WTO obligations. . . . [M]any import-competing U.S. manufacturers . . . believe that China’s trade and financial policies, including its currency exchange rate policy, put them at an unfair disadvantage and caused a substantial loss of sales in the United States. Manufacturers in the metal-making and fabrication sectors . . . appear to be especially affected. U.S. steel producers, in particular, are concerned that China’s rapid development of its own steel industry will eventually lead to a flood of cheap imports in the United States. For U.S. manufacturers, then, trade with China presents a very mixed picture—major new trade opportunities in a rapidly growing market and more intensive competition from Chinese-made products and outsourcing by U.S. manufacturers to take advantage of lower manufacturing costs in China.¹⁵⁴

The NAM 2006 Report highlights five key areas of concern with China’s WTO compliance: “currency undervaluation; counterfeiting and piracy; industrial policy and the VAT

¹⁵² The National Association of Manufacturers, *Review of China’s Compliance with its WTO Commitments – Comments Submitted to the Trade Policy Staff Committee* (September 18, 2006), available at http://www.nam.org/s_nam/sec.asp?CID=420&DID=418.

TRADE LAWYERS ADVISORY GROUP
SEPTEMBER 2007

program; direct and indirect industry and export subsidies; and deficiencies in standards and regulatory policies.”¹⁵⁵ The following table summarizes NAM’s findings in each of these areas.

Issue	NAM 2006 Report Findings
<i>Currency Undervaluation</i>	<p>Noting that China’s currency is estimated to be undervalue by as much as 40 percent, the NAM 2006 Report indicates that China’s undervaluation of its currency may violate GATT Article XV, which “states that members should not take exchange rate actions which ‘frustrate the intent of the provisions of this Agreement.’ The intent of the agreement . . . is the objective of ‘entering into reciprocal and mutually advantageous arrangements directed to the substantial reduction of tariffs and other barriers to trade.’ Article XV clearly recognizes the relationship between exchange rates and trade and plainly envisions cases in which a member company could take exchange rate action which would ‘frustrate’ the intention of the trade agreement.”¹⁵⁶</p>
<i>Counterfeiting and Piracy</i>	<p>The NAM 2006 Report observes that counterfeiting and piracy in China have spread from media products, computer software and luxury products to “a wide range of consumer and industrial products, including auto and truck parts, pharmaceuticals, personal care products, aircraft parts, testing equipment, electrical control equipment and commercial door fixtures.”</p> <p>Moreover, the NAM 2006 Report notes that Chinese counterfeiting and piracy are affecting legitimate sales in third country markets as well as within China. The report provides several examples of the discovery of Chinese knockoffs of American products in various countries, including refrigeration testing equipment in the United Arab Emirates and Saudi Arabia, key automobile engine components in Russia (the substandard knockoff lasted only a third as long as the legitimate product), and tens of thousands of personal care products shipped to Europe from illegal factories in China and distributed to several foreign markets.¹⁵⁷</p> <p>NAM commends China for its pledges to improve its IPR protection at 2004 and 2006 JCCT meetings, and for an apparent increase at the local level in investigations and actions against IPR infringement. However, the NAM Report notes that the failure of the national government and local governments to provide adequate information on enforcement actions taken or the impact of those actions on counterfeiting and piracy levels precludes a meaningful assessment of China’s efforts to combat IPR infringement.¹⁵⁸ The NAM 2006 Report further notes that China has not fully responded to the U.S. request under TRIPS Article 63.3 for more detailed information on its enforcement actions, finding that, “in particular, China has not provided information that supports a significant increase in criminal prosecutions against those engaged in the production and sale of counterfeit</p>

Issue	NAM 2006 Report Findings
	products even though the government has given law enforcement authorities more discretion to apply criminal sanctions.” ¹⁵⁹
<i>Industrial Policy and the VAT Program</i>	<p>In 2006, NAM continued to receive numerous complaints from U.S. manufacturers about the apparently discriminatory application of the VAT in China. Quoting the U.S. Commercial Service’s statement that “importers note that their domestic competitors often fail to pay [the VAT] taxes,”¹⁶⁰ NAM further observes: “The fact that the local governments, which have an important stake in promoting the expansion of local businesses, are responsible for collecting part of the VAT may well encourage abuse of the VAT program. Lack of transparency and detailed information on VAT collections make it difficult to assess how widespread these abuses may be.”¹⁶¹</p> <p>Though China agreed to discontinue applying preferential VAT refund rates to domestically produced integrated circuits in 2004 in the face of U.S. preparations for action before the WTO, the NAM 2006 Report finds that “China, nonetheless, continues to use different VAT refund rates to either encourage . . . domestic purchases of Chinese-made products or promote exports of Chinese-made products from domestic enterprises.”¹⁶²</p> <p>The NAM 2006 Report notes that in the U.S. submission to the WTO regarding China’s 2006 Subsidies Report,¹⁶³ the U.S. highlighted several concerns with regard to China’s potential contravention of its obligations under the SCM Agreement through its use of preferential VAT and income tax policies (e.g., VAT refund programs for domestically produced products including, <i>inter alia</i>, casting and forging products, dies products and numerically controlled machine tool products, as well as a program that refunded 30 percent of the VAT for purchases of copper to “promote technology upgrading enterprises”). The NAM urges the U.S. to seek more comprehensive information from China on its VAT rebate programs.¹⁶⁴</p>
<i>Direct and Indirect Industry and Export Subsidies</i>	The NAM 2006 Report observes that China’s subsidies list, provided on April 11, 2006, was incomplete, most conspicuously with regard to commercial banking policies and other preferential financial programs that China uses to subsidize its domestic industries. Citing the U.S. submission to the Committee on Subsidies and Countervailing Measures, the NAM notes that “Chinese enterprises have access to: subsidized State Policy Bank loans; the automatic roll-over of unpaid principal and interest; loan forgiveness; continued borrowing despite having non-performing loans; and below-market interest rates.” ¹⁶⁵

CHINA'S COMPLIANCE WITH WTO COMMITMENTS AND OBLIGATIONS: 2005-2007 UPDATE
TRADE LAWYERS ADVISORY GROUP
SEPTEMBER 2007

Issue	NAM 2006 Report Findings
	<p>“In addition to subsidized and non-market-based bank lending . . . other kinds of subsidies [are] made available to the Chinese steel industry, including: land grants at below-market costs; conversion of bank debt into equity; targeted infrastructure development; and a variety of income tax incentives.”¹⁶⁶</p>
<p><i>Deficiencies in Standards Development and Regulatory Policies</i></p>	<p>The NAM 2006 Report highlights several areas of concern with regard to China’s use of technical barriers to trade, including:</p> <ul style="list-style-type: none"> ● Lack of transparency <ul style="list-style-type: none"> ○ NAM members report limited availability of information on new regulations, limited opportunity for foreign stakeholders to comment on proposed regulations, and inadequate time granted for implementation of new technical requirements.¹⁶⁷ ● CCC program costs and restrictions on foreign testing organizations <ul style="list-style-type: none"> ○ “Preventing non-Chinese organizations from testing and certifying for the CC mark forces manufacturers to pay for duplicate tests with multiple testing bodies and thus raises the cost of market their products in China. . . . [and] effectively bars market access to an important and internationally successful U.S. service industry, i.e., testing and certification organizations and laboratories.” The NAM 2006 Report notes that this constitutes a violation of China’s national treatment obligations under the TBT Agreement.¹⁶⁸ ○ In addition, U.S. companies have expressed concerns regarding China’s requirement that Chinese inspectors conduct factory inspections: China requires the foreign companies to pay the travel costs of the inspectors, and the presence of Chinese inspectors in U.S.-owned factories puts proprietary information at risk of being compromised.¹⁶⁹ ○ Other concerns include delays in acquiring CCC certifications and the opacity of the certification and testing business which prevents U.S. companies from determining whether Chinese companies are paying substantially less for these services, as alleged by one U.S. manufacturer.¹⁷⁰ ● Redundant testing and data requirements <ul style="list-style-type: none"> ○ Medical equipment manufacturers have reported that China requires redundant factory and border inspections, despite a 2006 JCCT commitment to eliminate such duplicate testing, and further requires redundant and expensive re-registration of medical equipment.¹⁷¹

Issue	NAM 2006 Report Findings
	<ul style="list-style-type: none"> ○ For new chemicals, China continues to reject foreign test data developed in accordance with internationally approved guidelines. Also, China's requirements for chemical food additives may differ from those that are widely accepted.¹⁷² ● Proposed TBT-inconsistent definition of "international standards" <ul style="list-style-type: none"> ○ China's proposed definition of international standards is limited to those promulgated by the ISO, IEC, ITU and certain other international organizations approved by the ISO, despite the TBT Committee's rejection of the creation of an exhaustive list of approved international standardizing bodies. This definition discriminates against both "U.S.-based standards organizations that develop internationally accepted standards and the thousands of large and small U.S. manufacturers that use these standards."¹⁷³ ● Requirement to use a unique Chinese WAPI standard <ul style="list-style-type: none"> ○ The NAM 2006 Report indicates that "the Chinese government may now be requiring use of the WAPI standards in government procurement," despite China's pledge at the 2004 JCCT to suspend indefinitely the implementation of this requirement, and in potential violation of its TBT obligation to use international standards.¹⁷⁴ ● Ambiguous implementation procedures for the China "RoHS" regulation <ul style="list-style-type: none"> ○ The NAM 2006 Report notes that foreign stakeholders had little opportunity to comment on the China RoHS regulation proposed by China's MII, and that the proposed regulation is problematic in several ways, including: <ul style="list-style-type: none"> ▪ Special labeling and marketing mandates ▪ A third-party CCC certification requirement ▪ Mandatory certification of an "environmentally safe-use period" ▪ A rigid product coverage provision that does not allow exceptions.¹⁷⁵

D. WTO'S FIRST TRADE POLICY REVIEW OF CHINA (2006)

In April 2006, the WTO Secretariat completed the first Trade Policy Review (TPR) of China. As described by the WTO, the objectives of trade policy reviews are "(1) to increase the transparency and understanding of countries' trade policies and practices, through regular

¹⁷² *Id.* at 12.

¹⁷³ *Id.*

¹⁷⁴ *Id.*

¹⁷⁵ *Id.* at 13.

monitoring; (2) to improve the quality of public and intergovernmental debate on the issues, and (3) to enable a multilateral assessment of the effects of policies on the world trading system.”¹⁷⁶

TPRs “focus on members’ own trade policies and practices,” while at the same time taking into account “the countries’ wider economic and developmental needs, their policies and objectives, and the external economic environment that they face.”¹⁷⁷ TPRs encourage WTO members “to follow more closely the WTO rules and disciplines and to fulfil their commitments.”¹⁷⁸

Thus, the trade policy review of China broadly examined China’s economic environment, including macroeconomic policies, structural reforms, trade policy regime (framework and objectives), and trade policy practices and measures affecting imports, exports, production and trade. However, the purpose of the TPR was not *per se* to review China’s compliance with its WTO commitments and obligations. This distinction was noted by the Secretariat’s report:

Article 18 of China's WTO Accession Protocol sets up a Transitional Review Mechanism (TRM) for reviewing China's compliance with its WTO commitments. The TRM takes place annually for eight years following accession, with a final review in year ten or at an earlier date decided by the General Council. The TRM is therefore quite distinct from the Trade Policy Review (TPR) Mechanism, which is aimed at "achieving greater transparency in, and understanding of, the trade policies and practices of Members".¹⁷⁹

CHINA'S COMPLIANCE WITH WTO COMMITMENTS AND OBLIGATIONS: 2005-2007 UPDATE
TRADE LAWYERS ADVISORY GROUP
SEPTEMBER 2007

Notwithstanding that the focus of the TPR was different from the focus of the TRM, the Secretariat's TPR report did note the concerns of other WTO members regarding China's compliance in selected areas. For example, see the following:

Subject	2006 TPR of China -- Secretariat's Report
<i>Standards and Other Technical Requirements</i>	<p>“Members have raised a number of questions concerning China's TBT and SPS measures in the relevant WTO Committees. In the TBT Committee, while commending China's efforts to bring its TBT measures into conformity with the Agreement, Members have raised concerns on a number of issues, including the CCC mark system, the adoption of international standards, and a number of sector-specific issues. . . . In the SPS Committee, Members have raised concerns, <i>inter alia</i>, about China's apparent use of SPS measures to ban imports of affected products from countries rather than just the affected regions within countries; and an apparent failure to notify a number of its SPS regulations issued since 2002.”¹⁸⁰</p>
<i>Software Procurement</i>	<p>“The Ministries of Finance, Information Industries, and Science and Technology, and the NDRC are considering a set of possible measures on government procurement of software, to be promulgated at an appropriate time. According to these measures (as they were initially proposed), procuring entities at all levels of government would be required to procure domestic software. . . . China's trading partners have expressed concerns about the potential impact of this policy in excluding foreign suppliers from software procurement. Recently, China has indicated that it will delay issuing these measures pending further consideration of public comments and possible changes in light of WTO rules.”¹⁸¹</p>
<i>Intellectual Property Rights Enforcement</i>	<p>“The main problems identified by China's major trading partners include: lack of coordination among the main enforcement agencies; local protectionism and corruption; inadequate deterrence provided by the system of administrative, civil, and criminal penalties; and a lack of sufficient training of personnel. In July 2003, the State Council's Development Research Centre estimated that the market value of counterfeit goods in China was between US\$19 billion and US\$24 billion. The 2005 White Paper on Intellectual Property Protection in China states that the number of seizures of material in violation of trade mark, copyright and patent protection increased substantially between 2001 and 2003. The number of cases settled through administrative</p>

Subject	2006 TPR of China -- Secretariat's Report
	<p>means remains high, although an increasing number of cases, especially for copyright, are being transferred to the courts.”¹⁸²</p> <p>“Despite these efforts, it appears that enforcement remains weak and infringement of intellectual property rights widespread. In addition to inadequate deterrents provided through the prosecution system, it is also claimed that "local protectionism" is a major cause of IPR infringement. Local protectionism may be the result of discretionary actions that give preference to local traders and producers, and of local corruption, which may provide local manufacturers or traders of counterfeit goods advance notice of police raids; there is also concern that regional administrative agencies lack sufficient knowledge and training in IPR enforcement.”¹⁸³</p>

E. COMPLIANCE CONCERNS RAISED BY OTHER WTO MEMBERS

In addition to the United States, other WTO Members have expressed concerns with respect to aspects of China's compliance with its WTO commitments and obligations. As part of China's Protocol of Accession, China agreed to the establishment of a Transitional Review Mechanism (TRM) for the purpose of annually reviewing (for eight years with a final review in the tenth year) China's progress in implementing its WTO obligations.¹⁸⁴ Thus, the TRM is a primary avenue available to WTO Members for them to bring compliance concerns to the attention of China.

Many of the compliance issues identified by USTR in its 2005 and 2006 reports were also raised by the United States in the context of the TRM process, where the U.S. has found support from other Members on many issues. For example, as shown in the table below,

¹⁸² See *Trade Policy Review – People's Republic of China; Report by the Secretariat*, WT/TPR/S/161/Rev.1 (26 June 2006) at p. 153, para. 303.

¹⁸³ See *Trade Policy Review – People's Republic of China; Report by the Secretariat*, WT/TPR/S/161/Rev.1 (26 June 2006) at p. 153, para. 303.

¹⁸⁴ *Protocol on the Accession of the People's Republic of China*, WT/L/432 (23 November 2001) art. 18.

CHINA'S COMPLIANCE WITH WTO COMMITMENTS AND OBLIGATIONS: 2005-2007 UPDATE
TRADE LAWYERS ADVISORY GROUP
SEPTEMBER 2007

USTR's 2006 WTO compliance report identifies a host of areas where the U.S. was supported by other Members in the context of the TRM process in pushing for greater compliance by China.

Areas	Other Members Supporting U.S.	2006 USTR Report at:
Import Licensing	Australia	29-30
Antidumping – transparency and fair procedures	EC; Japan	33
Export quota on coke	EC; Japan	36-37
Export quota on fluorspar	Japan	37
Subsidies Notification – omissions and failure to withdraw prohibited subsidies	EC; Japan; Canada; Mexico; Australia; Turkey	42
Conformity Assessment Procedures	EC; Japan	50
Investment – technology transfer, export performance, and local content requirements	EC; Japan	55
Auto Industrial Policy	EC; Japan; Canada	55-56
Steel and Iron Industry Development Policy	EC; Japan; Canada; Mexico	57
IPR Enforcement	EC; Japan; Switzerland	71, 77
Banking Services	EC; Japan; Australia; Canada	81
Financial Information Services	EC	86-87
Legal Services	EC; Japan	88
Telecom Services	EC; Japan	90
Express Delivery Services	EC	93

In the TRM process for 2005 and 2006, the most active WTO Members, besides the United States, were the European Communities, Japan, Australia, Canada, Mexico and Taiwan. A sampling of the compliance comments and concerns expressed by these WTO Members in the 2005 and 2006 TRM proceedings are presented below.

CHINA'S COMPLIANCE WITH WTO COMMITMENTS AND OBLIGATIONS: 2005-2007 UPDATE
TRADE LAWYERS ADVISORY GROUP
SEPTEMBER 2007

European Communities

Issue	EC Compliance Comments/Concerns	Cite
Antidumping procedures	The EC is concerned about China's inadequate procedures for disclosing facts and findings re injury and causality to interested parties.	G/ADP/W/448 (17 October 2005) G/ADP/W/458 (4 October 2006)
Financial Services	<ul style="list-style-type: none"> ▪ Minimum working capital requirements for direct branches of foreign banks are extremely high (RMB 100-500 million per branch depending on the business scope). These requirements are much higher than minimum capital requirements in most other countries and effectively limit market access for foreign banks ▪ China made full national treatment commitments in banking subsector (k) <i>Provision and transfer of financial information, and financial data processing and related software by suppliers of other financial services</i>, yet China's regulatory regime in this subsector applies only to foreign suppliers, and the current regulator, through an affiliate, appears to be engaged in competition with other suppliers. 	S/FIN/W/44 (2 August 2005) S/FIN/W/52 (11 October 2006)
Financial Information Services	The EC is asked China to explain how new set of restrictive regulations for foreign news agencies reconciles with China's full WTO commitments for suppliers of financial information services.	S/FIN/W/52 (11 October 2006)
New Automobile Policy	<p>The EC is concerned that "administrative measures for the import of automobile components fulfilling the characteristics of a whole vehicle, in particular, have the potential to invalidate some of China's WTO accession commitments (abolition of local content requirements and TRIMs, national treatment obligation)."</p> <p>The 2006 submissions also noted: "The EU believes that China is in breach of its obligations as a WTO member and its undertakings on joining the WTO. This issue has now been referred to the WTO Dispute Settlement Body and does not need to be reviewed in the context of the transitional review mechanism. The EU remains open to finding a mutually agreed, WTO-compliant solution."</p>	G/LIC/Q/CHN/17 (13 September 2005) G/MA/W/70 (5 August 2005) G/MA/W/79 (20 September 2006) G/TRIMS/W/41 (1 August 2005) G/TRIMS/W/50 (12 October 2006) G/C/W/538 (8 November 2005)
Export Restrictions	Upon accession, China agreed to eliminate export restrictions unless they could be justified under WTO rules. The EC is concerned about the WTO compliance of a number of the export restrictions maintained by China, in particular, restrictions on coke, rare earths and non-ferrous metals.	G/MA/W/70 (5 August 2005) G/MA/W/79 (20 September 2006) G/C/W/538 (8 November 2005) G/C/W/568 (17 November 2006)

		<p>G/C/W/532 (27 October 2005)</p> <p>G/C/W/561 (8 November 2006)</p>
<p>China Compulsory Certification (CCC)</p>	<p>The EC is concerned about growing difficulties European exporters face due to CCC regulation, which is trade restrictive, imposes a heavy cost and is not proportionate to the objectives of the regulation.</p>	<p>G/MA/W/70 (5 August 2005)</p> <p>G/MA/W/79 (20 September 2006)</p> <p>G/C/W/568 (17 November 2006)</p>
<p>Steel Industry Development Policy</p>	<p>“Article 23 of the NDRC Steel Industry Development Policy states that ‘In principle, when investing in the Chinese steel industry, foreign investors will not hold a controlling stake.’ This limitation is questionable in view of WTO commitments, counterproductive and will hinder the development and the investments.”</p>	<p>G/MA/W/79 (20 September 2006)</p> <p>G/TRIMS/W/50 (12 October 2006)</p>
<p>Pharmaceuticals</p>	<p>The EC is concerned that this sector is characterized by variety of unnecessary, burdensome or costly registrations, licensing, certification and reimbursement procedures that are creating trade barriers and are inconsistent with China’s WTO commitments, in particular national treatment.</p>	<p>G/MA/W/79 (20 September 2006)</p>
<p>Active Pharmaceutical Ingredients</p>	<p><u>2005 submission</u>: “This is a long-standing issue of great concern to the industry. ... China is restricting market access for EU exporters of APIs by applying a series of discriminatory measures, including the application of stricter standards to importers than to local producers. The Chinese actions clearly aim to maintain a high import barrier against APIs. Despite continuous industry and EC action on this issue for several years, there has been no significant change to the Chinese practice.”</p> <p><u>2006 submission</u>: “The issue of active pharmaceutical ingredients (APIs) remains of great concern to the EC. Specifically the fact that each imported API batch in China remains subject to the routine multi-sampling and testing practice carried out by the Port Drug Inspection. Systematically batches are sampled and tested 6-7 times resulting each time in an identical outcome. ... In our opinion the practice is not in line with Article 5.1.2 of the WTO/TBT agreement which calls for assessment procedures not to create an unnecessary obstacle to trade and of Article 5.2.6 which specifies that the selection of samples are not such as to cause unnecessary inconvenience to applicants or their agents.”</p>	<p>G/TBT/W/256 (12 October 2005)</p> <p>G/TBT/W/272 (17 October 2006)</p>
<p>Cosmetics</p>	<p>“The approval procedures for imported non-special use cosmetics still differ from that of domestic non-special use cosmetics. For imported products, a multiple approval procedure is still compulsory, leading to extensive workload, misallocation of personnel and</p>	<p>G/MA/W/79 (20 September 2006)</p> <p>G/TBT/W/272</p>

	financial resources and delays in product introduction to the market. This measure is likely to invalidate some of China's WTO commitments (national treatment obligation)."	(17 October 2006)
Sanitary and Phytosanitary Measures	<ul style="list-style-type: none"> ▪ The EC encourages China to apply international (OIE) standards in accordance with its obligations under Article 3 of the SPS Agreement. "China tends to be quick to apply international standards when problems arise, but often delays far beyond the guidelines when lifting the measures. This is, for instance, the case for Chinese measures in relation to BSE." ▪ "China's ban on certain animal products from certain EC member States is based on a single isolated and completely controlled incident of contamination with dioxin. In the absence of proper scientific justification, the European Communities believes that the SPS Agreement gives no basis to maintain this ban in place. The European Communities asks China to respect the provisions of the SPS Agreement, in particular Article 2, paragraph 2." 	G/SPS/W/208 (9 October 2006)
Subsidies	<ul style="list-style-type: none"> ▪ "While China's first subsidy notification was made long after due time, the notification still appears to be incomplete as it focuses only on subsidies provided at a federal government level and omits substantial subsidies that China maintains. However, subsidies provided at the regional and local government level also fall under the ASCM Agreement. Moreover, some subsidies appear to be inconsistent with the obligation under Art 3 [i.e., conditioned on export or use of domestic over imported goods] of the ASCM Agreement." ▪ Asked China to explain how certain regional subsidies (Guangdong Province; Shenzhen) are compatible with the obligations under ASCM Article 3. 	G/SCM/Q2/CHN/24 (20 October 2006)
Amendment of TRIMs-incompatible Clauses in Contractual Arrangements	<ul style="list-style-type: none"> ▪ China has stated that TRIMs-incompatible clauses in contracts should not be regarded as automatically invalid or be annulled through or by government actions or interference. Yet, the Accession Protocol (para. 3) "lays out a clear obligation for China to not only abolish or amend TRIMs-incompatible legislation, but also to ensure that any contracts containing TRIMs-incompatible commitments and obligations would not be enforced." ▪ In China, contracts and articles of association of a foreign invested enterprise become effective only after they have been approved by the competent authority. "In this context how does China ensure that the 'approval for investment by national and sub-national authorities' is not conditioned on performance requirements of any kind?" 	G/TRIMS/W/41 (1 August 2005) G/TRIMS/W/50 (12 October 2006)

CHINA'S COMPLIANCE WITH WTO COMMITMENTS AND OBLIGATIONS: 2005-2007 UPDATE
TRADE LAWYERS ADVISORY GROUP
SEPTEMBER 2007

Issue	EC Compliance Comments/Concerns	Cite
Authorizing System of Complete Automobile Feature	“Japan understands that customs duties shall be imposed at the point of time when goods are entering the importing country. If the unit of imported goods is an automobile component only, the customs duty shall be for the automobile component itself. Therefore, in cases where customs authorities impose different higher tariff rates such as that of fully assembled vehicles on automobile components in a retrospective manner, Japan suspects it is inconsistent with Article II of the GATT.”	G/C/W/532 (27 October 2005)
Express Delivery Services	The EC asked China to explain how several provisions of the draft postal law are consistent with obligations under GATS.	S/C/W/259 (2 August 2005) S/C/W/274 (11 October 2006)
Telecom Services	The EC is concerned that the requirement for foreign investors to venture with a main Chinese partner in the “basic” telecom sector appears to contravene china’s commitments in the Working Party Report.	S/C/W/259 (2 August 2005) S/C/W/274 (11 October 2006)
Construction, Architectural and Engineering Services	“The EC remains very concerned by the market access barriers existing in China’s construction and design markets. Although China claims that foreign and domestic companies are subject to similar regulatory requirements, the situation on the ground proves to be discriminatory and has deteriorated for foreign companies since the repeal of the Registered Foreign Contractor status granted by the former Decree 32. In addition, residency requirements for construction companies and construction and engineering design companies are still not WTO-compliant.”	S/C//W/259 (2 August 2005) S/C//W/274 (11 October 2006)
TRIPS	The EC noted that China must implement all international obligations related to intellectual property rights and their enforcement. The EC presented a broad series of questions on IP protection (patents, trademarks, design, copyright) and IPR enforcement.	IP/C/W/450 (1 September 2005) IP/C/W/481 (6 October 2006)
Overregulation	The EC is concerned about Chinese “home-grown” standards, especially in areas where international standards exist. China has often developed or planned national standards which deviate from international standards or concern areas where the market already has established standards, e.g., the telecommunications field. In particular, the EC cites the CCC System and the Chinese WAPI security standard for Wireless LAN (WLAN).	G/TBT/W/256 (12 October 2005) G/TBT/W/272 (17 October 2006)

Insurance Services	Taiwan is concerned that China's requirement that foreign insurance companies must have a representative in China for 2 or more years before setting up branches is inconsistent with the spirit of GATS Article VI.5	S/FIN/W/48 (12 September 2005)

II. WTO DISPUTES BROUGHT AGAINST CHINA

When China joined the WTO in December 2001, other Members accorded China a grace period to adjust and bring its trade policies and practices in full conformity with WTO rules before bringing any complaints against China to the WTO dispute settlement process. That grace period ended after two years when, in March 2004, the United States challenged China's discriminatory value-added tax (VAT) policies that favored domestic over imported semiconductors. That initial complaint was settled at the consultation stage. Two more years passed before the next case against China was filed at the WTO.

CHINA'S COMPLIANCE WITH WTO COMMITMENTS AND OBLIGATIONS: 2005-2007 UPDATE
TRADE LAWYERS ADVISORY GROUP
SEPTEMBER 2007

In March 2006, both the United States and the European Communities filed a case against China concerning measures affecting imported auto parts. Canada followed suit in April 2006 on the same issue. In 2007, four dispute settlement cases have been filed against China – three by the United States (on certain subsidies, one on intellectual property rights, and one on trading and distribution rights with respect to publications and audiovisual entertainment products) and one by Mexico (on certain subsidies similar to the U.S. complaint).

The table below lists, in chronological order, the eight WTO dispute settlement cases that have been brought against China to date by other WTO Members. Short summaries of these cases are provided in the subsequent tables.

WTO Cases Brought Against China

Complainant	No.	Title	Request for Consultations
USA	DS309	Value-Added Tax on Integrated Circuits	March 18, 2004 WT/DS309/1 (23 March 2004)
EC	DS339	Measures Affecting Imports of Automobile Parts	March 30, 2006 WT/DS339/1 (3 April 2006)
USA	DS340	Measures Affecting Imports of Automobile Parts	March 30, 2006 WT/DS340/1 (3 April 2006)
Canada	DS342	Measures Affecting Imports of Automobile Parts	April 13, 2006 WT/DS342/1 (19 April 2006)
USA	DS358	Certain Measures Granting Refunds, Reductions or Exemptions from Taxes and Other Payments	February 2, 2007 WT/DS358/1 (7 February 2007)
Mexico	DS359	Certain Measures Granting Refunds, Reductions or Exemptions from Taxes and Other Payments	February 26, 2007 WT/DS359/1 (28 February 2007)
USA	DS362	Measures Affecting the Protection and Enforcement of Intellectual Property Rights	April 10, 2007 WT/DS362/1 (16 April 2007)
USA	DS363	Measures Affecting Trading Rights and Distribution Services for Certain Publications and Audiovisual Entertainment Products	April 10, 2007 WT/DS363/1 (16 April 2007)

DS309

China - Value-Added Tax on Integrated Circuits

Complainant: United States

Request for Consultations: March 18, 2004

Basis of Complaint:

China provides a preferential value-added tax ("VAT") for domestically-produced or designed integrated circuits ("IC"). Although ICs are subject to a 17% VAT, domestically-produced ICs (or domestically-designed ICs manufactured outside China) are entitled to a partial refund of the VAT. Thus, imported ICs (other than domestically-designed ICs) are subject to higher taxes than those applied to domestically-produced ICs and appear to be accorded less favorable treatment.

China's measures appear inconsistent with:

- GATT 1994 (Articles I and III).
- Accession Protocol.
- GATS (Article XVII).

Consultations:

- The European Communities requested to join the consultations on March 26, 2004.
- Japan requested to join the consultations on March 31, 2004.
- Mexico and the Separate Customs Territory of Taiwan, Penghu, Kinmen and Matsu requested to join the consultations on April 1, 2004.

Resolution:

- China and the United States notified the DSB on July 14, 2004 of a mutual agreement respecting the issues raised by the United States.
 - China agreed to amend or revoke the measures at issue to eliminate VAT refunds on domestically-produced and sold ICs and imports of domestically-designed ICs produced abroad by November 1, 2004 and September 1, 2004 respectively. The effective dates are April 1, 2005 and October 1, 2004, respectively.
- China and the United States informed the DSB on October 5, 2005 that the terms of the agreement had been implemented successfully, and, thus, a mutually satisfactory solution had been reached.

Source: http://www.wto.org/english/tratop_e/dispu_e/cases_e/ds309_e.htm.

DS339 – DS340 – DS342

China - Measures Affecting Imports of Automobile Parts

Complainants: European Communities (DS339); United States (DS340); Canada (DS342)

Request for Consultations: March 30, 2006 (EC and US); April 13, 2006 (Canada)

Basis of Complaints:

China imposes certain measures that adversely affect exports of automobile parts from the European Communities, the United States and Canada to China, in particular:

DS339 – DS340 – DS342

China - Measures Affecting Imports of Automobile Parts

- *Policy on Development of Automotive Industry* (Order No. 8 of the National Development and Reform Commission, May 21, 2004);
- *Measures for the Administration of Importation of Automotive Parts and Components for Complete Vehicles* (Decree No. 125), entered into force on April 1, 2005);
- *Rules for Determining Whether Imported Automotive Parts and Components Constitute Complete Vehicles* (General Administration of Customs Public Announcement No. 4, entered into force on April 1, 2005);
- Any amendments, replacements, extensions, implementing measures or other measures related to the above.

EC Claims:

China's measures that subject imported auto parts used in manufacture of vehicles for sale in China to charges equal to the tariffs for complete vehicles, if imported above certain thresholds, appear inconsistent with:

- GATT 1994 (Articles II:1(a), II:1(b), III:2, III:4, III:5, as well as principles in Article III:1).
- TRIMs Agreement (Articles 2.1 and 2.2 in conjunction with paragraphs 1(a) and 2(a) of the Illustrative List annexed to the Agreement).
- SCM Agreement (Article 3).

China's measures nullify or impair benefits accruing to the EC under:

- Accession Protocol (Part I, para. 7.3)
- Working Party Report (para. 203 in conjunction with Part I, para. 1.2 of Accession Protocol, and para. 342).

US Claims:

China's measures appear to penalize manufacturers for using imported auto parts in the manufacture of vehicles for sale in China. Although bound tariffs for auto parts are significantly lower than bound tariffs for complete vehicles, China assesses a charge on imported auto parts equal to tariff on complete vehicles, if such auto parts are incorporated in a vehicle containing imported parts above thresholds. These measures are inconsistent with:

- TRIMs Agreement (Article 2).
- GATT 1994 (Articles II (including para. 1) and III (including paras. 2, 4 and 5)).
- SCM Agreement (Article 3 (including paras. 1 and 2)).
- Accession Protocol (including Parts I.1.2 and I.7.3).
- Working Party Report (including paras. 93 and 203).

China's measures nullify or impair benefits accruing to the US, directly or indirectly, under the cited agreements.

Canada Claims:

China's measures impose different charges on vehicles manufactured in China depending on domestic content of auto parts used, thereby providing an advantage to domestic auto parts. China's measures impact foreign investments in that they provide an advantage conditioned on the use of domestic rather than imported parts in vehicle production. The charges assessed on auto parts included in a complete vehicle appear to be charges above China's commitments in its schedule of concessions. The measures also appear to provide subsidies contingent upon export performance and upon the use of domestic over imported goods.

China's measures appear inconsistent with:

DS339 – DS340 – DS342
China - Measures Affecting Imports of Automobile Parts

- Accession Protocol (including Parts I.1.2 and I.7.3).
- Working Party Report (including paras. 93 and 203).
- GATT 1994 (Articles II (including para. 1) and III (including paras. 2, 4 and 5)).
- TRIMs Agreement (Article 2).
- Agreement on Rules of Origin (Article 2, specifically paras. (b), (c) and (d)).
- SCM Agreement (Article 3).

China's measures nullify or impair benefits accruing to Canada under the cited agreements.

Consultations:

- DS339: Australia, Canada, Japan, Mexico and the US requested to join the consultations.
- DS340: Australia, Canada, the EC, Japan and Mexico requested to join the consultations.
- DS342: Australia, the EC, Japan, Mexico and the US requested to join the consultations.

Request for a Panel:

- The European Communities, the United States, and Canada each requested establishment of a panel on September 15, 2006. The DSB deferred establishments of a panel on September 15, 2006.

Establishment of a Panel:

- The DSB established a single panel pursuant to Article 9.1 of the DSU on October 26, 2006.
- The Director-General composed the Panel on January 29, 2007.

Third Parties:

- Argentina, Australia, Brazil, Chinese Taipei, Japan, Mexico, and Thailand reserved their third-party rights.

Status:

- On July 16, 2007, the panel Chairman informed the DSB that, due to complexity of the issues, the panel would not complete its work within six months.
- The Panel expects to issue its final report to the parties by January 2008.

DS358 – DS359

China - Certain Measures Granting Refunds, Reductions or Exemptions from Taxes and Other Payments

Complainants: United States (DS358); Mexico (DS359)

Request for Consultations: February 2, 2007 (US); February 26, 2007 (Mexico)

Basis of Complaint:

Various China measures granting refunds, reductions or exemptions from taxes and other payments owed to the Government by enterprises in China appear inconsistent with:

- SCM Agreement (Article 3) because they provide refunds, reductions or exemptions to enterprises in China conditioned on purchase of domestic over imported goods, or on meeting certain export performance criteria.
- GATT 1994 (Article III:4) and TRIMs Agreement (Article 2) to the extent imported products are accorded less favorable treatment than like domestic products.
- Accession Protocol (paras. 7.2-7.3 and 10.3 of Part I).
- Working Party Report (paras. 167 and 203 to the extent incorporated by para. 1.2 of Accession Protocol).

Consultations:

DS358 (US)

- The European Communities requested to join the consultations on February 15, 2007.
- Australia and Japan requested to join the consultations on February 16, 2007.
- Mexico requested to join the consultations on February 19, 2007.

DS359 (Mexico)

- The European Communities requested to join the consultations on March 6, 2007.
- Australia requested to join the consultations on March 7, 2007.
- Japan requested to join the consultations on March 8, 2007.
- The United States requested to join the consultations on March 12, 2007.

Supplemental Consultations:

DS358 (US)

- The United States requested supplemental consultations on April 27, 2007 to take China's new income tax law into account.
- Mexico requested to join the supplemental consultations on May 4, 2007.
- The European Communities requested to join the supplemental consultations on May 7, 2007.
- Australia and Japan requested to join the supplemental consultations on May 11, 2007.
- Canada requested to join the supplemental consultations on May 14, 2007.

DS359 (Mexico)

- Mexico requested supplemental consultations on May 4, 2007 to take China's new income tax law into account.
- Australia requested to join the supplemental consultations on May 11, 2007.
- Canada and the European Communities requested to join the supplemental consultations on May 14, 2007.
- Japan requested to join the supplemental consultations on May 16, 2007.

DS358 – DS359

China - Certain Measures Granting Refunds, Reductions or Exemptions from Taxes and Other Payments

- The United States requested to join the supplemental consultations on May 18, 2007.

Request for a Panel:

- The United States and Mexico each requested establishment of a panel on July 12, 2007. The DSB deferred establishments of a panel on July 24, 2007.

Source: http://www.wto.org/english/tratop_e/dispu_e/cases_e/ds358_e.htm;
http://www.wto.org/english/tratop_e/dispu_e/cases_e/ds359_e.htm.

DS362

China - Measures Affecting the Protection and Enforcement of Intellectual Property Rights

Complainant: United States

Request for Consultations: April 10, 2007

Basis of Complaint: The United States requested consultations on four matters.

- (1) *Criminal liability thresholds*
- (2) *Disposal of IPR-infringing goods confiscated by Chinese Customs*
- (3) *Scope of criminal procedures and penalties for unauthorized reproduction or distribution of copyrighted works*
- (4) *Denial of adequate protection and enforcement of copyright and related rights*

The United States claims that Chinese measures respecting the four matters appear inconsistent with the TRIPS Agreement:

- Measures that fail to provide criminal procedures and penalties for commercial scale trademark counterfeiting and copyright piracy in China due to inadequate thresholds appears inconsistent with China's obligations under Articles 41.1 and 61 of the TRIPS Agreement
- Measures that require the release of infringing goods into the channels of commerce appear inconsistent with China's obligations under Articles 46 and 59 of the TRIPS Agreement.
- Unauthorized publication or distribution of protected works appears inconsistent with the minimum protection standards of the Berne Convention.
- Measures requiring works to undergo pre-publication or pre-distribution review appears inconsistent with China's obligations under Article 9.1 of the TRIPS Agreement.
- To the extent the Copyright Law denies protection of so-called related rights to performers and producers of sound recordings during any pre-publication or pre-distribution period, the Copyright Law appears inconsistent with China's obligations under Article 14 of the TRIPS Agreement.
- Measures that accord to works of Chinese nationals different pre-distribution and pre-authorization review processes that result in more favorable treatment, the measures appear inconsistent with China's obligations under Article 3.1 of the TRIPS Agreement.
- To the extent Article 4 of the Copyright Law causes less favorable rights to foreign authors, measures at issue appear inconsistent with China's obligations under Article 9.1 of the TRIPS Agreement.

DS362

China - Measures Affecting the Protection and Enforcement of Intellectual Property Rights

- To the extent Article 4 of the Copyright Law makes it impossible for rightsholders to enforce copyrights or related rights with respect to unauthorized works, performances or sound recordings, China appears to act inconsistently with obligations under Article 41.1 of the TRIPS Agreement.
- To the extent measures fail to subject willful copyright piracy on a commercial scale consisting of unauthorized reproduction (but not unauthorized distribution), and vice versa, to criminal procedures and penalties, they appear inconsistent with China's obligations under Articles 41.1 and 61 of the TRIPS Agreement.

Consultations:

- Japan requested to join the consultations on April 20, 2007.
- Canada and the European Communities requested to join the consultations on April 25, 2007.
- Mexico requested to join the consultations on April 26, 2007.

Request for a Panel:

- The United States requested establishment of a panel on August 13, 2007.

Source: http://www.wto.org/english/tratop_e/dispu_e/cases_e/ds362_e.htm.

DS363

China - Measures Affecting Trading Rights and Distribution Services for Certain Publications and Audiovisual Entertainment Products

Complainant: United States

Request for Consultations: April 10, 2007

Basis of Complaint:

- (1) China maintains certain measures that restrict trading rights by reserving to certain Chinese state-designated and wholly or partially state-owned enterprises, the right to import films for theatrical release, audiovisual home entertainment products (*e.g.*, video cassettes and DVDs), sound recordings and publications (*e.g.*, books, magazines, newspapers and electronic publications). These measures appear to accord less favorable treatment to foreign enterprises, and appear inconsistent with China's obligations under paragraphs 5.1 and 5.2 of Part I of the Protocol of Accession, and under paragraph 1.2 of Part I of the Protocol of Accession (to the extent that it incorporates commitments in paragraphs 83 and 84 of the Report of the Working Party on the Accession of China). Also, these measures appear inconsistent with China's obligations under Article XI:1 of the GATT 1994 to the extent that they impose prohibitions or restrictions other than duties, taxes or other charges.
- (2) China maintains certain measures that impose market access restrictions or discriminatory limitations on foreign suppliers of distribution services for publications and foreign suppliers of audiovisual services (including distribution services) for audiovisual home entertainment products. These measures appear to accord less favorable treatment to foreign enterprises, and appear inconsistent with China's obligations under Articles XVI and XVII of the GATS.

DS363

***China - Measures Affecting Trading Rights and Distribution Services for
Certain Publications and Audiovisual Entertainment Products***

Consultations:

- The European Communities requested to join the consultations on April 25, 2007.

Supplemental Consultations:

- The United States requested supplemental consultations on July 10, 2007.
- The European Communities requested to join the supplemental consultations on July 20, 2007.

Source: http://www.wto.org/english/tratop_e/dispu_e/cases_e/ds363_e.htm.

**III. AREAS OF LONGSTANDING CONCERN REGARDING WTO COMPLIANCE
THAT WARRANT CONSIDERATION OF POSSIBLE WTO CHALLENGES**

China's 5-year transition period as a new WTO Member is essentially complete, with the deadlines for almost all of China's commitments having passed. During this transition period, China took many noteworthy steps to restructure its economy and integrate itself more fully into the international trading system. Despite China's considerable progress in many areas, however, USTR noted at the end of the 5-year transition period that:

China's record in implementing WTO commitments is decidedly mixed. China continues to pursue problematic industrial policies that rely on trade-distorting measures such as local content requirements, import and export restrictions, discriminatory regulations and prohibited subsidies, all of which raise serious WTO concerns. China's shortcomings in enforcing laws in area where detailed WTO disciplines apply, such as intellectual property rights (IPR), have also created serious problems for the United States and its other trading partners.¹⁸⁵

¹⁸⁵ USTR, *2006 Report to Congress on China's WTO Compliance* at 3 (December 11, 2006).

USTR further observed that U.S. industries have complained of a growing desire within China's government and business sectors to "expand the government's role in directing the economy and in developing internationally competitive Chinese enterprises, while also restricting the role of international companies in certain sectors."¹⁸⁶ In addition, systemic rule of law shortcomings and a lack of consistent priorities and approaches within and amongst China's central, provincial and local governments have contributed to the decreased impetus for economic reform.

The reduced momentum for liberalization and lack of improvement in areas troubling to U.S. business interests led USTR to announce in 2006 the adoption of a dual-track approach to address its concerns with China's WTO compliance. Under this approach, the U.S. will continue to pursue resolution of trade issues bilaterally with China, but when such bilateral discussions fail to address U.S. concerns, the U.S. will initiate dispute settlement proceedings against China, as it would against any other mature WTO member. Used prudently, WTO dispute settlement cases can be a means to induce and encourage China to come into full compliance with its commitments to the U.S. and other WTO Members.¹⁸⁷

As reviewed in the preceding section, to date the United States has initiated five WTO dispute settlement cases with respect to China. To reiterate, they are:

¹⁸⁶ *Id.* at 4.

¹⁸⁷ For example, in January 2006, China withdrew the antidumping duties it had imposed on imports of unbleached kraft linerboard from the U.S. after the U.S. informed China that it would be formally requesting WTO consultations. *See USTR, 2006 Report to Congress on China's WTO Compliance*, at 4-5, 33 (December 11, 2006).

2.	Measures Affecting Imports of Automobile Parts	March 30, 2006
3.	Certain Measures Granting Refunds, Reductions or Exemptions from Taxes and Other Payments ¹⁸⁸	February 2, 2007
4.	Measures Affecting the Protection and Enforcement of Intellectual Property Rights	April 10, 2007
5.	Measures Affecting Trading Rights and Distribution Services for Certain Publications and Audiovisual Entertainment Products	April 10, 2007

A. INTELLECTUAL PROPERTY RIGHTS

Intellectual property (IP) piracy and counterfeiting and China's inadequate enforcement of intellectual property rights (IPR) are two of the most important and serious issues which U.S. companies face vis-à-vis China.¹⁸⁹

U.S. IP industries account for over half of all U.S. exports. They represent 40% of our economic growth and employ 18 million Americans, who earn 40% more than the average U.S. wage. . . . IP accounts for over 1/3 of the value of all U.S. corporations, an amount equal to almost half of our GDP."¹⁹⁰

The rates of piracy and counterfeiting in China are enormous. USTR estimates a piracy rate of approximately 85-93% of the entire market in almost all copyright sectors,¹⁹¹ and

¹⁸⁸ The subject of this dispute is discussed in greater detail in section III.C.2, *infra*.

¹⁸⁹ For a full and detailed examination of the problems of intellectual property rights infringement and inadequate enforcement in China, see Terence p. Stewart, Elizabeth A. Argenti, and Philip A. Butler, *The Crisis in Intellectual Property Protection and China's Role in That Crisis* (Trade Lawyers Advisory Group, May 2007).

¹⁹⁰ *Piracy and Counterfeiting in China, Hearing before the US-China Economic and Security Review Commission*, 109th Congress (June 7, 2006) (Testimony of Chris Israel, U.S. Coordinator for International Intellectual Property Enforcement before the US-China Economic and Security Review Commission), available at http://hongkong.usconsulate.gov/uscn_t_ipr_2006060701.html.

¹⁹¹ USTR, *2006 Special 301 Report* at 17 (April 28, 2006), available at http://ustr.gov/assets/Document_Library/Reports_Publications/2006/2006_Special_301_Review/asset_upload_file473_9336.pdf.

estimates consequent losses to U.S. industries of between \$2.5 billion and \$3.8 billion annually.¹⁹² The U.S. seizes more infringing goods from China at U.S. borders than from all other countries combined (69% in 2005, as compared to 63% in 2004).¹⁹³

The twin problems of infringement and inadequate enforcement of IPR in China continue to be matters of utmost concern for U.S. industry:

Unfortunately, problems persist and our concerns about IP enforcement in China continue to grow. Despite China's membership in the WTO and its requirement to comply with the TRIPS Agreement, as well as a series of bilateral commitments made over the past 10 or more years, the lack of effective IP enforcement in China is a major problem for U.S. business interests, costing billions of dollars in lost revenue and perhaps tens of thousands of U.S. jobs. While China has done a generally good job of creating laws to comply with its WTO commitments, IP enforcement problems remain pervasive. These problems run the gamut from rampant piracy of movies and business software to counterfeiting of consumer goods, electrical equipment, automotive parts, and pharmaceuticals.¹⁹⁴

Since acceding to the WTO, China has taken some steps to decrease piracy and improve IPR enforcement, but unacceptably high levels of piracy and counterfeiting have continued. While China has promulgated intellectual property laws (*e.g.*, copyright, patent, and trademark) that move it toward compliance with its WTO obligations, the establishment of unacceptably

¹⁹² USTR, *2005 Special 301 Report* at 15 (April 29, 2005), available at http://ustr.gov/assets/Document_Library/Reports_Publications/2005/2005_Special_301/asset_upload_file195_7636.pdf.

¹⁹³ Susan C. Schwab, U.S. Trade Representative, Remarks before the U.S. Chamber of Commerce (September 28, 2006), available at http://ustr.gov/assets/Document_Library/Transcripts/2006/September/asset_upload_file794_9872.pdf.

¹⁹⁴ *Does China Enact Barriers to Fair Trade? Hearing before the Committee on Small Business, Subcommittee on Rural Enterprise, Agriculture and Technology and the Subcommittee on Tax, Finance and Exports*, 108th Congress (May 26, 2005) (statement of Stephen M. Pinkos, Deputy Under Secretary of Commerce for Intellectual Property and Deputy Director of the United States Patent and Trademark Office), available at <http://www.ogc.doc.gov/ogc/legreg/testimon/109f/Pinkos052605.htm>.

high thresholds for criminal prosecution and grossly inadequate enforcement pose serious challenges for U.S. industry, and are apparently inconsistent with China's WTO obligations. The International Intellectual Property Alliance (IIPA) and International Anticounterfeiting Coalition have presented cogent descriptions of the scope of the IPR infringement and enforcement problems in China:

As the result of market access barriers and rampant piracy, the United States is being blatantly denied a major trade comparative advantage, resulting in billions of dollars of foregone revenue . . . and the loss of hundreds of thousands of high-paying U.S. jobs.

With respect to piracy, China, despite many promises from high-level government officials, continues to fail to provide deterrent enforcement against the blatant and widespread piracy of U.S. copyright products including meaningful, deterrent criminal actions. Taking effective criminal action against piracy is a key WTO TRIPS requirement and likewise key to China reducing the staggering piracy rates and creating a market both for U.S. and local right holders.

China has established "thresholds" for criminal liability that provide a huge and WTO-inconsistent "safe harbor" within which pirates can operate with little risk other than meaningless, small administrative fines or short-term store closures. These "thresholds" render China's enforcement system in clear violation of its WTO TRIPS obligations to criminalize acts of "copyright piracy on a commercial scale." Moreover, Chinese authorities almost never initiate criminal proceedings even when the thresholds are exceeded. In the almost five years that China has been a WTO member, IIPA is aware of no more than two criminal cases having been concluded involving U.S. copyrights and only five cases involving copyrights of any other WTO member – or approximately **one criminal case per year**. Given the magnitude of the piracy problem, no conceivable interpretation of China's TRIPS obligations can render this record as TRIPS-compliant. In addition, China's Criminal Law fails to subject to criminal liability the violation of many exclusive rights which, when infringed,

constitute “clear copyright piracy on a commercial scale,” all in violation of Articles 41 and 61 of the TRIPS agreement.¹⁹⁵

China continues to be the single biggest source of counterfeit product worldwide, and the steps taken by the Chinese government and judiciary over the last year to reduce counterfeiting and piracy have not yet achieved significant and necessary reductions in the level of infringements. Indeed, most of our members with serious problems in China believe that exports of counterfeits and pirated products from China seem to be increasing. Meanwhile, infringers are increasingly exploiting the Internet as a platform for promotion and trade.

* * *

[T]he vast majority of IACC members report only modest increases in the number of criminal arrests and convictions of trademark counterfeiters, and almost no criminal actions against copyright pirates or exporters of counterfeit goods. In relative terms, the total number of criminal actions in China is still grossly inadequate, and it is likely to remain this way even if the number of arrests and convictions continues to increase by 50% each year.

Administrative penalties—still the mainstay of the current trademark and copyright enforcement system in China—remain grossly inadequate and in most cases create little if any noticeable deterrent to further infringements. Moreover, serious obstacles still remain in the transfer of most administrative cases to the police.

* * *

In sum, the IACC believes that China is failing to comply with its obligations under Article 61 of the TRIPS Agreement to provide *effective* enforcement that has a *deterrent* impact.¹⁹⁶

¹⁹⁵ Comments from the International Intellectual Property Alliance to Gloria Blue, Executive Secretary, Trade Policy Staff Committee, Office of the U.S. Trade Representative at 3-4 (September 21, 2006), available at <http://www.iipa.com/pdf/IIPA%20CHINA%20TPSC%20WTO%20Compliance%20Written%20Comments%20FINAL%2009212006.pdf> (citation omitted in original).

¹⁹⁶ Submission of the International Anticounterfeiting Coalition, Inc. to the United States Trade Representative, Special 301 Recommendations at 13 (February 10, 2006), available at <http://www.iacc.org/resources/resources.php>.

The United States has made major efforts to address the problems of IPR infringement and inadequate IPR enforcement in China. These efforts included bilateral consultations with China through the Joint Commission on Commerce and Trade (JCCT)¹⁹⁷ in 2005 and 2006, Special 301 reviews of China in 2005 and 2006,¹⁹⁸ and a “top-to-bottom” review of China trade policy by USTR in 2006.¹⁹⁹

Despite these efforts, as reviewed in the preceding section, on April 10, 2007, the United States initiated a dispute settlement case against China at the WTO on the subject of intellectual property rights.²⁰⁰ On August 13, 2007, as consultations with China failed to resolve the matter, the United States requested that a dispute settlement panel be established.²⁰¹ The U.S. request for a panel identified the following three areas of China’s IPR regime as the subject of the dispute:

The U.S. panel request alleges violations of various provisions of the WTO Agreement on Trade-Related Aspects of Intellectual Property Rights (the TRIPS Agreement) related to three aspects of China’s IPR regime. First, the request challenges quantitative thresholds in China’s criminal law that must be met in order to start criminal prosecutions or obtain criminal convictions for

²⁰¹ *China – Measures Affecting the Protection and Enforcement of Intellectual Property Rights: Request for Establishment of a Panel by the United States*, WT/DS362/7 (21 August 2007).

copyright piracy and trademark counterfeiting. Wholesalers and distributors are able to operate below these high thresholds without fear of criminal liability, so these thresholds effectively permit piracy and counterfeiting on a commercial scale.

Second, the panel request addresses the rules for disposal of IPR-infringing goods seized by Chinese customs authorities. Those rules appear to permit goods to be released into commerce following the removal of fake labels or other infringing features, when WTO rules dictate that these goods normally should be kept out of the marketplace altogether.

Third, the panel request addresses the apparent denial of copyright protection for works poised to enter the market but awaiting Chinese censorship approval. It appears that Chinese copyright law provides the copyright holder with no right to complain about copyright infringement (including illegal/infringing copies and unauthorized translations) before censorship approval is granted. Immediate availability of copyright protection is critical to protect new products from pirates, who – unlike legitimate producers – do not wait for the Chinese content review process to be completed.²⁰²

In addition to the three IPR aspects that are the subject of the current U.S. IPR case, there are other long-standing issues concerning China's compliance with intellectual property rights obligations which could be given consideration as subjects for future WTO consultations and dispute settlement. These are set out in the table below.

Potential IPR Subjects for WTO Consultation and Dispute Settlement Process	
Category—Issues	IPR Problem
<i>Intellectual Property Rights—Legal Framework</i>	<ul style="list-style-type: none"> • Generally, China's legal framework for IPR protection is inadequate in the following ways: <ul style="list-style-type: none"> ○ Lack of criminal liability for certain acts of copyright infringement;

CHINA'S COMPLIANCE WITH WTO COMMITMENTS AND OBLIGATIONS: 2005-2007 UPDATE
TRADE LAWYERS ADVISORY GROUP
SEPTEMBER 2007

Potential IPR Subjects for WTO Consultation and Dispute Settlement Process	
Category—Issues	IPR Problem
	<ul style="list-style-type: none"> ○ A profit motive requirement in copyright cases; ○ In counterfeiting cases, a requirement of identical trademarks; ○ The distinction between individual and enterprise liability; ○ An array of weaknesses in China's laws that do not deter, and may foster, some infringing activity (e.g., "squatting" of foreign company names, designs and trademarks, theft of trade secrets, registration of other companies' trademarks as design patents and vice versa, use of falsified/misleading documents to make counterfeiting operations seem legitimate, and bogus indications of geographic origin of products); and ○ General lack of minimum, proportionate sentences and clear standards for initiating criminal investigations where a reasonable suspicion of criminal activity exists. ● China's customs laws are problematic in the following ways: <ul style="list-style-type: none"> ○ An excessively short deadline for a right holder to apply for seizure of suspect goods held by the Chinese authorities. ● China's legal framework as applied to the pharmaceutical sector is still beset with problems, including: <ul style="list-style-type: none"> ○ Insufficient protection against unfair commercial use of undisclosed test and other data presented by foreign companies pursuing marketing approval; ○ Delays in the marketing approval system which provide incentive for counterfeiting; and ○ Inadequate regulatory oversight for China's domestic pharmaceuticals industry, contributing to an environment conducive to counterfeiting. (USTR 2006 Report at 72-75)
<i>Intellectual Property Rights—Enforcement</i>	<ul style="list-style-type: none"> ● In 2005, the percentage of infringing goods seized at the U.S. border of Chinese origin increased to 69% from 63% in 2004, a percentage ten times larger than that of any other U.S. trading partner. ● China's maintenance of market access barriers, such as import restrictions and restrictions on wholesale and retail distribution, makes its domestic market even more conducive to IPR infringement by curtailing the ingress of legitimate foreign products. ● China's administrative enforcement actions against IPR infringers are plagued by numerous problems, including: <ul style="list-style-type: none"> ○ Imposition of extremely low fines (because the value of the infringing goods is based on the price for infringing goods, not the genuine goods); ○ Insufficiency of evidence of warehousing infringing goods to prove intent to sell them; ○ Infrequency of administrative authorities forwarding administrative cases to the Ministry of Public Security for criminal investigation; and ○ Failure to shut down blatant IPR infringement by roaming vendors, retail markets and wholesale markets throughout China (e.g., the Silk Street market in Beijing). ● Criminal enforcement in China is inadequate in the following ways: <ul style="list-style-type: none"> ○ In 2005 and 2006, despite China's pledges to apply criminal sanctions to

Potential IPR Subjects for WTO Consultation and Dispute Settlement Process	
Category—Issues	IPR Problem
	<p>a wider range of IPR-infringing activities and to increase the penalties for IPR violations, criminal prosecutions stayed low compared to administrative cases, and criminal enforcement was not an adequate deterrent for IPR-infringers.</p> <ul style="list-style-type: none"> ○ The Chinese police force lacks the requisite resources and training to combat IPR infringement. ○ Prosecution of IPR crimes requires coordination between national and local agencies, but coordination remained problematic in 2005 and 2006. ○ As noted above, criminal liability thresholds remain too high and are seldom met. They also require proof of sales of infringing goods, which is often not available. ● Civil enforcement is problematic in the following ways: <ul style="list-style-type: none"> ○ Local protectionism, judges' lack of technical training, and vague or ineffective court rules regarding evidence, expert witnesses and protection of confidential information hamper the effectiveness of civil enforcement. ○ Respecting patents, where civil remedies are of particular importance, a single case still takes several years to complete, thereby making the damages provisions that China adopted to comply with its TRIPS Agreement less significant. (USTR 2006 Report at 76-78)

B. OTHER AREAS

In addition to intellectual property rights, there are other areas where USTR has found China's WTO compliance to be inconsistent or problematic, and which would be worthy of consideration as potential subjects for WTO consultations and the dispute settlement process. The following table lists some of these areas identified by USTR. The categories are presented in the order in which they appear in USTR's compliance reports.

Other Potential Subjects for WTO Consultation and Dispute Settlement Process	
Category—Issues	Problem
<i>Trading Rights and Distribution Services—Publications and Pharmaceuticals</i>	<ul style="list-style-type: none"> ● In 2005, China had not yet implemented its trading rights commitments relating to the importation of pharmaceuticals, though China's accession agreement creates no exception for pharmaceuticals. Foreign pharmaceutical

SEPTEMBER 2007

Other Potential Subjects for WTO Consultation and Dispute Settlement Process	
Category—Issues	Problem
	companies are still required to hire Chinese importers to bring their finished products into the country. (USTR 2005 Report at 13)
<i>Trading Rights and Distribution Services—Sales Away from a Fixed Location</i>	<ul style="list-style-type: none"> • In the area of direct selling, or sales away from a fixed location, MOFCOM issued implementing rules in August 2005, after a nine-month delay, but progress in this area in 2005 and 2006 was inadequate. (USTR 2006 Report at 24)
<i>Trading Rights and Distribution Services—National Treatment and Market Access in Distribution Services</i>	<ul style="list-style-type: none"> • Compliance requirements with municipal commercial development rules are imposed on foreign enterprises, but not on domestic enterprises, in apparent violation of China's national treatment commitments with regard to distribution services. (USTR 2006 Report at 16-17) • Regulations issued in December 2006 to implement China's commitments to liberalize its wholesale and retail distribution market for crude oil and processed oil seem to construct high thresholds and other barriers to market entry for foreign enterprises. (USTR 2006 Report at 21) • The implementing rules regarding foreign enterprise distribution of automobiles, while generally welcomed by U.S. business interests, contain some restrictions on foreign enterprises that may not apply to domestic enterprises. (USTR 2006 Report at 20)
<i>Import Regulation—Customs Valuation</i>	<ul style="list-style-type: none"> • China did not uniformly implement its regulations with the result that U.S. exporters still encountered valuation problems at Chinese ports. These problems include: (1) valuation based on reference pricing instead of transaction value; (2) automatic addition of royalties and license fees to the dutiable value of imported software, in contravention of explicit provisions of the implementing rules that state that such fees are to be added only where the software is import-related and a condition of sale for the goods in question; (3) valuation of high-value electronic media to be used to produce multiple copies of products (e.g., DVDs) based on the estimated value of the future copies instead of the value of the carrier medium itself; and (4) general inefficiency and inconsistency in customs clearance procedures, including procedural variances from port to port, massive delays at port, and seemingly excessive and rapidly rising fees. (USTR 2006 Report at 26-27)
<i>Import Regulation—Import Licensing</i>	<ul style="list-style-type: none"> • The Chinese government began imposing new import licensing procedures for iron ore without prior WTO notification in May 2005, after Chinese steel producers had finalized contracts with major foreign iron ore suppliers. China purportedly restricted licenses to 48 traders and 70 steel producers—without making public a list of the qualified enterprises or the qualifying criteria used—in possible violation of China's obligations under the Import Licensing Agreement to establish solely import licensing procedures that do not have a restrictive effect on trade. This development is particularly troubling because it could set a dangerous precedent for the handling of imports of other raw materials. (USTR 2006 Report at 28-29)

CHINA'S COMPLIANCE WITH WTO COMMITMENTS AND OBLIGATIONS: 2005-2007 UPDATE
TRADE LAWYERS ADVISORY GROUP
SEPTEMBER 2007

Other Potential Subjects for WTO Consultation and Dispute Settlement Process	
Category—Issues	Problem
<i>Import Regulation— Tariff-rate Quotas on Industrial Products</i>	<ul style="list-style-type: none"> China has implemented its TRQ system slowly, failed to meet its transparency requirements, and has discouraged TRQ holders from freely using their quotas, in apparent contravention of its commitment to implement a transparent system of TRQs to give access for three industrial products, including fertilizer, a major U.S. export. (USTR 2006 Report at 30-31)
<i>Import Regulation— Antidumping</i>	<ul style="list-style-type: none"> Transparency and procedural fairness were still sorely lacking in the area of antidumping in 2005 and 2006. (USTR 2006 Report at 31-33)
<i>Import Regulation— Safeguards</i>	<ul style="list-style-type: none"> China's rules and regulations contain some possible contradictions to the Safeguard Agreement, as well as some omissions and ambiguities. Also, some provisions of China's regulations have no counterparts in the Safeguards Agreement. The U.S. continued to be concerned about several issues raised in earlier transitional reviews; namely, transparency, determination of developing country status, treatment of non-WTO members, protection of confidential data, access to non-confidential information, refunding of safeguard duties collected pursuant to provisional measures when definitive measures are not imposed, and the conditions governing the extension of a safeguard measure. (USTR 2006 Report at 34-35)
<i>Export Regulation— Export Quotas on Fluorspar and Blast Furnace Coke</i>	<ul style="list-style-type: none"> In 2005 and 2006, China resisted pressure from the U.S. and other WTO members to eradicate its longstanding export quota on blast furnace coke, which had a significant adverse effect on U.S. steel producers in 2004, though it has raised the quota to pre-2004 levels. This export quota kept world coke prices artificially high in 2006, and a considerable disparity persisted between China's domestic prices and world coke prices. In addition to trying to direct market outcomes by maintaining the export quota on coke, in October 2006 China imposed a five percent duty on exports of coke. In an apparent bid to support its downstream producers of various products derived from fluorspar, China continued to impose both quotas and license fees on fluorspar exports. China has lowered the export quota on fluorspar each year and, in October 2006, levied a ten percent duty tax on exports of fluorspar. (USTR 2006 Report at 36-37)
<i>Internal Policies Affecting Trade— Nondiscrimination</i>	<ul style="list-style-type: none"> China continued to discriminate in the application of SPS measures. Other Potential Subjects for WTO Consultation and Dispute Settlement Process	
Category—Issues	Problem
	<p>fraud) while importers must pay the full VAT.</p> <ul style="list-style-type: none"> • China continued to apply preferential import duties and VAT treatment to certain products (particularly from Russia). (USTR 2006 Report at 40-41)
<i>Internal Policies Affecting Trade—Consumption Taxes</i>	<ul style="list-style-type: none"> • The effective consumption tax rate on imported products (e.g., spirits/alcoholic beverages, tobacco, cosmetics and skin/hair care preparations, jewelry, fireworks, rubber, motorcycles and automobiles) is substantially higher than the rate applied to domestic products because China uses different tax bases to compute consumption taxes for domestic and imported products. (USTR 2006 Report at 41)
<i>Internal Policies Affecting Trade—Subsidies</i>	<ul style="list-style-type: none"> • China's subsidies notification is conspicuously incomplete, failing to notify any subsidies China's state-owned banks or provincial and local government authorities may have made. Moreover, China failed to commit to withdrawal of apparently prohibited subsidies it did notify, and did not notify other seemingly prohibited subsidies. These subsidies impact a broad array of industries and include both export subsidies and import subsidies. (USTR 2006 Report at 41-43)
<i>Internal Policies Affecting Trade—Price Controls</i>	<ul style="list-style-type: none"> • China continued to subject certain products and services to government-set pricing (including pharmaceuticals, tobacco, natural gas and certain telecommunications services), and other products and services to government-guidance pricing (including gasoline, kerosene, diesel fuel, fertilizer, cotton, various grains, various forms of transportation services, certain professional services, and certain telecommunications services), in apparent contravention of its commitment to not restrict the level of imports of goods or services with the use of price controls. (USTR 2006 Report at 43)
<i>Internal Policies Affecting Trade—Standards, Technical Regulations and Conformity Assessment Procedures</i>	<ul style="list-style-type: none"> • Despite China's changes to its standards testing regime, in some sectors, foreign products are tested in specially designated laboratories that are separate from those laboratories used to test domestic products. This disparate testing can lead to uneven treatment. Furthermore, some of the regulations dictate only that products are to be inspected upon entry into China's customs territory, without specifying whether or how the regulations apply to domestic producers. • China's notifications of proposed technical regulations and conformity assessment procedures have been submitted almost solely by two agencies, AQSIQ or SAC; measures from other agencies that seemingly require notification (e.g., Ministry of Health, Ministry of Information (MII), State Environmental Protection Administration (SEPA) and the State Food and Drug Administration) have not been included. Thus, measures from such agencies have been enacted without first having been subject to comment from foreign companies, and without providing for transition periods during which foreign companies may make any required modifications. • When TBT measures have been notified, in some cases, the comment periods have been unacceptably short, and/or the comments disregarded. • MII's attempts to adopt the Administrative Measures for Controlling

CHINA'S COMPLIANCE WITH WTO COMMITMENTS AND OBLIGATIONS: 2005-2007 UPDATE
TRADE LAWYERS ADVISORY GROUP
SEPTEMBER 2007

Other Potential Subjects for WTO Consultation and Dispute Settlement Process	
Category—Issues	Problem
	<p>Pollution Caused by Electronic Information Products in 2006 are of particular concern. Foreign stakeholders have not had adequate opportunity to comment or request clarification on the proposals, which, though modeled after an existing European Union regulation, differs from it markedly. The regulation does not address fundamental information such as the specific products to be covered, labeling and marking requirements, maximum limits of hazardous substances and acceptable testing methodologies, leaving U.S. companies fearful that they will not have time to adapt their products to China's new conditions.</p> <ul style="list-style-type: none"> • In 2005 and 2006, China continued to develop unique requirements in some sectors even where there are well-established international standards (e.g., autos, telecommunications equipment, Internet protocols, wireless local area networks, radio frequency identification tag technology, audio and video coding, and fertilizer). • Despite China's pledge to suspend indefinitely its proposed implementation of WAPI as a mandatory standard, it declared in December 2005 that products incorporating the WAPI standard should be given preference in government procurement. • China continued to exert pressure on Chinese businesses to select China's 3G telecommunications standard, even declaring in February 2006 that TD-SCDMA is the "national standard" for 3G telecommunications, despite promises to the contrary in 2004, and despite renewing those promises in April 2006. • USTR continued to monitor draft regulations, public statements by Chinese officials and the ad hoc approaches of some Chinese standards organizations that indicate China may begin requiring foreign companies to trade their patented technologies, royalty-free, for the chance to participate in developing standards. • China has established one safety mark ("China Compulsory Certification" or "CCC" mark), issued to both foreign and domestic products. The CCC mark regulation lacks clarity, the CC mark is applied inconsistently, and the certification requirements are duplicative. • China has granted over one hundred accreditations to test and certify for the CCC mark to Chinese enterprises. Despite national treatment commitments for accreditation, China has not granted accreditation to any foreign conformity assessment bodies, nor has it created any alternatives that are less trade-restrictive (e.g., recognition of a supplier's declaration of conformity). • China has entered into one Memorandum of Understanding (MOU) with a U.S. conformity assessment entity for follow-up inspections only, but refuses to grant any more to U.S. entities, claiming it is only permitting one MOU per country. However, Japan purportedly has two such MOUs (Germany has one). • China maintains its duplicative certification requirements for imported medical equipment, despite having committed to eliminate them. (USTR 2006 Report at 44-49)

CHINA'S COMPLIANCE WITH WTO COMMITMENTS AND OBLIGATIONS: 2005-2007 UPDATE
TRADE LAWYERS ADVISORY GROUP
SEPTEMBER 2007

Other Potential Subjects for WTO Consultation and Dispute Settlement Process	
Category—Issues	Problem
<i>Other Internal Policies—State-Owned and State-Invested Enterprises</i>	<ul style="list-style-type: none"> • In 2005, some U.S. companies began to question China's role in the choices of state-owned enterprises considering foreign acquisitions, especially in the oil and gas sectors. • China added to U.S. companies' concerns in 2006 with the issuance of several regulations limiting the power of state-owned and state-invested enterprises to receive foreign investment. (USTR 2006 Report at 51)
<i>Other Internal Policies—Government Procurement</i>	<ul style="list-style-type: none"> • China has demonstrated a clear preference for domestic products incorporating the WAPI standard. • In early 2006, China introduced plans for its science and technology sectors which include preferences for the purchase of domestic goods as a valuable industrial policy tool, despite having acknowledged in 2005 U.S. concerns regarding proposed restrictions on the purchase of foreign software by central and local governments. (USTR 2006 Report at 51-54)
<i>Investment</i>	<ul style="list-style-type: none"> • China continued to encourage technology transfer, and effectively required it in practice in many areas. • Chinese officials continued to consider factors such as export performance and local content when making investment approval decisions. • China continued to prohibit the production and development of genetically-modified plant seeds, an exception to China's progress in opening up other sectors not covered in its accession agreement to foreign investment. • China continued to disregard its foreign investment commitments with regard to the importation of books, newspapers, periodicals, electronic publications, and audio and video products. • In June 2006, China issued a measure which promotes the expansion and development of the domestic market share in 16 categories of equipment manufacturing. The measure has a dual approach: <ul style="list-style-type: none"> ○ It imposes preferential import duties on parts and research and development materials, encourages domestic procurement of new major technical equipment, establishes a fund for capital market financing for domestic businesses, and requires strict assessment of imports. ○ It contemplates new restrictions on foreign investment in these sectors, including new rules that bolster government control of equipment and machinery imports and restrict foreign majority ownership or control. • In August 2006, China issued new mergers and acquisitions measures that fortify MOFCOM's supervisory role over foreign investment and give it the authority to determine whether the value of a domestic acquisition target has been properly assessed. (USTR 2006 Report at 54-59)
<i>Investment—Steel and Iron</i>	<ul style="list-style-type: none"> • In July 2005, China issued its Steel and Iron Industry Development Policy, which limits foreign investment in several ways: <ul style="list-style-type: none"> ○ Foreign investors are required to have proprietary technology or intellectual property, even though they may not have a controlling share in steel or iron industries; this results in a de facto technology transfer

Category—Issues	Problem
	<p>requirement, in contravention of China's commitments.</p> <ul style="list-style-type: none"> ○ It violates the principle of national treatment by discriminating against foreign equipment and technology imports. ○ It provides for various types of government financial support for steel and iron products that use domestic equipment, encouraging local content use. ○ In direct contradiction to China's commitment in its accession agreement not to condition the right of investment or importation on the absence of competing domestic producers, this policy further requires the use of domestically produced equipment and technologies whenever domestic supplies are available. ○ It dictates the number and size of steel producers in China, their locations, the types of products that they may produce, and the technology to be used. (USTR 2006 Report at 56-57)
<i>Agriculture— Biotechnology Regulations</i>	<ul style="list-style-type: none"> ● Unnecessary and onerous approval requirements are still in place (prior to submission in China for approval, a product must first be approved in the U.S.; new applications are limited to two per year). ● Lack of clarity remained on specifications applicable to products with multiple traits, and China still imposes duplicative and often unprecedented testing requirements. (USTR 2006 Report at 61-63)
<i>Agriculture—Sanitary and Phytosanitary</i>	<ul style="list-style-type: none"> ● Through the SPS Agreement, China committed that SPS measures would address legitimate scientific-based concerns, not discriminate arbitrarily, and not be disguised restrictions on trade. ● Without offering any scientific rationale, China maintained its ban on imports of U.S. cattle, beef and processed beef products, despite the U.S. having provided China with comprehensive information on its internationally approved BSE-related surveillance and mitigation measures. ● Two raw meat and poultry plants remained de-listed in 2006 without scientific justification from China. ● In 2005 and 2006, China continued to uphold maximum residue levels (MRLs) for certain heavy metals and other residues that do not conform to Codex or other international standards. Moreover, China's enforcement of zero tolerance rules for some residues contradicts Codex guidelines which have been adopted by many of China's major trading partners. ● In 2006, China banned the importation of heat-treated and cooked poultry and poultry products, in contravention of the OIE's position that products heat-treated to neutralize the AI virus should not be banned. ● China's imposition of a maximum residue level (MRL) for selenium that is below the international standard threatens all U.S. wheat exports to China. ● USTR notes that China has continued to impose overly restrictive standards that block imports of many U.S. processed food products. The banned food additives are widely used in other countries and are approved by the World Health Organization. ● In July 2005, China notified its proposed Hygienic Standard for Uses of Food

	<p>domestic insurers new branch approvals on a concurrent basis, despite assurances to the U.S. that it would stop this unfair practice.</p> <ul style="list-style-type: none"> ○ Uncertainty remains concerning China's reinsurance regulations, particularly with regard to whether insurers in China must offer cessions to domestic reinsurers that would not conform to China's WTO commitments. (USTR 2006 Report at 83-85)
<i>Services—Financial Services—Credit Cards</i>	<ul style="list-style-type: none"> • China continues to restrict foreign credit card companies' access to the Chinese market. • Banks in China may only issue a credit card with a foreign logo on it if the card also carries the logo of China Union Pay (CUP), a body created by the PBOC and owned by participating Chinese banks. • Foreign credit card companies' networks may only be used to process foreign currency transactions; all RMB transactions must go through CUP's network. • PBOC-backed CUP proposals issued in 2006 are apparently designed to solidify CUP's hold on the credit card section by designating CUP as the sole provider of payment and money transmission services for Chinese consumers for RMB processing, and barring other providers from entering this market. (USTR 2006 Report at 85-86)
<i>Services—Financial Services—Financial Information Services</i>	<ul style="list-style-type: none"> • To date, China has not established an autonomous regulator for the financial information services sector, continuing to rely on Xinhua, the state news agency and a major market competitor, to perform regulatory oversight. • Xinhua's issuance of new rules in September 2006 caused concern in the U.S. and elsewhere. Among other things, the new rules contravene China's national treatment commitments by barring foreign providers of financial information services from engaging directly with domestic Chinese clients. <ul style="list-style-type: none"> ○ Such foreign suppliers must go through a Xinhua-designated agent; Xinhua has designated one agent—a Xinhua affiliate. ○ Such restrictions do not apply to domestic providers of financial information services, and curtail rights foreign providers had enjoyed since 1996, before China's WTO's accession. ○ After immediate objections from the U.S. and EC, Xinhua stated that the new rules would not apply to foreign providers of financial information services until it issued implementing rules. (USTR 2006 Report at 86-87)
<i>Services—Telecommunication Services</i>	<ul style="list-style-type: none"> • High capital requirements (especially for basic telecommunications services) remain, effectively barring entry for many potential foreign suppliers. • China has not established an independent regulator, depending on the nominally separate MII, which continues to exert extensive influence and control over telecommunications operations and uses its regulatory authority to disadvantage foreign firms. • MII retains restrictions on what services are eligible for classification as "value-added," relegating several telecommunication services to the "basic" category, which imposes a slower liberalization schedule and higher

CHINA'S COMPLIANCE WITH WTO COMMITMENTS AND OBLIGATIONS: 2005-2007 UPDATE
TRADE LAWYERS ADVISORY GROUP

Other Potential Subjects for WTO Consultation and Dispute Settlement Process	
Category—Issues	Problem
	<p>capitalization requirements. This classification system is in contrast to international norms and has limited U.S. telecommunications firms' access to the Chinese market.</p> <ul style="list-style-type: none"> • MII's licensing process remains very slow. As of its 2006 report, USTR was unaware of the completion of any domestic or foreign application for a license to provide basic services. (USTR 2006 Report at 88-90)
<i>Services—Construction and Related Engineering Services</i>	<ul style="list-style-type: none"> • The high minimum registered capital requirements imposed in previous rules remain. • Rules issued in 2006 include provisions that may restrict market access for U.S. and other foreign companies (e.g., they only temporarily suspend the foreign residency and personnel requirements and require two years of domestic experience for foreign companies applying for higher-level licenses). • Measures barring the same company from providing construction services and project management services on a single project have not been changed, though implementing rules have not been issued. U.S. companies often provide all of these services in combination. (USTR 2006 Report at 90-92)
<i>Services—Express Delivery Services</i>	<ul style="list-style-type: none"> • A draft of the Postal Law circulated in late 2006 contains potentially WTO-inconsistent provisions: <ul style="list-style-type: none"> ○ A minimum weight restriction on domestic and international letters weighing less than 150 grams; ○ Exclusion of foreign service providers from the domestic express delivery market; and ○ A tax to fund universal mail service in China. (USTR 2006 Report at 92-93)
<i>Legal Framework—Transparency</i>	<ul style="list-style-type: none"> • China's compliance with its commitment to establish or designate an official journal for publication of its trade-related laws is far from complete, with few government entities regularly publishing their trade-related measures in the MOFCOM Gazette. (USTR 2006 Report at 96)
<i>Legal Framework—Public Comment</i>	<ul style="list-style-type: none"> • China continued to be inconsistent in complying with its basic notice-and-comment commitment. • China's deficiency in providing translation of its trade-related laws and regulations persists. (USTR 2006 Report at 96-98)
<i>Legal Framework—Judicial Review</i>	<ul style="list-style-type: none"> • Judges without little, and in some cases, no legal training (grandfathered in after China began requiring judges to be appointed on the basis of merit, education and experience) remain in the judiciary. • Concern about the independence of China's judiciary persists, with many U.S. companies observing that Chinese judges are often influenced by political, government or business pressures, particularly outside of China's big cities. (USTR 2006 Report at 99-100)

IV. EFFECTIVENESS OF TRADE REMEDY RIGHTS TO ADDRESS TRADE PROBLEMS WITH CHINA AS IMPLEMENTED BY THE UNITED STATES

There are a number of trade remedy measures under U.S. law that may be employed to address trade problems with China. These measures include China-specific safeguards, remedies against currency misalignment, and countervailing and antidumping duties. This section reviews the extent to which these trade remedies have been or could be used.

A. THE USE OF CHINA-SPECIFIC SAFEGUARDS IN THE UNITED STATES

1. China Accession Provisions

China's protocol of accession, as well as the working party report, included two special safeguard provisions that are available to all WTO Members during transitional periods and that are applicable to China specifically. First, WTO Members may apply a product-specific transitional safeguard to deal with import surges of particular products from China that cause market disruption. Second, WTO Members may apply a special textile safeguard provision in order to deal with market disruption due to increased imports of Chinese textile and apparel products.

a. *Product-Specific Safeguards*

China's accession protocol provides for a general "product-specific special safeguard" measure, which is applicable to any type of product (*i.e.*, industrial and agricultural goods) and is available to the U.S. (and other WTO Members) for 12 years following China's accession to the

WTO (*i.e.*, until December 11, 2013).²⁰³ This provision allows WTO Members to take action to restrain imports of Chinese goods that cause or threaten to cause “market disruption” to the domestic industry producing such goods.

The transitional product-specific safeguard is unique to China. No other acceding country (either to GATT or the WTO) has been subject to a transitional product-specific safeguard. Members insisted, however, that because China acceded to the WTO before it had achieved all necessary trade reformations or met all WTO obligations, a product-specific safeguard mechanism was necessary to protect other WTO Members from increased imports from China during China's transitional period.

The product-specific safeguard’s injury standard is “market disruption,” which exists wherever imports of an article, like or directly competitive with an article produced by the domestic industry, are increasing rapidly, either absolutely or relatively, so as to be a significant cause of material injury, or threat of material injury to the domestic industry.²⁰⁴ This standard is substantially less than the “serious injury” standard of a typical safeguard action.

The Protocol provides that before a product-specific safeguard measure is applied, a consultation process should take place to see if the parties can reach a mutually satisfactory solution.²⁰⁵ If consultations succeed, China “shall take such action as to prevent or remedy the market disruption.”²⁰⁶ If, however, consultations do not succeed within 60 days, the WTO

²⁰³ Protocol on the Accession of the People's Republic of China, WT/L/432, art. 16 (23 November 2001).

²⁰⁴ *Id.* at art. 16.4.

²⁰⁵ *Id.* at art. 16.1.

²⁰⁶ *Id.* at art. 16.2.

Member may take action to prevent or remedy the market disruption by imposing a product-specific safeguard measure.²⁰⁷

Product-specific safeguard measures may be in place for two years where there has been a relative increase in imports, and three years where the increase is absolute. After these respective periods, however, China may “retaliate” by suspending substantially equivalent concessions or obligations under the WTO Agreement.²⁰⁸

b. Textile Safeguards

The working party report to China's accession established a special textile safeguard mechanism that is available to WTO Members through December 31, 2008.²⁰⁹ The safeguard is applicable to textile and apparel products covered by the Agreement on Textiles and Clothing (ATC) as of the date the WTO Agreement entered into force (January 1, 1995).

Paragraph 242 of the working party report sets out the terms of the special textile safeguard. If a WTO Member believes (and can show) that imports of certain Chinese textile and apparel products are “threatening to impede orderly development of trade in these products” due to “market disruption,” the WTO Member can request consultations with China “with a view to easing or avoiding such market disruption.”²¹⁰ The injury standard (“market disruption”) is less stringent than the “serious injury” test of a regular safeguard action.

²⁰⁷ *Id.* at art. 16.3.

²⁰⁸ *Id.* at art. 16.6.

²⁰⁹ Report of the Working Party on the Accession of China, WT/MIN(01)/3, paras. 241-242 (10 November 2001).

²¹⁰ *Id.* at para. 242(a).

Upon receipt of a request, China will “hold its shipments ... to a level no greater than 7.5 per cent (6 per cent for wool product categories) above the amount entered during the first 12 months of the most recent 14 months preceding” the request.²¹¹ Consultations would be held within 30 days of the request with the aim of reaching a "mutually satisfactory solution" within 90 days of the request.²¹² If no solution can be reached, consultations, and export restraints, continue.²¹³ Textile safeguards may be applied from the date that consultations are requested through December 31 of that year.²¹⁴ In general, no textile safeguard may last longer than one year unless it is reapplied through further consultations, or otherwise agreed to by China and the WTO member.²¹⁵

2. U.S. Application of China-Specific Safeguards

a. Product-Specific Safeguards

The China product-specific safeguard was enacted in U.S. law by Section 421 of the Trade Act of 1974, as amended, 19 U.S.C. § 2451. Section 421 permits U.S. domestic industries and workers adversely affected by increased imports from China to seek relief.²¹⁶

As of September 2007, there have been only six Section 421 investigations. The last active investigation was completed in October 2005. Of the six Section 421 investigations, the

²¹¹ *Id.* at para. 242(c).

²¹² *Id.* at para. 242(b).

²¹³ *Id.* at para. 242(d).

²¹⁴ *Id.* at para. 242(e). If, however, three or fewer months remain in that year, then the export restraints may stay in place for up to one year from the date of the request for consultations.

²¹⁵ *Id.* at para. 242(f).

²¹⁶ For a description of the substantive and procedural provisions of Section 421, see Terence P. Stewart, *China's Compliance With World Trade Organization Obligations: A Review Of China's 1st Two Years Of Membership*

CHINA'S COMPLIANCE WITH WTO COMMITMENTS AND OBLIGATIONS: 2005-2007 UPDATE
TRADE LAWYERS ADVISORY GROUP
SEPTEMBER 2007

ITC made an affirmative injury determination and recommended relief in four cases, and made a negative determination in two cases. However, none of the four affirmative determinations resulted in relief to a domestic industry because the President denied relief in each case. The following tables summarize the six Section 421 actions conducted to date.

Section 421 Investigations

Product	Investigation Initiated	ITC Determination	Recommended Relief	President's Determination
Pedestal actuators	August 19, 2002	Affirmative (3-2) October 18, 2002	Quotas	Denied relief on grounds of national economic interest (January 17, 2003)
Steel wire garment hangers	November 27, 2002	Affirmative (5-0) January 27, 2003	Additional duties	Denied relief on grounds of national economic interest (April 25, 2003)
Brake drums and rotors	June 6, 2003	Negative (5-0) August 5, 2003	Not applicable	Not applicable
Ductile iron waterworks fittings (DIWF)	September 5, 2003	Affirmative (6-0) December 4, 2003	3-year tariff-rate quota	Denied relief on grounds of national economic interest (March 3, 2004)
Innersprings	January 6, 2004	Negative (6-0) March 8, 2004	Not applicable	Not applicable
Circular Welded Non-alloy Steel Pipe	August 2, 2005	Affirmative (4-2) October 3, 2005	3-year tariff rate quota or import quota	Denied relief on grounds of national economic interest (December 30, 2005)

TA-421-01: PEDESTAL ACTUATORS FROM CHINA
<i>Petition Filed:</i> August 19, 2002, on behalf of Motion Systems Corp., Eatontown, NJ.
<i>Investigation Instituted:</i> effective August 19, 2002; Pedestal Actuators from China, 67 Fed. Reg. 54822 (August 26, 2002).

A Report Prepared for the U.S.-China Economic and Security Review Commission at 206-211 (March 19, 2004).

TA-421-01: PEDESTAL ACTUATORS FROM CHINA

ITC Injury Determination: Affirmative. On October 18, 2002, by a vote of 3-2, the USITC determined that pedestal actuators from the People's Republic of China are being imported into the United States in such increased quantities or under such conditions as to cause market disruption to the domestic producers of like or directly competitive products. *See* Pedestal Actuators from China, 67 Fed. Reg. 69557 (November 18, 2002).

ITC Remedy Recommendation: October 29, 2002. The Commission recommended import relief in the form of a quota.

- Commissioners Hillman and Miller recommended a quantitative import restriction for 3 years in the amount of 5,626 units in year 1; 6,470 units in year 2; and 7,440 units in year 3.
- Commissioner Koplan recommended a quantitative import restriction for 3 years in the amount of 4,425 units in year 1; 4,514 units in year 2; and 4,604 units in year 3.

The Commission transmitted its remedy proposals to the President and U.S. Trade Representative on November 7, 2002. *See* Pedestal Actuators from China, 67 Fed. Reg. 69557 (November 18, 2002).

Views of Commission: Pedestal Actuators from China, TA-421-1, USITC Pub. 3557 (November 2002).

President's Decision: On January 17, 2003, the President announced that he was not providing relief because he had determined that import relief was not in the national economic interest and that import relief would have an adverse impact on the United States economy clearly greater than the benefits of such action. The President provided the following reasons for his decision not to grant relief:

In determining not to provide import relief, I considered its overall costs to the U.S. economy. The facts of this case indicate that imposing the USITC's recommended quota would not likely benefit the domestic producing industry and instead would cause imports to shift from China to other offshore sources.

Even if the quota were to benefit the primary domestic producer, the cost of the quota to consumers, both the downstream purchasing industry and users of the downstream products, would substantially outweigh any benefit to producers' income. The USITC's analysis confirms this conclusion.

In addition, downstream industries are already under pressure to migrate production offshore to compete with lower-cost imports of finished products. Higher component costs resulting from import relief would add to this pressure. Given the significantly larger number of workers in the downstream purchasing industry when compared with the domestic pedestal actuator industry, I find that imposing import restrictions would do more economic harm than good.

Finally, a quota would negatively affect the many disabled and elderly purchasers of mobility scooters and electric wheelchairs, the primary ultimate consumers of pedestal actuators.

Memorandum of January 17, 2003—Presidential Determination on Pedestal Actuator Imports From the People's Republic of China, 68 Fed. Reg. 3155 (January 22, 2003).

TA-421-02: STEEL WIRE GARMENT HANGERS FROM CHINA

Petition Filed: November 27, 2002, on behalf of CHC Industries, Inc., Palm Harbor, FL; M&B Hangers Co., Leeds, AL; and United Wire Hanger Corp., South Hackensack, NJ.

Investigation Instituted: effective November 27, 2002; Certain Steel Wire Garment Hangers from China, 67 Fed. Reg. 72700 (December 6, 2002).

ITC Injury Determination: Affirmative. On January 27, 2003, by a vote of 5-0, the USITC determined that certain steel wire garment hangers from the People's Republic of China are being imported into the United States in such increased quantities or under such conditions as to cause market disruption to the domestic producers of like or directly competitive products. *See* Certain Steel Wire Garment Hangers from China, 68 Fed. Reg. 8926 (February 26, 2003).

ITC Remedy Recommendation: February 5, 2003. The Commission recommended import relief in the form of an additional duty.

- Commissioners Okun, Hillman, and Miller recommended relief in the form of an additional duty for 3 years: 25% year 1; 20% in year 2; and 15% in year 3. In addition, they recommended expedited consideration of trade adjustment assistance for firms and/or workers affected by the subject imports.
- Commissioner Bragg recommended relief in the form of an additional duty for 2 years: 20% year 1; 15% in year 2.
- Commissioner Koplan recommended relief in the form of an additional duty of 30% for 3 years. In addition, he recommended expedited consideration of trade adjustment assistance for firms and/or workers affected by the subject imports. *See* Certain Steel Wire Garment Hangers from China, 68 Fed. Reg. 8926 (February 26, 2003).

The Commission transmitted its remedy proposals to the President and U.S. Trade Representative on February 14, 2003. *See* Notice of Proposed Measure and Opportunity for Public Comment Pursuant to Section 421 of the Trade Act of 1974: Certain Steel Wire Garment Hangers From the People's Republic of China, 68 Fed. Reg. 10765 (March 6, 2003).

Views of Commission: Certain Steel Wire Garment Hangers from China, TA-421-2, USITC Pub. 3575 (February 2003).

President's Decision: On April 25, 2003, the President announced that he was not providing relief because he had determined that import relief was not in the national economic interest and that import relief would have an adverse impact on the United States economy clearly greater than the benefits of such action. The President provided the following reasons for his decision not to grant relief:

The facts of this case indicate that imposing additional tariffs on Chinese imports would affect domestic producers unevenly, favoring one business strategy over another. While most of the producers would likely realize some income benefits, additional tariffs would disrupt the long-term adjustment strategy of one major producer, which is based in part on distribution of imported hangers, and cause that producer to incur substantial costs.

In addition, most domestic producers, including the petitioners, have begun to pursue adjustment strategies. While these strategies have included consolidation, modernization of production facilities, and expansion into complementary products and services, domestic producers are also expanding their use of imports. Indeed, a substantial part of the surge in imports during the most recent period

TA-421-02: STEEL WIRE GARMENT HANGERS FROM CHINA

measured was brought in by domestic producers themselves, including the petitioners.

Moreover, after 6 years of competing with Chinese imports, domestic producers still account for over 85 percent of the U.S. wire hanger market. With this dominant share of the market, domestic producers have the opportunity to adjust to competition from Chinese imports even without import relief.

Furthermore, there is a strong possibility that if additional tariffs on Chinese wire hangers were imposed, production would simply shift to third countries, which could not be subject to section 421's China-specific restrictions. In that event, import relief would have little or no benefit for any domestic producer.

Additional tariffs would have an uneven impact on domestic distributors of wire hangers. For some distributors, the tariffs would likely lead to some income benefits. However, the tariffs would likely harm other distributors in light of their business models.

Additional tariffs would also likely have a negative effect on the thousands of small, family-owned dry-cleaning businesses across the United States that would either have to absorb the resulting increased costs or pass them on to their customers.

Memorandum of April 25, 2003—Presidential Determination on Wire Hanger Imports from the People's Republic of China, 68 Fed. Reg. 23017 (April 29, 2003).

TA-421-03: BRAKE DRUMS AND ROTORS FROM CHINA

Petition Filed: June 6, 2003, on behalf of the Coalition for the Preservation of American Brake Drum and Rotor Aftermarket Manufacturers (consisting of Dana Corp. (Brake and Chassis Division)/Brake Parts, Inc.; Federal Mogul Corp.; and Thyssen Krupp Waupaca/Waupaca Foundry, Inc.).

Investigation Instituted: effective June 6, 2003; Certain Brake Drums and Rotors from China, 68 Fed. Reg. 35702 (June 16, 2003).

ITC Injury Determination: Negative. On August 5, 2003, by a vote of 5-0, the USITC determined that certain brake drums and rotors from the People's Republic of China are not being imported into the United States in such increased quantities or under such conditions as to cause market disruption to the domestic producers of like or directly competitive products. *See* Certain Brake Drums and Rotors from China, 68 Fed. Reg. 48938 (August 15, 2003).

ITC Remedy Recommendation: None.

Views of Commission: Certain Brake Drums and Rotors from China, TA-421-3, USITC Pub. 3622 (August 2003).

President's Decision: None.

TA-421-04: DUCTILE IRON WATERWORKS FITTINGS FROM CHINA

Petition Filed: September 5, 2003, on behalf of McWane, Inc., Birmingham, AL, and three subsidiaries: Clow Water Systems Co., Coshocton, OH, Tyler Pipe Co., Tyler, TX, and Union Foundry Co., Anniston, AL.

Investigation Instituted: effective September 5, 2003; Certain Ductile Iron Waterworks Fittings from China, 68 Fed. Reg. 54010 (September 15, 2003).

ITC Injury Determination: December 4, 2003. By a vote of 6-0, the USITC determined that certain ductile iron waterworks fittings from the People's Republic of China are being imported into the United States in such increased quantities or under such conditions as to cause market disruption to the domestic producers of like or directly competitive products. *See* Certain Ductile Iron Waterworks Fittings from China, 68 Fed. Reg. 69421 (December 12, 2003).

ITC Remedy Recommendation: December 15, 2003. The Commission recommended import relief in the form of a tariff-rate quota for a three-year period:

- 50% tariff on imports exceeding 14,324 short tons in year 1;
- 40% tariff on imports exceeding 15,398 short tons in year 2; and
- 30% tariff on imports exceeding 16,553 short tons in year 3.

The Commission further recommended expedited consideration of trade adjustment assistance for firms and/or workers affected by the subject imports.

The Commission transmitted a report on its determination, as well as its remedy proposals, to USTR on December 24, 2003.

Views of Commission: Certain Ductile Iron Waterworks Fittings from China, TA-421-4, USITC Pub. 3657 (December 2003).

President's Decision: On March 3, 2004, the President announced that he was not providing relief because he had determined that import relief was not in the national economic interest and that import relief would have an adverse impact on the United States economy clearly greater than the benefits of such action. The President provided the following reasons for his decision not to grant relief:

The facts of this case indicate that imposing the USITC's recommended tariff-rate quota remedy or any other import relief available under section 421 would be ineffective because imports from third countries would likely replace curtailed Chinese imports. The switch to third country imports could occur quickly because the major U.S. importers already import substantial quantities from countries such as India, Brazil, Korea, and Mexico. Because importers' existing inventories of imports will likely cover demand for approximately 6 to 12 months from the imposition of import relief, a switch from China to alternative import sources would not likely lead to significant additional demand for domestically produced pipe fittings, even accounting for a time lag in making that switch. Under these circumstances, import relief would provide no meaningful benefit to domestic producers.

In addition, import relief would cost U.S. consumers substantially more than the increased income that could be realized by domestic producers. Indeed, the USITC estimated that its recommended remedy would generate a negative net domestic welfare effect of between \$2.3 million and \$3.7 million in the first year alone.

While not necessary in reaching my determination that imposing import relief would have an adverse

TA-421-04: DUCTILE IRON WATERWORKS FITTINGS FROM CHINA

impact on the United States economy clearly greater than the benefits, it is also worth noting two additional points:

- First, evidence suggests that domestic producers enjoy a strong competitive position in the U.S. market, and in fact the largest domestic producer recently announced price increases nationwide ranging from 8 to 35 percent. The two smaller domestic producers and the major U.S. importers have publicly indicated that they would follow these price increases.
- Second, in 2002 and 2003, imports of this product have been relatively stable in volume terms and have shown a slight decline in value terms.

The circumstances of this case make clear that the U.S. national economic interest would not be served by the imposition of import relief under section 421. I remain fully committed to exercising the important authority granted to me under section 421 when the circumstances of a particular case warrant it.

Memorandum of March 3, 2004—Presidential Determination on Imports of Certain Ductile Iron Waterworks Fittings From the People's Republic of China, 69 Fed. Reg. 10597 (March 8, 2004).

TA-421-05: INNERSPRINGS FROM CHINA

Petition Filed: January 6, 2004, on behalf of the U.S. member companies of The American Innerspring Manufacturers (AIM), Memphis, TN. Petitioning firms include Atlas Spring, Gardena, CA; Hickory Springs Manufacturing Co., Hickory, NC; Leggett & Platt, Carthage, MO; and Joseph Saval Spring & Wire Co., Inc., Taylor, MI.

Investigation Instituted: effective January 6, 2004; Innersprings from China, 69 Fed. Reg. 2002 (January 13, 2004).

ITC Injury Determination: Negative. On March 8, 2004, by a vote of 6-0, the USITC determined that uncovered innerspring units from the People's Republic of China are not being imported into the United States in such increased quantities or under such conditions as to cause market disruption to the domestic producers of like or directly competitive products. See ITC News Release 04-022: ITC Announces Determination in China Safeguard Investigation Concerning Uncovered Innerspring Units from China (March 8, 2004).

ITC Remedy Recommendation: None.

Views of Commission: Uncovered Innerspring Units from China, TA-421-5, USITC Pub. 3676 (March 2004).

President's Decision: None.

TA-421-06: CIRCULAR WELDED NON-ALLOY STEEL PIPE FROM CHINA

Petition Filed: August 2, 2005, on behalf of the Allied Tube and Conduit Corp.; IPSCO Tubulars, Inc.; Maruichi American Corp.; Maverick Tube Corp.; Sharon Tube Company; Western Tube and Conduit Corp.; Wheatland Tube Company; The United Steelworkers.

Investigation Instituted: effective August 2, 2005; Circular Welded Non-Alloy Steel Pipe from China, 70 Fed. Reg. 46543 (August 10, 2005).

ITC Injury Determination: Affirmative. On October 7, 2005, by a vote of 4-2, the USITC determined that certain circular welded non-alloy steel pipe from the People's Republic of China is being imported into the United States in such increased quantities or under such conditions as to cause market disruption to the domestic producers of like or directly competitive products. See Circular Welded Non-alloy Steel Pipe from China, 70 Fed. Reg. 58746 (October 7, 2005).

ITC Remedy Recommendation: October 11, 2005. The Commission recommended import relief in the form of a quota.

- Commissioners Lane and Koplán recommended a quantitative import restriction for three years in the amount of 160,000 short tons.
- Commissioners Aranoff and Hillman recommended a tariff-rate quota for a three year period:
 - A 25% tariff on imports above the quota level;
 - The within-quota quantity set at 267,468 short tons in year one, and increasing by a rate of five percent in year two and ten percent in year three.

The Commission further recommended expedited consideration of trade adjustment assistance for firms and/or workers affected by the subject imports.

Views of Commission: Circular Welded Non-Alloy Steel Pipe from China, TA-421-6, USITC Pub. 3807 (October 2005).

President's Decision: On December 30, 2005, the President announced that he was not providing relief because he had determined that import relief was not in the national economic interest and that import relief would have an adverse impact on the United States economy clearly greater than the benefits of such action. The President provided the following reasons for his decision not to grant relief:

The facts of this case indicate that any import relief, including either of the USITC's proposed remedies, is likely to be ineffective because of the extent to which imports from third countries would likely replace curtailed Chinese imports. A large number of third countries -- the USITC documents more than 50 of them -- supply the U.S. market with steel pipe. Although antidumping duties currently apply to imports from eight of those countries, there are many other countries currently supplying steel pipe to the U.S. market that could fill the void created by curtailed Chinese imports. Under these circumstances, import relief would likely not provide a meaningful benefit to domestic producers.

In addition, imposing import relief would cost U.S. consumers substantially more than the increased income that could be realized by domestic producers. According to USITC estimates, the USITC's recommended quota remedy would generate costs for U.S. consumers five times greater than the additional income that could be realized by domestic producers. Under the USITC's recommended tariff-rate quota remedy, the costs would be four times greater than the income generated by domestic producers.

TA-421-06: CIRCULAR WELDED NON-ALLOY STEEL PIPE FROM CHINA

While the particular circumstances of this case make clear that the U.S. national economic interest would not be served by the imposition of import relief under section 421, I remain fully committed to exercising the important authority granted to me under section 421 when the circumstances of a particular case warrant it.

I hereby direct the Secretary of Commerce and the Secretary of Labor to expedite consideration of any Trade Adjustment Assistance applications received from domestic producers or their workers, consistent with their statutory mandates.

Memorandum of December 30, 2005—Presidential Determination on Imports of Circular Welded Non-Alloy Steel Pipe from the People's Republic of China, 71 Fed. Reg. 869 (January 5, 2006).

b. Textile Safeguards

The special China textile safeguard set out in the Working Party Report to China's WTO accession became effective upon China's entry into the WTO on December 11, 2001. In the United States, the textile safeguard was not implemented by statute. Rather, the textile safeguard was implemented by procedural rules issued by the Committee to Implement Textile Agreements ("CITA"), the official U.S. government entity responsible for administering the *Agreement on Textiles and Clothing* ("ATC"). In May 2003, CITA issued the procedural rules for bringing a special safeguard action to seek relief from Chinese imports.^{217 218} With the expiration of the ATC on January 1, 2005, and of the textile and apparel import quotas contained therein, the textile-specific safeguard measure in China's WTO Accession Agreement became the sole

²¹⁷ See Procedures for Considering Requests from the Public for Textile and Apparel Safeguard Actions on Imports from China, 68 Fed. Reg. 27787 (May 21, 2003).

²¹⁸ For a description of CITA's procedural rules for a China textile safeguard action, see Terence P. Stewart, *China's Compliance With World Trade Organization Obligations: A Review Of China's 1st Two Years Of Membership*; A Report Prepared for the U.S.-China Economic and Security Review Commission at 202-206 (March 19, 2004).

CHINA'S COMPLIANCE WITH WTO COMMITMENTS AND OBLIGATIONS: 2005-2007 UPDATE
TRADE LAWYERS ADVISORY GROUP
SEPTEMBER 2007

channel through which the U.S. textile and apparel industry could seek to limit the impact of China's textile and apparel products into the U.S.

After China's WTO accession, U.S. textile groups filed numerous requests for textile safeguards, including petitions based on the threat of market disruption that would result from the lifting of import quotas on January 1, 2005.²¹⁹ CITA made affirmative determinations and imposed safeguard measures in response to thirteen of these petitions (including for re-application of quotas – category 349/649, brassieres).²²⁰ The following table, compiled from CITA's Federal Register notices, summarizes the petitions filed with CITA and CITA's determinations.²²¹

CHINA TEXTILE SAFEGUARD PETITIONS AND CITA DETERMINATIONS		
Category	Description	Determination
222	Knit Fabric	Safeguard quota in effect from 12/24/2003 to 12/23/2004. Safeguard re-applied for in 2005—CITA consideration terminated 11/23/2005. Included in U.S.-China three-year agreement limiting Chinese imports through 2008.
226	Cheesecloth, Batistes, Lawns/Voile	CITA agreed to consider safeguard request on 10/11/2005. Consideration terminated 11/23/2005.
301	Combed Cotton Yarn	Quota in effect 05/27/2005-12/31/2005. CITA agreed to consider re-application 10/11/2005—CITA consideration and determination terminated 11/23/2005. Included in U.S.-China three-year agreement limiting Chinese imports through 2008.
332/432/632 (part)	Cotton, Wool and MM Fiber Socks	Quota in effect 10/29/2004-10/28/2005. CITA review period for re-application request extended through 12/31/2005—CITA consideration terminated 11/23/2005. Included in U.S.-China three-year agreement limiting Chinese imports through 2008.
338/339	Cotton Knit Shirts, Blouses	Quotas in effect 05/23/2005-12/31/2005. CITA agreed to consider re-application 10/11/2005—CITA consideration and determination terminated 11/23/2005. Included in U.S.-China three-year agreement limiting Chinese imports through 2008 (with some product exclusions).
340/640	Cotton/MMF Non-	Quotas in effect 05/27/2005-12/31/2005. CITA agreed to consider re-

Source: CITA website, http://otexa.ita.doc.gov/fr.htm .		

On December 1, 2004, the U.S. Association of Importers of Textiles and Apparel filed suit in the Court of International Trade (CIT) challenging CITA's practice of accepting textile safeguard petitions on the basis of a "threat" of increased imports and requesting the issuance of a preliminary injunction enjoining CITA from granting relief to such petitioners. On December 30, 2004, the CIT granted the preliminary injunction and issued an order enjoining CITA from proceeding on the threat-based safeguard requests it had received.²²² The Court of Appeals for the Federal Circuit stayed this injunction on April 27, 2005.²²³

On May 5, 2005, CITA resumed its consideration of the twelve threat-based petitions for safeguard action that it had received between October and December 2004, and issued affirmative determinations in four of those cases (men's and boys' cotton and man-made fiber shirts, not knit (category 340/640), man-made fiber trousers (category 647/648), man-made fiber

knit shirts and blouses (category 638/639), and combed cotton yarn (category 301)).²²⁴ CITA also accepted for consideration industry petitions for investigation of market disruption for three of these product categories (men's and boys' cotton and man-made fiber shirts, not knit; man-made fiber trousers; and man-made fiber knit shirts and blouses).²²⁵

As a result of consultations with the domestic textile and apparel industry and Congress regarding a possible broader agreement with China on imports of Chinese textile and apparel products, CITA announced, in August 2005, extensions of its 60 day time period to issue determinations with regard to textile safeguard petitions.²²⁶ On November 8, 2005, the U.S. and China finalized a Memorandum of Understanding regarding textile and apparel trade (Textile MOU); on November 23, 2005, CITA terminated further consideration of all textile safeguard petitions pending on the date of the Textile MOU.^{227 228}

By setting import quotas in 34 textile and apparel product categories for a three-year period, the Textile MOU addresses the U.S. textile industry's call for a comprehensive bilateral agreement that "provide[s] relief before the industry suffers the job losses and declines required

CITA published the agreed levels of imports for 2006 in the Federal Register and, pursuant to the MOU, subsequently adjusted the import limits on several occasions.²³³

In the MOU, the United States also consented to permit entry of Chinese products (except socks) which had been denied entry in 2005 as a result of safeguard implementation, and agreed not to charge these products against the annual levels specified in the Textile MOU.²³⁴ With respect to any future safeguard actions pursuant to Paragraph 242 of China's WTO accession agreement, the U.S. agreed to: (1) not implement any safeguard actions concerning textile and apparel products (a) integrated into the GATT before January 1, 2002, or (b) covered by the

Reg. 74777 (December 16, 2005) (establishing import limits for 2006); CITA, *Establishment of Agreed Import Levels for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in the People's Republic of China*, 71 Fed. Reg. 62999 (October 27, 2006) (establishing import limits for 2007); CITA, *Adjustment of Import Limits for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in the People's Republic of China*, 72 Fed. Reg. 44126 (August 7, 2007) (adjusting 2007 import limits).

²³⁴ See Textile MOU at Annex I.

Textile MOU; and (2) exercise restraint in the implementation of safeguards on any products not subject to agreed-upon levels.²³⁵ To facilitate the enforcement of and compliance with the above provisions, the United States and China agreed to establish an Electronic Visa Information System (ELVIS).²³⁶

3. Effectiveness of and Possible Modifications to China-Specific Safeguards

a. Product-Specific Safeguards

To date, the China-specific product-specific safeguard remedy (Section 421 action) has not provided relief to any U.S. industry. The expectations of its utility as a measure to provide relief to U.S. industries injured from a surge in Chinese imports have not been realized.

Of the six cases brought so far, the International Trade Commission found in four cases that the domestic industry was injured by a surge in Chinese imports and recommended relief. However, the President chose in each instance to deny relief.

It has been more than two years since the last Section 421 petition was filed. It is likely that the absence of Section 421 petitions over the last two years is not due to a decrease in Chinese imports (which have continued to increase rapidly), but because U.S. industries have observed the results of the first six cases and have judged that the prospective relief to be gained from a petition is not worth the cost and time necessary to bring it. Indeed, after the Administration's denial of relief in the most recent 421 investigation (Circular Welded Non-alloy Steel Pipe), some petitioners noted that "the White House argument that quotas or tariffs would

²³⁵ See Textile MOU at para. 7.

hurt U.S. consumers could be used to justify rejections of any 421 petition brought forward, and that it shows that the Bush Administration is opposed to any use of the safeguard.”²³⁷

Moreover, domestic parties may also have been discouraged from bringing 421 petitions by the political tenor of the ultimate decision making process as they have seen the effect of lobbying by China in each of the affirmative 421 determinations to discourage the President from granting relief.²³⁸ The President's failure to grant relief under Section 421 has been criticized by legal observers and legislators.²³⁹ The element of discretion granted to the President as the ultimate decision maker regarding relief under Section 421 has created constant uncertainty in the application of the statute, and limits its effectiveness. To address this issue, Senators Baucus

²³⁶ See Textile MOU at Annex III.

²³⁷ See *White House Denies Section 421 Relief in Standard Pipe Case*, InsideTrade.com (January 4, 2006).

²³⁸ See, e.g., *Chinese Official Complains about China-Specific Safeguards*, ChinaTradeExtra.com, posted December 6, 2002 (China's Vice-Minister for Trade, Long Yongtu, came to Washington and met with Commerce Department officials in December 2002, arguing that the use of Section 421 would undermine China's market access to the United States); *U.S. Holds Door Open to Settlement in First China-Specific Safeguard Case*, INSIDE US-CHINA TRADE, November 13, 2002 (indicating that some administration officials believed imposition of a safeguard measure on Chinese imports could have negative political consequences in that "a decision to impose the ITC remedy could lead to increased use of the China-specific safeguard, which could further complicate the bilateral trade relationship"); *Chinese Officials Meet in U.S. to Argue Against 421, Furniture AD Case*, INSIDE US-CHINA TRADE, January 14, 2004 ("Officials from China's Ministry of Commerce met this week with officials in the U.S. Trade Representative's Office in an effort to convince them to reject recommendations from the International Trade Commission that the U.S. impose a tariff, a quota or a combination of both in order to limit imports of Chinese ductile iron waterworks fittings (DIWF). Informed sources said MOFCOM officials would meet with USTR yesterday (Jan. 13), and said the MOFCOM delegation consisted of officials from its Bureau of Fair Trade."); *China Questions Divided ITC Vote at Section 421 Hearing*, INSIDE US-CHINA TRADE, November 30, 2005 (referring to statements by a lawyer for Chinese steel pipe producers, "the three-way division could be seen as a 'weak' decision by the ITC, and basing a decision to impose relief on this vote is 'guaranteed to invite trouble in the WTO.'").

²³⁹ See, e.g., Eliza Patterson, *The U.S. President, Once Again, Rejects Import Sanctions Against China*, ASIL INSIGHTS (May 2003) (observing that the President's denial of relief in the second Section 421 case concerning steel wire garment hangers could be viewed as "an overtly political decision by the President made under pressure from the Chinese government and a signal that this administration has no intention of ever granting relief under Section 421."); *Administration Keeps Unbroken Record of Not Standing Up for American Workers and Businesses Against Injurious Imports from China - Puts Another 5000 U.S. Manufacturing Jobs at Peril*, Comments of Rep. Sander Levin criticizing President Bush's decision to deny relief in the DIWF 421 case (March 5, 2004), available at http://www.insidetrade.com/secure/pdf5/wto2004_1302.pdf.

and Hatch introduced the Trade Enforcement Act of 2007,²⁴⁰ which proposes three changes with regard to Section 421:

- Require the President to declare import relief if the USITC recommends it, unless he invokes a national security or economic waiver;
- Add requirements that the national security and economic waivers may be invoked only in extraordinary circumstances and only if the provision of the recommended relief “would have an adverse impact on the United States economy that clearly and significantly outweighs the benefits of such action; or . . . would cause serious harm to the national security of the United States;”
- Allow for Congress to overturn a Presidential waiver of granting 421 relief if both the House and Senate pass a resolution of disapproval.²⁴¹

Another possible statutory modification that should be considered is legislation to provide monetary relief (at least to the extent of covering legal costs) to those U.S. industries that bring a 421 petition, receive an affirmative determination and a recommendation for relief from the ITC, but are then denied relief by the President. This small measure of compensation would assist U.S. industries (particularly those comprised of small and medium-sized companies) to benefit from the Section 421 remedy.

More substantive modifications, such as making relief if proposed by the USITC mandatory as long as consistent with WTO durational limits (without retaliation rights) are more desirable but would presumably be resisted institutionally by the Administration since it reduces its role/discretion in the process.

²⁴⁰ Trade Enforcement Act of 2007, S. 1919, 110th Cong. § 301 (2007).

²⁴¹ *Id.* at § 301; see also *Baucus, Hatch Enforcement Bill Would Tighten Section 421 Safeguard*, ChinaTradeExtra.com, posted August 1, 2007.

Another approach to revitalizing Section 421 is embodied in the Fair Currency Act of 2007, introduced in both the House and Senate.²⁴² The Fair Currency Act defines exchange-rate misalignment as

[A]n undervaluation of a foreign currency as a result of protracted large-scale intervention by or at the direction of a governmental authority in the exchange market. . . . [and] shall be found when the observed exchange rate for a foreign currency is below the exchange rate that could reasonably be expected for foreign currency absent the intervention.²⁴³

Under this proposed legislation, such exchange rate misalignment constitutes an export subsidy and import barrier from which U.S. industry may seek relief under the China-specific safeguard mechanisms (as well as under subsidies and countervailing duty law).²⁴⁴ (The Fair Currency Act is discussed in greater detail in the next section of this paper).

Separately, Section 421 applications are also discouraged by USITC-imposed obligations on domestic petitioning industries that are not contained in the statute and which appear to misapprehend the purpose of Section 421. The Commission requires domestic industries to supply adjustment plans similar to a Section 201 action even though the premise of the statute is to implement rights under the accession protocol to deal with the transitional period when China is undergoing further significant legal and economic reform. Bringing USITC practice into conformity with the underlying purpose and intent of the statute does not require legislative activity but possibly Congressional oversight.

²⁴² Fair Currency Act of 2007, S. 796, 110th Cong. (2007); Fair Currency Act of 2007, H.R. 782, 110th Cong. (2007).

²⁴³ S. 796 at § 104(a)(4)(A) (2007); H.R. 782 at § 104 (a)(4)(A) (2007).

²⁴⁴ S. 796 at §§ 101, 104 (2007); H.R. 782 at §§ 101, 104 (2007).

b. *Textile Safeguards*

Between China's accession in December 2001 and the signing of the Textile MOU in November 2005, CITA imposed textile safeguard measures in response to only twelve of the 30 petitions it received (including nine petitions for re-application of safeguard quotas). However, many of the petitions it had been considering in mid-2005 were rendered moot by the signing of the Textile MOU. Because the remedy has been reasonably available and was supplemented by the MOU, the textile safeguard should be viewed as having worked in the United States as envisioned to ease the market disruption of increased textile and apparel imports from China. The Federal Circuit's reversal of the CIT's injunction enjoining CITA's authority to accept petitions based upon the threat of increased imports signaled a recognition that U.S. companies and their workers are entitled to seek relief for the potential market disruptions stemming from the expiration of the ATC and the attendant import surges. Most importantly, the finalization of the comprehensive Textile MOU represents a more orderly means of addressing the U.S. textile industry's needs vis-à-vis growing import volumes.^{245 246}

²⁴⁵ See *Comprehensive Deal Reached to Limit U.S. Imports of Chinese Textiles and Clothing*, American Manufacturing Trade Action Coalition (AMTAC) press release, November 8, 2005, available at <http://amtadc.org/media/2005/051108.pdf> (quoting National Textile Association President Karl Spilhaus: "Today's agreement vindicates the U.S. textile industry's decision in 2003 to aggressively use the safeguard process to persuade all parties of the need for a more comprehensive agreement.")

²⁴⁶ Nevertheless, U.S. textile and apparel producers are concerned that the expiration of the quotas set forth in the Textile MOU at the end of 2008 will result in a flood of Chinese textile and apparel imports. Many U.S. producers are hopeful that a U.S. commitment with regard to importation of textile and apparel goods from Vietnam, set forth in September 2006, could be applied to China as an alternative to safeguard quotas. Specifically, this commitment requires Commerce to monitor import values and volumes of textile and apparel products from Vietnam and complete a review every six months. If Commerce determines through this monitoring process that dumping exists and that the domestic industry "fully co-operates" in furnishing data indicating the existence of material injury to domestic producers, it would then self-initiate an antidumping investigation with respect to the relevant products. Commerce's self-initiation of antidumping investigations of Vietnamese textile and apparel products may remove the requirement of a show of industry support, which has considerably hampered domestic industry's ability to bring antidumping cases against foreign suppliers.

Circumvention of quotas and duties poses a separate problem. Some U.S. producers allege that Chinese manufacturers have attempted to circumvent quotas or duties on textiles being imported into the U.S. by moving their products through a second country en route to the receiving country (transshipment) or by incorrectly describing their products, thereby rendering the quotas established in the Textile MOU less effective.²⁴⁷ “Illegal transshipment can (1) adversely affect domestic producers; (2) create an unfair competitive advantage for the violator; (3) restrict the trade of legitimate manufacturers if quotas are imposed on the merchandise; (4) undermine bilateral textile agreements and other trade initiatives that confer preferential treatment; and (5) confer false information regarding country of origin to the consumer.”²⁴⁸ During a four-month period ending in late June 2006, CBP revealed that it had seized over \$10 million in “misdescribed” textile products and had uncovered a plot to circumvent the China safeguards by misdescribing cotton merchandise as ramie, which has a much lower rate of duty.²⁴⁹

The United States has taken steps to curb illegal transshipment by signing agreements aimed at combating the illegal transshipment of textiles with four trading partners: Hong Kong,

U.S. textile and apparel manufacturers are monitoring the status of this concession; if it shows to be an effective mechanism for stemming the tide of Vietnamese textile and apparel exports, it may set an important precedent for the self-initiation of antidumping investigations of Chinese textile and apparel exports after 2008. See *Groups Hope Vietnam Rule Can Apply to China*, INSIDE US-CHINA TRADE, October 11, 2006 at 1, 5-6.

²⁴⁷ See U.S. Customs and Border Protection, *U.S. Customs and Border Protection has Seized \$10 Million in Misdescribed Textile Products Since October*, February 2, 2006, available at http://www.cbp.gov/xp/cgov/newsroom/news_releases/archives/2006_news_releases/022006/02022006.xml.

²⁴⁸ CRS Report for Congress, *Safeguards on Textile and Apparel Imports from China* at 12 (June 30, 2006), available at <http://www.usembassy.it/pdf/other/RL32168.pdf> (citing *Transshipment: Technical Information for Pre-Assessment Surveys*, Customs and Border Protection, October 2003).

²⁴⁹ See U.S. Customs and Border Protection, *U.S. Customs and Border Protection has Seized \$10 Million in Misdescribed Textile Products Since October*, February 2, 2006, available at http://www.cbp.gov/xp/cgov/newsroom/news_releases/archives/2006_news_releases/022006/02022006.xml.

Macau, the Philippines, and Indonesia (an agreement with Taiwan is being negotiated). These agreements facilitate customs cooperation and identification of textile and apparel manufacturers, and allow for joint verification visits to ensure the legitimacy of clothing and textile imports from the trading partners.²⁵⁰ Even if the textile products transshipped through the territories of the trading partners do not receive preferential tariff treatment, Chinese producers may still reap benefits through the evasion of the quantitative restrictions established by the Textile MOU in 2005. The effectiveness of these agreements in curbing illegal Chinese transshipment of textile products into the U.S., in circumvention of the Textile MOU quotas, remains to be seen.

**B. REMEDIES AGAINST CURRENCY MISALIGNMENT – CHINA'S
EXCHANGE RATE POLICY AND THE LIKELIHOOD OF A
SUCCESSFUL WTO CHALLENGE**

1. China's Exchange Rate Policy

On July 21, 2005, China ended the RMB's eight-year peg against the dollar, introducing "a new exchange rate regime described as 'a managed floating exchange rate regime based on market supply and demand with reference to a basket of currencies.'"²⁵¹ Under the new regime, China initially revalued the RMB by 2.1 percent against the dollar and allowed the RMB to fluctuate up to 0.3 percent on either side of a central rate set daily until May 18, 2007, when this

²⁵⁰ See Press Release, USTR, United States and Indonesia Sign Agreement to Prevent Illegal Transshipments of Textiles and Apparel (September 26, 2006), available at http://www.ustr.gov/Document_Library/Press_Releases/2006/September/United_States_Indonesia_Sign_Agreement_to_Prevent_Illegal_Transshipments_of_Textiles_Apparel.html.

²⁵¹ U.S. Department of Treasury, *Report to Congress on International Economic and Exchange Rate Policies*, at 26 (December 19, 2006), available at http://www.treasury.gov/offices/international-affairs/economic-exchange-rates/pdf/2006_FXReport.pdf.

reference rate was widened to 0.5 percent.²⁵² As the Department of Treasury noted in its June 2007 report to Congress, the daily movement of the RMB on either side of the reference rate has rarely come close to the limits of the original 0.3 percent band:

In the first year under the managed basket regime (July 22, 2005 to July 22, 2006), the maximum daily movement on either side of the reference rate averaged 0.04 percent during the course of trading. The RMB/USD rate has experienced slightly more movement since, averaging 0.1 percent daily divergence from the morning reference rate.²⁵³

As of December 14, 2006, the RMB had appreciated by 5.88 percent, including the initial reevaluation of 2.1 percent, with an increase of 2.4 percent in the second half of 2006, the largest half-yearly RMB appreciation since the establishment of the managed float regime.^{254 255}

China has taken additional steps toward promoting greater exchange rate flexibility: the 11th Five-Year Plan, launched in early 2006, contains provisions designed to “increase domestic demand, reform social security (to reduce required saving), increase exchange rate flexibility, widen market access for foreign firms, and boost China’s imports (through further trade liberalization).”²⁵⁶ China has made other efforts to make a more flexible exchange rate viable in China, enacting laws which move it toward liberalization of the capital account, reform of its

²⁵⁶ U.S. Department of Treasury, *Report to Congress on International Economic and Exchange Rate Policies*, at 28 (December 19, 2006), available at http://www.treasury.gov/offices/international-affairs/economic-exchange-rates/pdf/2006_FXReport.pdf.

financial sector, enhancement of the foreign exchange market, development of new financial products, promotion of foreign investment in its banking system, and increased access to financial instruments for maintaining and hedging foreign exchange and other financial risk.²⁵⁷

Additional steps China has taken toward transforming currency and monetary policy include the following:

- Authorization of 22 banks (foreign and domestic) to act as market makers in the foreign exchange market;²⁵⁸
- Shifting the conduct of foreign exchange transactions from Chinese authorities to private parties (almost all foreign exchange transactions in 2005 were with Chinese authorities; by June 2007, 80 percent were with private parties);²⁵⁹
- The January 2007 launch of the Shanghai InterBank Offer Rate (SHIBOR), which sets up a benchmark yield curve for pricing financial instruments and facilitates the PBOC's monitoring of domestic liquidity conditions;²⁶⁰
- The permission granted on May 11, 2007 to Qualified Domestic Institutional Investor (QDII) license holders to invest half of their monies in overseas equities (QDII license holders had been limited bonds and other fixed income instruments);²⁶¹
- The May 23, 2007 announcement that the quota for Qualified Foreign Institutional Investors (QFIIs) would be raised to \$30 billion from \$10 billion;²⁶²
- Assurances from Chinese authorities at the second session of the Strategic Economic Dialogue (SED), held in Washington on May 22-23, 2007, that they placed a high priority on "shifting the composition of economic growth towards domestic consumption and correcting imbalances in the economy and the role that exchange rate reform plays in that process."²⁶³

Despite these positive steps, the Department of Treasury notes that:

²⁶⁰ *Id.*

²⁶¹ *Id.*

²⁶² *Id.*

[W]ith current policy measures and constrained movement of the exchange rate, China's growth grew more unbalanced in 2006. . . . Prolonged, one-way intervention in foreign exchange markets by the central bank, an unprecedented amount of foreign exchange reserve accumulation, and a rapidly increasing current account surplus are clear indicators of fundamental renmimbi undervaluation. While China has taken some steps to increase the flexibility of the renmimbi the pace of appreciation that the authorities have allowed is much too slow and should be quickened.²⁶⁴

High-level Chinese government officials have also expressed concern. Premier Wen Jiabao stated before the National People's Congress in March of 2007 that "the biggest problem in China's economy is that the growth is unstable, imbalanced, uncoordinated and unsustainable."²⁶⁵

Many economists estimate that China continues to undervalue its currency by as much as 40 percent.²⁶⁶ As a result, Chinese goods continue to compete domestically and internationally at prices that are artificially low, hurting U.S. producers in the U.S. market, in the Chinese market and in third country markets.²⁶⁷ It is argued that China's exchange rate intervention effectively acts as a tax on U.S. exports and a subsidy to China's exports, which causes the loss

Scott, *Costly Trade with China – Millions of U.S. Jobs Displaced with Net Job Loss in Every State*, Economic Policy Institute Briefing Paper at 1, May 2, 2007, available at <http://www.epi.org/content.cfm/bp188>; see also Morris Goldstein, *Paulson's First Challenge – Can the New U.S. Treasury Chief Confront China's Currency Manipulation?*, THE INTERNATIONAL ECONOMY, Summer 2006, available at http://www.international-economy.com/TIE_Su06_Goldstein.pdf.

²⁶⁷ China's currency misalignment is harmful to other economies as well. See *Sound Dollar Coalition Seeking EU, IMF Involvement on China Currency*, INSIDE US-CHINA TRADE, January 20, 2005 (quoting Otmar Issing, European Central Bank's chief economist, "[T]he rise of the euro against the dollar is a problem that 'lies with Asia and especially in the hands of China.' Supporters of a revaluation in China have said that with the decline of the U.S. dollar, the euro and yen are forced to bear the burden of adjusting, as China's renmimbi moves in lockstep with the dollar and cannot appreciate against it.").

of U.S. manufacturing jobs.²⁶⁸ In addition, some contend that China's misaligned currency poses a threat to U.S. national security by enabling it to buy missiles and submarine technology from the countries of the former Soviet Union with the higher-valued U.S. dollars it has accumulated as a result of the trade deficit.²⁶⁹ Despite these concerns, the Department of Treasury has declined to designate China as a currency manipulator under Section 3004 of the Omnibus Trade and Competitiveness Act of 1988, stating in its June 2007 report that it was "unable to determine that China's exchange rate policy was carried out for the purpose of preventing effective balance of payments adjustment or gaining unfair competitive advantage in international trade."²⁷⁰

2. U.S. Responses to China's Exchange Rate Policy

Concern about China's undervalued currency and its effects on U.S. manufacturing and increased imports (concern that is compounded by Treasury's repeated failure to cite China as a currency manipulator while at the same time noting that its currency policy distorts the economy)²⁷¹) have led to a number of proposals in Congress to address this problem.

²⁶⁸ See Robert E. Scott, *Costly Trade with China – Millions of U.S. Jobs Displaced with Net Job Loss in Every State*, Economic Policy Institute Briefing Paper at 1, May 2, 2007, available at <http://www.epi.org/content.cfm/bp188> (estimating loss of 1.8 million U.S. jobs since China's WTO accession in 2001); see also *Hearing on Currency Manipulation and Its Effect on U.S. Businesses and Workers before the House Ways and Means Subcommittee on Trade, Financial Services Subcommittee on Domestic and International Monetary Policy, Trade and Technology, and the Energy and Commerce Subcommittee on Commerce, Trade and Consumer Protection*, 110th Cong. 3 (May 9, 2007) (statement of Thea Mei Lee, AFL-CIO).

²⁷¹ See *Treasury Fails to Cite China as Currency Manipulator, Urges More Yuan Movement*, INSIDE U.S.-CHINA TRADE, June 13, 2007; see also *Treasury Again Fails to Cite China as Currency Manipulator*, INSIDE US-CHINA TRADE, December 20, 2006.

*a. Exchange Rate Manipulation as a
Countervailable Subsidy; Application of Duty
to Chinese Imports*

The Fair Currency Act of 2007,²⁷² a bill that has been introduced in both the Senate and the House, seeks to define exchange-rate misalignment as a financial contribution that qualifies as a countervailable subsidy under U.S. countervailing duty law, regardless of whether the country is classified as a market economy or a nonmarket economy.²⁷³

Another legislative proposal, H.R. 1002, introduced by Representatives Spratt and Myrick, proposes an automatic penalty if negotiations between the U.S. and China fail to result in China's adoption of policies designed to move its currency toward market-based valuation.²⁷⁴ Under this proposal, the President must certify to Congress within 180 days of the bill's enactment that China has ceased manipulating its currency "for purposes of preventing an effective balance of payments and gaining an unfair competitive advantage in international trade. . . . [and] that the currency of the People's Republic of China is valued in accordance with accepted market-based trading policies."²⁷⁵ If the President cannot certify these conditions, a 27.5 percent *ad valorem* rate of duty will immediately apply to all imports from China, in addition to any other applicable duties.²⁷⁶

²⁷² Fair Currency Act of 2007, S. 796, 110th Cong. (2007); Fair Currency Act of 2007, H.R. 782, 110th Cong. (2007).

²⁷³ S. 796 at §§ 103(a)-(b) (2007); H.R. 782 at § 103(a)-(b) (2007).

²⁷⁴ H.R. 1002, 110th Cong. (2007).

²⁷⁵ *Id.* at § 2(b).

²⁷⁶ *Id.* at § 2(a).

b. Fundamental Misalignment of Currency

Other bills before Congress focus on fundamental misalignment of currency, thereby removing the requirement that Treasury consider in its currency manipulation analysis whether a country is attempting to gain a trade advantage through intentional currency manipulation. The Currency Exchange Rate Oversight Reform Act of 2007 (S. 1607), a bill introduced June 13, 2007 by Senators Baucus, Grassley, Schumer and Graham, and passed by the Senate Finance Committee on July 31, 2007,²⁷⁷ provides that a “fundamentally misaligned currency” is any currency characterized by “a significant and sustained undervaluation of the prevailing real effective exchange rate, adjusted for cyclical and transitory factors, from its medium-term equilibrium level.”²⁷⁸ Under the provisions of this bill, Treasury would be required to (1) provide biannual reports to Congress that identify any fundamentally misaligned currencies and designate for priority action currencies that are characterized by particularly egregious manipulation; (2) engage in bilateral consultations with all such countries; and (3) with respect to currencies designated for priority action, in addition to engaging in bilateral consultations, seek the advice of the IMF and work with other governments to encourage the offending countries to change their policies and eliminate the fundamental misalignment.²⁷⁹ If a country whose currency has been designated for priority action fails to adopt policies to correct the misalignment within 180 days of the designation, S. 1607 provides for specific consequences, including:

²⁷⁷ See <http://thomas.loc.gov/cgi-bin/bdquery/z?d110:SN01607:@@L&summ2=m&>.

²⁷⁸ Currency Exchange Rate Oversight Reform Act of 2007, S. 1607, 110th Cong. § 2(5)-(6) (2007).

²⁷⁹ *Id.* at §§ 4-5.

- Reflection of the fundamental currency misalignment in the calculation of export price or constructed export price for the purposes of antidumping investigations and reviews involving the country;
- Prohibition of U.S. government procurement of goods or services from the country;
- Request for the IMF to consult with the country;
- Disapproval of Overseas Private Investment Corporation (OPIC) insurance for projects in the country;
- Disapproval of international financing for the government of the country or projects within the country.²⁸⁰

If a country whose currency has been designated for priority action fails to adopt policies aimed at correcting the misalignment within 360 days of the designation, S. 1607 provides for the following:

- USTR must request consultations at the WTO;
- The U.S. must coordinate with the IMF and other monetary authorities in taking remedial intervention in international currency markets to address the country's fundamental misalignment of its currency, and must notify the country of these actions.²⁸¹

In addition, S. 1607 provides for U.S. opposition to any increase in voting shares or representation in international financial institutions for any country whose currency has been designated for priority action in Treasury's most recent report.²⁸²

²⁸⁰ *Id.* at § 6. S. 1607 § 6(b) allows for presidential waiver of these consequences for reasons of national security or economic interest.

²⁸¹ *Id.* at § 7. S. 1607 § 7(c) allows for presidential waiver of these consequences for reasons of national security or economic interest, but § 8 provides that Congress may disapprove a presidential waiver based on economic interest with a concurrent resolution of both Houses.

²⁸² *Id.* at § 9.

The Currency Reform for Fair Trade Act of 2007 (H.R. 2942), introduced in the House by Representative Ryan and 47 co-sponsors, seeks similar treatment of China's currency undervaluation as fundamental misalignment.

Other attempts made to address China's exchange rate policy include the filing of Section 301 petitions with USTR seeking U.S. action regarding China's exchange rate policy:

- Initially, the Fair Currency Alliance, a group of trade associations and unions representing manufacturing, agriculture and labor, prepared a Section 301 petition to address the problem of Chinese currency manipulation but eventually chose not to file the petition with USTR.²⁸³
- On September 9, 2004, the China Currency Coalition, another coalition of U.S. industrial, service, agricultural, and labor organizations, filed a Section 301 petition seeking immediate elimination of the Chinese currency's undervaluation;²⁸⁴ USTR rejected the petition on the same day it was filed.²⁸⁵
- On September 30, 2004, 30 members of the House and Senate (the Congressional China Currency Action Coalition) filed a Section 301 petition on China's currency policy (nearly identical to the CCC's petition).²⁸⁶ On November 12, 2004, USTR rejected this 301 petition.²⁸⁷
- On April 20, 2005, the Congressional China Currency Action Coalition, now comprising 35 Senators and Representatives, filed essentially the same petition;²⁸⁸ USTR rejected it on May 27, 2005.²⁸⁹

²⁸³ See *Fair Currency Alliance Says China Understating Global Trade Surplus*, INSIDE US-CHINA TRADE, June 16, 2004 ("Zoellick and other cabinet officials said in late April that they would reject a Section 301 petition on China's currency policies if it were filed. However, the Alliance has said it might still file the petition, and will monitor the Bush Administration's progress on the issue over the summer before deciding how to proceed.").

²⁸⁷ Petitions under Section 302 on the Valuation of Chinese Currency, Decisions Not to Initiate Investigations, 69 Fed. Reg. 78516 (December 30, 2004); see *USTR Rejects Currency 301; Schumer, Levin Blast Lack of Consultations*, INSIDE US-CHINA TRADE, November 17, 2004, at 1.

²⁸⁸ See <http://www.house.gov/levin/04-20-05%20%20%20%20China%20Currency%20301---Petition%20Filed%20USTR.pdf>.

- On May 17, 2007, the Bipartisan China Currency Action Coalition filed a Section 301 petition (similar to the prior petitions). As summarized by USTR:

[T]he petition alleged that China's acts, policies, and practices that maintain a fixed exchange rate vis-à-vis the U.S. dollar have resulted in a significant undervaluation of China's currency. The petition alleged that these acts, policies and practices amount to: a prohibited export subsidy under the Agreement on Subsidies and Countervailing Measures and articles VI and XVI of the General Agreement on Tariffs and Trade 1994 (GATT 1994); exchange action under article XV of the GATT 1994 that frustrates the intent of articles I, II, III, VI, XI, and XVI of the GATT 1994; and subsidies that are inconsistent with China's obligations under articles 3, 9, and 10 of the Agreement on Agriculture. The petition also alleged that these acts, policies, and practices of China violate international legal rights of the United States under articles IV and VIII of the Articles of Agreement of the International Monetary Fund, and that they burden or restrict U.S. commerce by, among other things, suppressing U.S. manufacturing for domestic consumption and the growth in U.S. exports.²⁹⁰

- On June 14, 2007, USTR rejected the Bipartisan China Currency Action Coalition's petition.²⁹¹ USTR gave the following basis for its determination not to initiate an investigation:

[A]mong other reasons, an investigation would not be effective in addressing the acts, policies, and practices covered in the petition. The Administration is currently involved in efforts to address with the Government of China the currency valuation issues raised in the petition. The USTR believes that initiation of an investigation under section 302 would hamper, rather than advance, Administration efforts to address China's currency valuation policies.²⁹²

3. Possible Grounds for a WTO Challenge to China's Exchange Rate Policy

Various bases for a WTO challenge to China's exchange rate policy have been proposed. The primary grounds for challenging China's exchange rate policy are that China's undervaluation of the yuan constitutes a prohibited export subsidy within the meaning of various GATT articles and WTO Agreements, violates GATT Article XV:4, and violates China's obligations under the International Monetary Fund's Articles of Agreement. In brief, these potential grounds to a WTO challenge are:

Prohibited Export Subsidy:

- WTO SCM Agreement: Article 3.1(a) of the SCM Agreement prohibits "subsidies, contingent in law or in fact, ... upon export performance...." Article 3.2 of the SCM Agreement states that WTO Members States "shall neither grant nor maintain" prohibited export subsidies. In its accession protocol, China committed to "eliminate all subsidy programmes falling within the scope of Article 3 of the SCM Agreement upon accession."²⁹³
- GATT Article VI: The *Ad Note* to GATT Articles VI:2 and VI:3 provides that "multiple currency practices can in certain circumstances constitute a subsidy to exports which may be met by countervailing duties By 'multiple currency practices' is meant practices by governments or sanctioned by governments." GATT, *Ad. Article VI*, paras. 2-3, note 2.²⁹⁴
- GATT Article XVI: This article expressly recognizes that export subsidies ". . . may cause undue disturbance to . . . normal commercial interests, and may hinder the achievement of the objectives of this Agreement." GATT Article XVI:2. Paragraph 4 prohibits export subsidies by directing that "contracting parties shall cease to grant either directly or indirectly any form of subsidy on the export of any product other than a

²⁹³ Protocol on the Accession of the People's Republic of China, WT/L/432, art. 10.3 (23 November 2001).

²⁹⁴ A number of the recent countervailing duty petitions filed against China have alleged that China's exchange rate policy constitutes an export subsidy. Commerce, however, has declined to initiate an investigation of these allegations. See, e.g., *Coated Free Sheet Paper from China*, 71 Fed. Reg. 68546, 68548 (November 27, 2006) (CVD initiation); *Circular Welded Carbon Quality Steel Pipe from China*, 72 Fed. Reg. 36663, 36671 (July 5, 2007) (CVD initiation); *Light-Walled Rectangular Pipe and Tube from China*, 72 Fed. Reg. 40281, 40283 (July 24, 2007) (CVD initiation); *New Pneumatic Off-the-Road Tires from China*, 72 Fed. Reg. 44122, 44124 (Aug. 7, 2007) (CVD initiation).

primary product which subsidy results in the sale of such product for export at a price lower than the comparable price charged for the like product to buyers in the domestic market.” GATT Article XVI:4.

- **WTO Agriculture Agreement:** According to Article 3.2 of the Agriculture Agreement, Members shall not provide export subsidies in excess of those specified in their schedule of commitments. Article 9.1 identifies specific types of export subsidies subject to reduction commitments, and Article 10.1 further specifies that export subsidies not identified in Article 9.1 shall not be applied in contravention of Members’ export subsidy commitments. In the working party report to China’s accession, China expressly committed that “by the date of accession, China would not maintain or introduce any export subsidies on agricultural products.”²⁹⁵

Violation of GATT Article XV:4:

- GATT Article XV:4 states: “Contracting parties shall not, by exchange action, frustrate* the intent of the provisions of this Agreement, nor, by trade action, the intent of the provisions of the Articles of Agreement of the International Monetary Fund.”²⁹⁶ China’s undervaluation of its yuan constitutes an “exchange action” that frustrates the intent of various provisions of the GATT Agreement, particularly Article I (MFN), Article II (tariff bindings), Article III (national treatment), Articles VI and XVI (export subsidies prohibited), and Article XI (bars taxes & charges (other than duties) that restrict imports).
- China’s undervaluation also constitutes a “trade action” that frustrates the intent of the IMF’s Articles of Agreement, particularly Article IV, Section 1(iii) (each IMF member shall “avoid manipulating exchange rates or the international monetary system in order to prevent effective balance of payments adjustment or to gain an unfair competitive advantage over other members.”).

IMF Agreement Violation:

- China’s undervaluation of the yuan violates China’s obligations under IMF Article IV (each IMF Member shall: “(iii) avoid manipulating exchange rates or the international monetary system in order to . . . gain an unfair competitive advantage over other members”) by giving China’s exports an unfair competitive advantage in trade with the U.S. and other IMF Members.
- China’s undervaluation of the yuan violates China’s obligations under IMF Article VIII, section 3 (“No member shall engage in, or permit any of its fiscal agencies ... to engage

²⁹⁵ Report of the Working Party on the Accession of China, WT/MIN(01)/3, para. 234 (10 November 2001).

²⁹⁶ The *Ad Note* states: “The word ‘frustrate’ is intended to indicate, for example, that infringements of the letter of any Article of this Agreement by exchange action shall not be regarded as a violation of that Article if, in practice, there is no appreciable departure from the intent of the Article....”

in any discriminatory currency arrangements or multiple currency practices ...”) by discriminating against U.S. products to China’s benefit.

4. Likelihood of a Successful WTO Challenge to China’s Exchange Rate Policy

On substance, the potential grounds for challenging China's exchange rate policy at the WTO have prima facie merit. Although currency practices have not commonly been challenged at the WTO (or the predecessor GATT) as export subsidies or as actions frustrating the intent of the GATT and IMF Agreements, there has long been an acknowledgement that currency manipulation practices could constitute export subsidies. Notwithstanding the inherent merit of these arguments, however, a realistic assessment must recognize that, given that the Administration has rejected four Section 301 petitions that alleged that China's manipulation of its exchange rate policy constituted a prohibited export subsidy within the meaning of GATT Article VI and XVI, the SCM Agreement, and the WTO Agriculture Agreement, as well as an exchange and a trade action that frustrates the intent of the GATT and IMF Agreements, it is not likely that the same Administration would favor a WTO challenge of China's exchange rate policy on the same grounds that it rejected in the Section 301 petitions.²⁹⁷

²⁹⁷ See Levin Accuses Administration of Mishandling China Trade Issues, INSIDE US-CHINA TRADE, February 23, 2005 at 2 (“Regarding currency, Levin said the administration has shown it is not serious in pressing China to revalue the renminbi. ‘This Administration has just completely fumbled the ball Through inaction, inconsistency, and a willingness to accept rhetoric over real results, the Bush Administration has signaled to China that our government is not serious about this issue.’”). However, U.S. Federal Reserve Chairman Ben Bernanke recently acknowledged the problem; see Ben S. Bernanke, Remarks at the Chinese Academy of Social Sciences, Beijing, China – *The Chinese Economy: Progress and Challenges* at 6 (December 15, 2006), available at <http://www.federalreserve.gov/boarddocs/speeches/2006/20061215/default.htm> (noting “an important distortion in the Chinese economy, namely, the effective subsidy that an undervalued currency provides for Chinese firms ...”).

Separately, U.S. antidumping law could be modified to permit currency manipulation to be treated as a form of dumping consistent with the original GATT notes. Likewise, Congress could enact provisions such as those contained in proposed legislation that would treat exchange rate manipulation or fundamental currency misalignment as a countervailable subsidy, and would allow U.S. industry to seek relief for the market disruption caused by China's effective subsidization of its exports through exchange rate manipulation or misalignment.²⁹⁸

**C. REACHING ACTIONABLE AND PROHIBITED CHINESE SUBSIDIES
UNDER U.S. COUNTERVAILING DUTY LAW AND AT THE WTO**

**1. The United States Has Changed Its Policy
Regarding Application of Countervailing Duty Law
to China and Other Non-Market Economy
Countries**

On October 31, 2006, NewPage Corporation filed a countervailing duty petition alleging that producers of coated free sheet paper (CFS) in China, Indonesia, and Korea received countervailable subsidies and that imports of such subsidized products injured the U.S. industry producing coated free sheet paper. The Department of Commerce initiated a countervailing duty investigation on CFS from China on November 27, 2006.²⁹⁹ The initiation of the China CVD investigation required Department of Commerce to "review its long-standing policy of not applying the CVD law to NMEs, such as the PRC."³⁰⁰ Thus, on December 15, 2006, Commerce sought public comment on whether the U.S. countervailing duty law should apply to imports

²⁹⁸ See, e.g., *Strengthening America's Trade Laws Act* (S. 364); *Fair Currency Act of 2007* (S. 796; H.R. 782); *Currency Reform for Fair Trade Act of 2007* (H.R. 2942).

²⁹⁹ See *Notice of Initiation of Countervailing Duty Investigations: Coated Free Sheet Paper from the People's Republic of China, Indonesia, and the Republic of Korea*, 71 Fed. Reg. 68546 (November 27, 2006).

from China.³⁰¹ On April 9, 2007, Commerce changed its longstanding policy that countervailing duty law is not applicable to non-market economy countries.³⁰²

In 1984, Commerce determined that, as a matter of definition and because of the economic system that existed then in non-market economy countries, U.S. countervailing duty (CVD) law does not apply to non-market economies. “In 1986, the Court of Appeals for the Federal Circuit affirmed that the Department of Commerce (the Department) had the discretion not to apply the countervailing duty law to non-market economy (NME) countries in *Georgetown Steel Corp. v. United States*, 801 F.2d 1308 (Fed. Cir. 1986) (*Georgetown Steel*).”³⁰³

In addition, the WTO Uruguay Round negotiation resulted in a new Agreement on Subsidies and Countervailing Measures (SCM Agreement) that included a new and more specific definition of subsidies. This SCM Agreement definition of subsidies was implemented into U.S. law in 1994, after the *Georgetown Steel* litigation and the subsequent cases on China in 1991-92. Moreover, as part of its accession to the WTO in 2001, China accepted that trading partners would be able to use special rules for valuing prices and costs in antidumping investigations and accepted special rules for valuing subsidies. These subsidy valuation rights are not premised on

³⁰⁰ See *Application of the Countervailing Duty Law to Imports From the People's Republic of China: Request for Comment*, 71 Fed. Reg. 75507 (December 15, 2006).

³⁰² See *Countervailing Duty Investigation of Coated Free Sheet Paper from the People's Republic of China - Whether the Analytical Elements of the Georgetown Steel Opinion are Applicable to China's Present-Day Economy*: Memorandum from Shauna Lee-Alaia and Lawrence Norton, Office of Policy, Import Administration, to David M. Spooner, Assistant Secretary for Import Administration (March 29, 2007) (“CFS Paper Memorandum”), available at <http://ia.ita.doc.gov/download/prc-cfsp/CFS%20China.Georgetown%20applicability.pdf>.

³⁰³ See *Application of the Countervailing Duty Law to Imports From the People's Republic of China: Request for Comment*, 71 Fed. Reg. 75507 (December 15, 2006). Commerce followed that approach in later cases, including *Chrome-Plated Lug Nuts and Wheel Locks from the People's Republic of China*, 57 Fed. Reg. 10459

any abandonment of special rules (*i.e.*, treatment of China as an NME). These rights were negotiated by the United States because of concerns about the nature of the Chinese economy. Indeed, trade-distorting subsidies from the Chinese government were one of the specific concerns of the United States in negotiating China's accession to the WTO.

In addition to these legal changes, important economic changes occurred in China's economic structure after Commerce made its policy decision in 1984. As stated in Commerce's CFS Paper Memorandum:

China's economy presents a significantly different picture than the traditional communist economic system of the early 1980s, *i.e.*, the so-called "Soviet-style economies," such as the economies at issue in *Georgetown Steel*.³⁰⁴

The non-market economies at issue in *Georgetown Steel* were characterized by a "marked absence of market forces," in which prices, investment decisions, money and credit, and wages were controlled by the state, losses were covered by the state, and access to foreign currency and private ownership were restricted by the state. In contrast, as the Department's CFS Paper Memorandum reviews, China's non-market economy of today is "significantly different from" and "more flexible than" these NMEs of the past.³⁰⁵

Whereas "the nature of Soviet-style economies in the mid 1980s made it impossible for the Department to apply the CVD law" in that "'bounties or grants' in Soviet-style economies had no meaning ... given the pervasive role of NME governments in the economy in general, and

(March 26, 1992), and *Oscillating and Ceiling Fans from the People's Republic of China*, 57 Fed. Reg. 24018 (March 26, 1992).

³⁰⁴ CFS Paper Memorandum at 4.

³⁰⁵ CFS Paper Memorandum at 5; *see also id.* at 5-9 where the Department analyzes the significant differences in the Chinese economy of today with respect to wages and prices, access to foreign currency, personal property rights and private entrepreneurship, foreign trading rights, and allocation of financial resources.

those industries in particular,” the “current nature of China's economy does not create these obstacles to applying the statute.”³⁰⁶

Following consideration of all public comments in the CFS proceeding, Commerce determined that U.S. countervailing duty law could be applied to China.

[G]iven the substantial difference in the economies at issue in *Georgetown Steel* and China's economy during the period of investigation in the current proceeding, we find that the Department's policy that gave rise to the *Georgetown Steel* litigation is inapposite to the current investigation and does not bar the application of the CVD laws to imports from China.

* * *

Given these developments, we believe that it is possible to determine whether the PRC Government has bestowed a benefit upon a Chinese producer (i.e., the subsidy can be identified and measured) and whether any such benefit is specific. Because we are capable of applying the necessary criteria in the CVD law, the Department's policy that gave rise to the *Georgetown Steel* litigation does not prevent us from concluding that the PRC Government has bestowed a countervailable subsidy upon a Chinese producer.³⁰⁷

In accordance with this finding, Commerce then made a preliminary determination that China had provided countervailable subsidies to producers and exporters of coated free sheet paper.³⁰⁸

The initiation of the countervailing duty investigation on coated free sheet paper from China also gave rise to a court challenge. Shortly after the investigation was initiated by Commerce, the Government of China (and several respondent companies) filed suit in the U.S. Court of International Trade (CIT) requesting both a temporary restraining order and a

³⁰⁷ *CFS Paper Memorandum* at 2, 10.

³⁰⁸ *See Coated Free Sheet Paper from the People's Republic of China: Amended Preliminary Affirmative Countervailing Duty Determination*, 72 Fed. Reg. 17484, 17486 (April 9, 2007).

preliminary injunction to enjoin Commerce from continuing the CVD investigation pending the CIT's decision. In response, the U.S. Government and NewPage Corporation (CFS petitioner) filed motions to dismiss the action for lack of jurisdiction. After oral argument, the CIT denied the Chinese Government's TRO request but reserved a decision on its request for a preliminary injunction as well as the Government's and NewPage's motions to dismiss. On March 29, 2007, the Court issued a decision in which it granted the U.S. Government's motion to dismiss and did not address the Chinese Government's motion for a preliminary injunction.³⁰⁹ The plaintiffs had argued that Commerce was prohibited from initiating the countervailing duty investigation by both the statute and Commerce's own rules, and that CIT had jurisdiction to hear its claims under 28 U.S.C. 1581(i), the CIT's residual jurisdiction provision.³¹⁰ The Court disagreed, finding that:

Because the initiation by Commerce of a countervailing duty investigation is reviewable under 28 U.S.C. § 1581(c) and the remedy available under that provision is not manifestly inadequate, this Court cannot exercise jurisdiction over this case under section 1581(i). Therefore, this Court grants Defendant's motion to dismiss the action for lack of jurisdiction.³¹¹

Following the initiation of the CVD investigation on coated free sheet paper from China, and Commerce's determination that CVD law could be applied to China, there have been four additional countervailing duty petitions filed alleging the provisions of countervailable subsidies

TRADE LAWYERS ADVISORY GROUP
SEPTEMBER 2007

In addition, a number of bills have been introduced in Congress that address various aspects of countervailing duty law and propose modifications to CVD law to make it a more effective trade remedy. Examples of such proposed legislation include the following bills.

Legislation	Bill No.	Provisions Related to CVD Law
Strengthening America's Trade Laws Act	S.364 (Rockefeller)	<ul style="list-style-type: none"> ▪ Would amend Tariff Act of 1930 to apply countervailing duty law to non-market economy countries. ▪ Would include exchange-rate manipulation by a country as a countervailable subsidy. ▪ Would treat the full or partial exemption, remission, or deferral of indirect taxes on exports as a countervailable subsidy.
Unfair Foreign Competition Act of 2007	S.1440 (Specter)	<ul style="list-style-type: none"> ▪ Would amend the Tariff Act of 1930 to authorize a petitioning party, in an antidumping or countervailing duty investigation, to elect, within 30 days after the investigation has started, to bring a civil action in a U.S. district court for determination that a U.S. industry is materially injured or is threatened with material injury, or the establishment of an industry in the U.S. is materially retarded, by reason of imports, or sales (or the likelihood of sales) for importation, of the merchandise subject to the investigation, and that imports of the subject merchandise are not negligible. ▪ Would authorize such a petitioning party, within 30 days after a 5-year review of an antidumping or countervailing duty order is initiated, to bring a civil action in a U.S. district court for determination of whether revocation of the antidumping or countervailing duty order, or termination of a suspended investigation, would likely lead to continuation or recurrence of material injury.
Stopping Overseas Subsidies Act	S.974 (Collins)	<ul style="list-style-type: none"> ▪ Would amend Tariff Act of 1930 to apply countervailing duties to non-market economies. ▪ Would authorize the use of terms and conditions prevailing outside China as appropriate benchmarks to measure the benefit of a countervailable subsidy bestowed by China. ▪ Would require an ITC study of Chinese subsidies -- how the PRC uses government intervention to promote investment, employment, and exports.
Nonmarket Economy Trade Remedy Act of 2007	H.R.1229 (Davis)	<ul style="list-style-type: none"> ▪ Would amend Tariff Act of 1930 to apply countervailing duties to non-market economies. ▪ Would authorize the use of terms and conditions prevailing outside China as appropriate benchmarks to measure the benefit of a countervailable subsidy bestowed by China. ▪ Would require an ITC study of Chinese subsidies -- how the PRC uses government intervention to promote investment,

2. U.S. Efforts to Address Chinese Subsidies at the WTO

The United States has also endeavored to address its concerns regarding Chinese subsidies through the WTO, including the SCM Committee, the Transitional Review Mechanism, and the consultation and dispute settlement procedures set out in the SCM Agreement. China submitted its first subsidies notification (covering subsidies in existence from 2001 through 2004) on April 7, 2006, four years after accession.³¹² While the U.S. and other WTO Members expressed their appreciation of China's efforts to comply with its notification obligations, they also expressed their dissatisfaction with the incompleteness of China's subsidies notification, as well as its failure to eliminate WTO-prohibited subsidies:

While China's first subsidy notification was made long after due time, the notification still appears to be incomplete as it focuses only on subsidies provided at a federal government level and omits substantial subsidies that China maintains. However, subsidies provided at the regional and local government level also fall under the ASCM Agreement. Moreover, some subsidies appear to be inconsistent with the obligation under Art 3 of the ASCM Agreement. Nevertheless no indications have been made to either

³¹² See *New and Full Notification Pursuant to Article XVI:1 of the GATT 1994 and Article 25 of the SCM Agreement – People's Republic of China*, Committee on Subsidies and Countervailing Measures, G/SCM/N/123/CHN (April 13, 2006).

withdraw them or have been given an explanation how this is in line with the ASCM Agreement.³¹³

In July 2006, the U.S. expressed concern regarding several aspects of China's subsidies notification in questions submitted shortly after China's subsidies notification. These concerns included the following issues:

U.S. Concerns Regarding China's 1st Subsidies Notification
<ul style="list-style-type: none">• China did not include subsidies at the sub-central government level in its subsidies notification in contravention of its obligation under Article 25 of the SCM Agreement to include in its subsidies notification information on any subsidies granted or maintained within their territory. (July Questions³¹⁴ at 1)
<ul style="list-style-type: none">• China did not provide information on loans from State Policy Banks (the State Development Bank, the Export and Import Bank of China and the Agriculture Development Bank of China),³¹⁵ even though it had notified these loans in Annex 5A to its Protocol of Accession, and in contravention of its obligations under Article 25.3 of the SCM Agreement. (July Questions at 1)
<ul style="list-style-type: none">• Only state-owned commercial banks may purchase bonds issued by the State Policy Banks to fund their lending, and they have continued to purchase these bonds on terms inconsistent with commercial considerations. (July Questions at 1-2)
<ul style="list-style-type: none">• China failed to provide information on loans from state-owned commercial banks, despite Members of the Working Party having expressed concern over China's omission of these loans from the subsidies listed in Annexes 5A and 5B of its Protocol of Accession. (July Questions at 2)
<ul style="list-style-type: none">• Programme I – Preferential Tax Policies for Foreign-Invested Enterprises – Income tax paid by foreign-invested enterprises (FIEs) on reinvestments may be fully refunded where the reinvestments are applied

³¹³ *Transitional Review Mechanism Pursuant to Section 18 of the Protocol on the Accession of the People's Republic of China – Questions from the European Communities to China with Regard to China's Transitional Review Mechanism on Subsidy Practices*, Committee on Subsidies and Countervailing Measures, G/SCM/Q2/CHN/24, at 1 (October 20, 2006).

³¹⁴ "July Questions" refers to *Questions from the United States to China Regarding the New and Full Notification of China*, Committee on Subsidies and Countervailing Measures, G/SCM/Q2/CHN/19 (July 26, 2006).

³¹⁵ China established these banks in an attempt to remove policy lending functions from state-owned commercial banks, "so that state-owned commercial banks could focus on commercial lending and the State Policy Banks could focus on relatively more risky investment projects designed to achieve government policy objectives." *Questions from the United States to China Regarding the New and Full Notification of China*, Committee on Subsidies and Countervailing Measures, G/SCM/Q2/CHN/19, at 1 (July 26, 2006).

U.S. Concerns Regarding China's 1st Subsidies Notification
toward "the organization and expansion of export-oriented enterprises or advanced technology enterprises." (July Questions at 2; Subsidies Notification ³¹⁶ at 2-3)
<ul style="list-style-type: none"> • Programme II – Preferential Tax Policies for Foreign-Invested Export Enterprises – Export-oriented FIEs receive income tax deductions based on the amount of their exports. (July Questions at 2; Subsidies Notification at 3-4)
<ul style="list-style-type: none"> • Programme XIV – Preferential Tax Policies in the Western Regions – Investors in "encouraged" industries or sectors are eligible for an income tax reduction; one such "encouraged" category is described as "permitted foreign-funded projects whose products are to be wholly exported directly." (July Questions at 4; Subsidies Notification at 17-19)
<ul style="list-style-type: none"> • Several programs offer preferential tax treatment to certain enterprises; it is unclear whether these programs contain incentives that are contingent upon export or the use of domestic over imported goods. (July Questions at 3-4; Subsidies Notification at 7-14)
<ul style="list-style-type: none"> • Programme LVII – Preferential Tax Policies for Integrated Circuit Industry – The tariff and import VAT exemptions under this programme may not be consistent with Annexes I, II and II of the SCM Agreement, "including the requirement that limits duty remission and rebate schemes to 'inputs that are consumed in the production of the exported product (making allowances for waste)'." (July Questions at 6; Subsidies Notification at 64-66)
<ul style="list-style-type: none"> • Programme LVIII – Preferential Tax Policies for Foreign Invested Enterprises and Foreign Enterprises Which Have Establishments or Place in China and Are Engaged in Production or Business Operations Purchasing Domestically Produced Equipment – FIEs that purchase domestically-produced equipment qualify for income tax deductions. (July Questions at 6; Subsidies Notification at 66-67)
<ul style="list-style-type: none"> • Programme LIX – Preferential Tax Policies for Domestic Enterprises Purchasing Domestically Produced Equipment for Technology Upgrading Purposes – Domestic enterprises that purchase domestically-produced equipment for upgrading projects that are "consistent with the state industrial policies of the domestic enterprises" (which policies may include a preference for exports of goods) are eligible for income tax deductions. (July Questions at 6-7; Subsidies Notification at 67-68)
<ul style="list-style-type: none"> • Programme LX – Exemption of Tariff and Import VAT for the Imported Technologies and Equipment – FIEs and domestic enterprises that fall within "encouraged" categories are eligible for tariff and VAT refunds or rebates for imported technology; one such "encouraged" category is described as "permitted foreign-funded projects whose products are to be wholly exported directly." (July Questions at 7; Subsidies Notification at 68-69)
<ul style="list-style-type: none"> • Programme LXXV – Refund of Import VAT of Raw Copper Materials – The receipt of benefits under this programme may be contingent upon subsequent exportation of further-produced copper products. (July Questions at 7; Subsidies Notification at 83-84)

³¹⁶ "Subsidies Notification" refers to *New and Full Notification Pursuant to Article XVI:1 of the GATT 1994 and Article 25 of the SCM Agreement – People's Republic of China*, Committee on Subsidies and Countervailing Measures, G/SCM/N/123/CHN (April 13, 2006).

U.S. Concerns Regarding China's 1st Subsidies Notification

- Programme LXXVI – Preferential Tax Treatment for Casting and Forging Products – This programme provides a refund of 35 percent of the VAT collected on casting and forging products manufactured by specific domestic producers. (July Questions at 7-8; Subsidies Notification at 84-85)
- Programme LXXVII – Preferential Tax Treatment to Dies Products – This programme provides a refund of seventy percent of the VAT collected on dies products manufactured by specific domestic producers. (July Questions at 8; Subsidies Notification at 85-86)
- Programme LXXVIII – Preferential Tax Treatment to Numerically Controlled Machine Tool Products – This programme provides a full refund of the VAT collected on numerically controlled machine tool products manufactured by specific domestic producers. (July Questions at 8; Subsidies Notification at 86-87)
- China did not include in its notification other subsidy programs that meet the requirements for notification under Article 25 of the SCM Agreement, including:
 - Financial support to large auto export enterprises that maintain high amounts of existing exports through provision of loans and export credits. (July Questions at 9)
 - Export contingent support to the software and integrated circuit industries. (July Questions at 9)
 - Export contingent support for famous name brand products. (July Questions at 9)
 - Wuxi government aid to exporters through grants of up to RMB 100,000 to high-technology companies having an export value of over USD \$5 million. (July Questions at 10)
 - Ningbo City export contingent aid for textile exporters (“export branding”) through provision of benefits to the city’s top eight textile and apparel brand enterprises having exports over USD \$20 million. (July Questions at 10)
 - Ningbo City’s Jiangdong District export contingent award for companies with exports of over USD \$1 million; the award is given for each dollar of textile and apparel exports that exceeds the previous year’s total exports. (July Questions at 10)
 - Other local export-related awards – regional programs that tie monetary awards solely to the amount exported or to a percentage growth above the previous year’s export totals. (July Questions at 10-11)
 - Huzhou City’s Wuxing District export contingent Notice No. 9 for encouraging foreign trade development, which grants several export-contingent “prizes.” (July Questions at 11)
 - Export contingent funds for audio-visual products under the Ministries of Finance (MOF) and Culture (MOC); the Department of Cultural Markets under MOC will manage the funds and provide funds for awards granted to those with outstanding export performance. (July Questions at 11)
 - Opinions concerning the promotion of pharmaceutical products exports which provide benefits such as aid in establishing international pharmaceutical export bases, creation of famous export brands that capture a certain market share of the international market, encouragement of risk fund to enter pharmaceutical R&D, and promotion of intellectual property rights protection of domestic pharmaceutical manufacturers. (July Questions at 11)
 - Provision of income tax deductions for the purchase of domestically made equipment by foreign enterprises in the Shanghai Chemical Industrial Park. (July Questions at 12)
 - State-owned bank financing of half of the investment in the construction of a new semiconductor manufacturing plant by Hynix, the Korean semiconductor manufacturer; it is not clear if this financing is contingent upon export performance, nor is it clear if the state-owned bank loans were provided on terms better than those available commercially. (July Questions at 12)
 - Eligibility of integrated circuit manufacturing companies located in Hainan Island, Shanghai Pudong New District and Western China for a full income tax exemption their first five years of operation,

U.S. Concerns Regarding China's 1st Subsidies Notification

- followed by a fifty percent income tax reduction for the next five years. Under this "Five-Plus-Five" plan, a company must have an operational term of not less than fifteen years, and the exemptions and reductions begin in the company's first profitable year. (July Questions at 12)
- Provision by the government-owned Beijing Economic Technological Investment Development Corp. of an estimated USD \$3 million interest-free, dollar-denominated, short-term loan to a Chinese semiconductor manufacturer. (July Questions at 12-13)
 - Issuance of new policies to promote the paper industry, such as national bond interest subsidized loans, special funds for technology upgrades and support for planting trees. (July Questions at 13)
 - The China Development Bank's provision of RMB 10 million in preferential loans to Anshan Steel Group in 2005. (July Questions at 13)
 - Provision of interest-subsidized loans worth RMB 2.4 billion to Handan Iron & Steel Group to fund a 1.3 million-ton cold-rolled steel sheet project. (July Questions at 13)
 - A document entitled "Tax Reimbursement Regime on Exported Goods in China" which states that "exported goods that are 'manufactured by using preferential loans of the Chinese government' will be 'given approval to reimburse or exempt VAT or consumption tax due to some special features such as . . . turnover linkages and settlement methods, etc.'" (July Questions at 13)
 - The Yinchuan government's granting of land worth double the amount of an investor's original investment to foreign investors that meet certain investment requirements. (July Questions at 13)
 - Ningbo City government's establishment of a RMB one billion special fund to support four key industries (electronic information, new materials, auto/auto parts and machinery production industries) for the purpose of assisting the industries in technological upgrades, expansion of their sales and application to be considered a national famous brand. The maximum subsidy under this program is RMB five million. (July Questions at 13)
 - Provision of VAT deductions for qualified fixed assets in the Northeast region. (July Questions at 13-14)
 - Tianjin city's 2005 plans to allocate RMB 160 billion (USD \$19.2 billion) of investment to 560 projects related to six "pillar industries" (the IT industry, the chemical and metallurgical sector, the automotive industry, biotechnology and the modern pharmaceutical industry, and the energy and environmental protection sector). (July Questions at 14)
 - Provision by MOF of a RMB 10 billion subsidy to China Petroleum & Chemical Corporation as compensation for artificially lowered refined oil prices; China Petroleum & Chemical Corporation announced that RMB 9.415 billion of the subsidy would go to SINOPEC, its subsidiary. (July Questions at 14)
 - Central government subsidies to the agricultural machinery industry worth over RMB 300 million (USD \$37.5 million) in 2005; local governments gave an additional RMB 800 million in subsidies to the industry during the same period. (July Questions at 14)
 - The March 2, 2006 posting of NRDC's "Provisional Measures for the Administration of State High Technology Development Projects," under which investment and high technology loans are to be provided to high technology industries in the form of grants. (July Questions at 14)
 - The September 2005 bailout of China Worldbest to facilitate its purchase by the Chengtong Group. The State Development Bank granted the Chengtong Group a loan in the amount of RMB five billion to cover some of China Worldbest's outstanding loans, which totaled RMB 25 billion. (July Questions at 14)

The United States also raised issues concerning China's subsidies in the context of the Transitional Review Mechanism by submitting questions to China on October 16, 2006.³¹⁷

Concerns raised in this submission included the following issues:

U.S. Questions Regarding China Subsidies at 2006 TRM
<ul style="list-style-type: none"> China's failure to reply to questions the U.S. submitted in October 2004 (discussed below). (TRM Questions at 1)³¹⁸
<ul style="list-style-type: none"> Though China stated that it "has no policy whatsoever that provides direct subsidy to textile and apparel companies," the U.S. has specific information on sub-central government level subsidy programmes that apparently are export-contingent and are only available to textile and apparel exporters, such as the Ningbo City programme noted above. (TRM Questions at 1)
<ul style="list-style-type: none"> Ambiguity concerning the guidance that the Chinese government has given to state-owned commercial banks with regard to loans to textile and apparel companies, especially in light of a 2004 statement by the secretary-general of the China Cotton Association that refers to "excessive lending to the textile industry." It is also unclear what percentage of loans to the textile and apparel industries are non-performing. (TRM Questions at 2)
<ul style="list-style-type: none"> A MOFCOM notice issued earlier in 2006 pertaining to a programme entitled "Ten Thousand Miles March for Brand Building" which provides for brand appraisal, brand promotion, brand marketing and brand protection. (TRM Questions at 2)
<ul style="list-style-type: none"> A MOFCOM notice issued earlier in 2006 pertaining to a programme entitled "Ten Thousand Miles March for Brand Building" which provides for brand appraisal, brand promotion, brand marketing and brand protection. (TRM Questions at 2)
<ul style="list-style-type: none"> A "Notice of Relevant Policies to Promote Chinese Textile Enterprises to Shift to New Ways of Growth and Support Them to Go Global" from MOFCOM and the National Development and Reform Commission (NDRC) that provides benefits to the textiles sector that may be export-contingent, provides funds to textiles companies that set up distribution channels in overseas markets, and is inconsistent with China's statement that it "has no policy whatsoever that provides direct subsidy to textile and apparel companies." (TRM Questions at 2)
<ul style="list-style-type: none"> China's designation of eight cities as special zones for sales overseas of cars and components, which would entail the granting of preferential loans and export tax rebates to favored companies. (TRM Questions at 2-3)

³¹⁷ *Transitional Review Mechanism Pursuant to Section 18 of the Protocol on the Accession of the People's Republic of China – Questions from the United States to China*, Committee on Subsidies and Countervailing Measures, G/SCM/Q2/CHN/23 (October 16, 2006).

³¹⁸ "TRM Questions" refers to *Transitional Review Mechanism Pursuant to Section 18 of the Protocol on the Accession of the People's Republic of China – Questions from the United States to China*, Committee on Subsidies and Countervailing Measures, G/SCM/Q2/CHN/23 (October 16, 2006).

U.S. Questions Regarding China Subsidies at 2006 TRM

- A new aid plan for semiconductors which provides for income tax reductions and exemptions, research loans and the use of research expenditures to offset taxes (in addition to the RMB 500 million fund established earlier for the purpose of aiding semiconductor companies' research), tax reductions on imported equipment, and the establishment of a special fund for integrated circuit design. (TRM Questions at 3)
- Plans by the Wuhan city government to spend between \$1.5 billion and \$3 billion to build a semiconductor plant to be designed, built and managed by the Semiconductor Manufacturing International Corp (SMIC), a private entity. The specific ownership and investment role of the Wuhan government in this project is not clear, nor are the specific terms and conditions of SMIC's participation. (TRM Questions at 3)
- NDRC's issuance of a notice that all grains bound for overseas markets are exempt from the railway construction fund levy.
- Measures included in MOFCOM's first agricultural export five-year plan, issued on August 24, 2006, that are designed to expand agricultural export support systems and increase diplomatic representations. The exact nature of the benefits to be provided under this plan is not clear. (TRM Questions at 3)
- China's failure to respond to questions the U.S. submitted in connection with the fourth transitional review mechanism regarding export support programs in the Jiangxi and Henan Provinces. (TRM Questions at 4)
- China appears to continue to require that eligibility for long-term loans for fixed-assets and project financing from three of its state-owned banks (the Industrial and Commercial Bank of China, the China Construction Bank, and the Bank of China) must be determined in a manner consistent with state industrial policies, despite China's pledges to move its state-owned enterprises toward operating on a commercial basis. (TRM Questions at 4)
- The China Exim Bank effectively provides export credits for certain manufacturing projects by offering loans at low interest rates, and on advantageous terms and conditions, to finance those projects that are able to generate favorable economic returns and are tied to exports of Chinese mechanical and electronic products and complete sets of equipment. In addition, there do not appear to be any risk/exposure fees to compensate for future potential losses and operational costs. (TRM Questions at 5)
- The China Exim Bank offers loans on advantageous terms and conditions to certain state-owned enterprises in selected sectors to support their international strategies (selected sectors include construction, electronics, mechanical, high and new technology products/capital goods, and telecommunications and power equipment). These loans offer a "preferential" interest rate, longer than standard repayment terms, and/or the waiver of certain fees. (TRM Questions at 5)
- The China Development Bank has adopted policies designed to support sectors deemed vital to China's long-term competitiveness, specifically for companies involved in research and development, Chinese "brand name" companies, and certain companies in their overseas expansion. In part, this program provides export credits. (TRM Questions at 5)

In addition, at Transitional Review Mechanism meeting on October 26-27, 2006, the United States noted that China still had not replied to questions submitted by the U.S. in October 2004.³¹⁹ These in-depth questions covered a number of programs and practices that appeared to constitute prohibited subsidies under Article 3 of the SCM Agreement (subsidies contingent upon export performance; subsidies contingent upon the use of domestic over imported goods), as well as other programs that appeared to constitute subsidies under Article 1 (financial benefit) and Article 2 (specific) of the SCM Agreement. Specifically, the programs and practices identified by the United States in October 2004 included:

• **Subsidies Contingent Upon Export Performance**

- Honourable Enterprises – preferential benefits
- Export-Contingent Tax Reduction for FIEs in Special Zones
- Income Tax Refund for Foreign Investors Investing in Export-Oriented Businesses
- Special Steel for Processing Exports Policy
- Export-Contingent Income Tax Reduction for FIEs or Tax Allowance for FIEs
- Export Subsidies for High-Technology Products
- Customs Duty and VAT Refund on Imported Capital Equipment Used for Production of Products for Exports
- Government Assistance to Increase Fabric Exports
- Tax Incentives for Dehydrated Garlic Exports
- Guangdong Grants Provided for Export Performance
- Low Interest Loans for Processors of Agricultural Products in Henan Province

• **Subsidies Contingent Upon the Use of Domestic Over Imported Goods**

- VAT Rebate on Purchases of Domestic Equipment by FIEs
- Enterprise Income Tax Reduction for Purchase of Domestically Made Machinery and Equipment

³¹⁹ See Request from the United States to China Pursuant to Article 25.8 of the Agreement on Subsidies and Countervailing Measures, G/SCM/Q2/CHN/9 (6 October 2004).

• **Other Programmes**

- Assistance Provided to Forest Products:
 - Financing for development of fast-growth-high-yield plantations
 - Financing for technology renovations of state-owned paper mills
 - Financing for wood processing projects
 - Local government development policies for the pulp, paper, and wood industries
- Assumption of Interest on Loans for Technology Upgrades
- Assistance for Capacity Expansion in the Soda Ash Industry
- Assistance Provided to the Textile Industry
- Chendu Assistance to the Semiconductor
- Reduction in VAT for Sino-Russian Border Trade
- Subsidies Listed in Annex 5A of China's Protocol of Accession

Source: *Request from the United States to China Pursuant to Article 25.8 of the Agreement on Subsidies and Countervailing Measures, G/SCM/Q2/CHN/9* (6 October 2004).

In February 2007, the United States took the next step and requested consultations with China regarding nine subsidy programs.³²⁰ Of these nine programs, USTR stated that the first six “appear to be export subsidies, granted on the condition that the recipients meet certain export performance criteria,” and the remaining three programs “appear to be import substitution subsidies, conditioning the grant of subsidies on the recipient’s purchase of domestic over imported goods.”³²¹ The USTR described these programs in summary fashion as:

- Income tax reductions and refunds available to companies that satisfy certain export performance requirements
- Value-added tax (VAT) exemptions available to companies that satisfy certain export performance requirements
- Tariff exemptions available to companies that satisfy certain export performance requirements
- Discounted lending rates available to companies that satisfy certain export performance requirements

³²⁰ See China - Certain Measures Granting Refunds, Reductions or Exemptions from Taxes and Other Payments, *Request for Consultations by the United States*, WT/DS358/1 (7 February 2007).

³²¹ USTR Fact Sheet: *WTO Case Challenging Chinese Subsidies* (January 2007) at 3; http://www.ustr.gov/assets/Document_Library/Fact_Sheets/2007/asset_upload_file143_10465.pdf.

- Exemptions from mandatory worker benefit contributions available to companies that satisfy certain export performance requirements
- Income tax refunds available to companies that purchase Chinese-made equipment and accessories rather than imports
- VAT refunds available to companies that purchase Chinese-made equipment and accessories rather than imports³²²

Upon consultations with China, the U.S. learned that China had repealed one of the subsidy programs identified and that China had adopted a new income tax law. To take these events into account, the U.S. requested further consultations.³²³ After failing to reach a mutual resolution in consultations with China, the United States requested establishment of a dispute settlement panel on July 12, 2007 with respect to the subsidy programs identified.³²⁴ The request for a panel included twelve subsidy programs. They are the following:

³²² USTR Fact Sheet: *WTO Case Challenging Chinese Subsidies* (January 2007) at 1; http://www.ustr.gov/assets/Document_Library/Fact_Sheets/2007/asset_upload_file143_10465.pdf.

D. ANTIDUMPING REMEDIES AGAINST CHINA

A “non-market economy country” (NME) is defined by statute in Section 771(18) of the Tariff Act of 1930, as amended; 19 U.S.C. § 1677(18):

(A) In general.

The term ‘nonmarket economy country’ means any foreign country that the administering authority determines does not operate on market principles of cost or pricing structures, so that sales of merchandise in such country do not reflect the fair value of the merchandise.

(B) Factors to be considered.

In making determinations under subparagraph (A) the administering authority shall take into account –

- (i) the extent to which the currency of the foreign country is convertible into the currency of other countries;
- (ii) the extent to which wage rates in the foreign country are determined by free bargaining between labor and management,
- (iii) the extent to which joint ventures or other investments by firms of other foreign countries are permitted in the foreign country,
- (iv) the extent of government ownership or control of the means of production,
- (v) the extent of government control over the allocation of resources and over the price and output decisions of enterprises, and
- (vi) such other factors as the administering authority considers appropriate.

NME status means that, in antidumping duty investigations concerning imports from an NME country, the Department of Commerce uses a special NME methodology to calculate antidumping duty margins because Commerce considers NME-country exporters to be operating within a centrally planned economy in which the government controls pricing and production decisions. Therefore, except in cases where individual companies can demonstrate an absence of government control over their export activities, Commerce treats all exporters as a single enterprise for dumping purposes. Exporters who show an absence of government control, however, are eligible to receive a separate dumping margin specific to their imports.

1. NME Status of China in U.S. Antidumping Proceedings

For purposes of U.S. antidumping duty proceedings, the U.S. Department of Commerce has determined that China is a non-market economy (NME) country. Under the statute, any determination of NME country status “shall remain in effect until revoked by the administering authority” (*i.e.*, Commerce).³⁵⁷

³⁵⁷ See 19 U.S.C. § 1677(18)(C).

As part of its accession commitments in joining the WTO, China accepted that it could be treated as an NME by other Members. In the U.S.-China Bilateral Trade Agreement (signed November 15, 1999), the U.S. negotiated the right to apply the NME antidumping methodology to Chinese imports subject to antidumping investigations for 15 years after China's WTO accession. This right was subsequently included in China's Protocol of Accession.³⁵⁸ Thus, China agreed that WTO Members could use an NME antidumping methodology through December 11, 2016. The Protocol also provides, however, that if China can demonstrate that market conditions prevail in its economy as a whole or in a particular industry, and if a WTO Member's investigating authority accepts that demonstration and concludes that China is a market economy country, that Member must thereafter employ the normal rules in determining price comparability in antidumping duty cases involving China.³⁵⁹

³⁵⁸ See Protocol of Accession of the Peoples Republic of China, WT/L/432, Pt. I, art. 15 (23 November 2001).

³⁵⁹ *Id.* art. 15(d).

2. China's Efforts to Change its NME Status for Antidumping Purposes

China aspires to change its NME status under U.S. antidumping duty law.³⁶⁰ China's first formal request to change its NME status under U.S. antidumping law occurred in the antidumping duty investigation of Certain Lined Paper Products from the People's Republic of China (*Lined Paper*). Commerce initiated the *Lined Paper* antidumping investigation on September 29, 2005.³⁶¹ On December 22, 2005, Chinese respondents requested that Commerce reevaluate China's non-market economy status.³⁶² On February 2, 2006, China's Ministry of Fair Trade for Imports and Exports formally made a submission in support of the Chinese respondents' request.³⁶³ On May 15, 2006, in an effort to provide interested parties with timely insight into its fundamental analysis of China's economy, Commerce issued a memorandum explaining in brief its determination reaffirming China's NME status for purposes of U.S. antidumping law. The May 2006 memorandum focused primarily on deeply entrenched distortions in China's banking sector, and additionally noted "the limited extent to which market forces and institutional reform have taken root in critical sectors of China's economy despite recent reforms and substantial growth."³⁶⁴

³⁶⁰ For example, at the April 2004 JCCT meeting, the United States and China agreed to establish a working group on China's NME status and the steps necessary for China to become a market economy. See *The U.S.-China JCCT: Outcomes*, <http://www.mac.doc.gov/china/JCCT%20outcomes%20-%20Commerce.pdf>. At the July 2005 JCCT meeting, the United States and China agreed to step up their discussions regarding China's status as a non-market economy under U.S. antidumping law. See *The U.S.-China JCCT: Outcomes on Major U.S. Trade Concerns*, available at http://www.commerce.gov/opa/press/Secretary_Gutierrez/2005_Releases/July/11_JCCT_FactSheet.htm. See also *U.S. Sees Progress on Direct Sales in China, But Cannot See Draft Regs*, INSIDE US-CHINA TRADE, 7-8 (July 20, 2005) ("[T]he U.S. and China agreed to "intensify discussions on China's request for market economy status in the U.S., which most agree is a goal of China's because it would likely lead to reduced antidumping duties against Chinese imports . . . stepping up talks on this topic was a request of China, which wants to ensure the U.S. sees this as a serious process that clears up all pertinent questions before China makes a formal request to the U.S. for market economy status.").

On August 30, 2006, Commerce issued its final determination in *Lined Paper*,³⁶⁵ as well as a second NME-status memorandum explaining its determination that China remain an NME and providing an in-depth analysis of China's economy with respect to the six factors that must be considered under Section 771(18) of the Tariff Act of 1930 when determining non-market economy status.³⁶⁶ In summary, Commerce made the following findings with respect to the statutory factors:³⁶⁷

(1) With regard to factor one, the convertibility of China's currency:

Though China has taken steps to reduce its currency's insulation from market forces, China imposes considerable constraints on both the interbank foreign exchange market and on capital account transactions, thereby interfering with market signals' impact on the exchange rate.

At the first meeting of the Strategic Economic Dialogue (SED), China and the United States agreed to "invigorate ongoing work within the JCCT on ... market economy status/structural issues." See U.S. Treasury press release HP-205: *The First U.S.-China Strategic Economic Dialogue*, December 15-15, Beijing, Fact Sheet (December 15, 2006); available at <http://www.treasury.gov/press/releases/hp205.htm>.

Spooner, Assistant Secretary for Import Administration (August 30, 2006) at 8, available at <http://ia.ita.doc.gov/download/prc-nme-status/prc-lined-paper-memo-08302006.pdf>.

³⁶⁷ See *id.* at 2-3.

(2) With regard to factor two, the extent to which wage rates in China are determined by free bargaining between labor and management:

- Wages generally seem to be negotiated between employers and employees, and workers have certain rights with respect to compensation and choice of employment.
- In general, employers enjoy freedom in decision making regarding labor issues.
- However, various institutional and administrative restrictions (*e.g.*, lack of independent unions, ban on the right to strike, and labor mobility constraints) remain that hamper the effect of market forces on wage rate formation.

(3) With regard to factor three, the extent to which China permits joint ventures or other investments by foreign firms:

While permitting all forms of foreign investment in most sectors of the economy, China continues to manage foreign investment to a great extent (*e.g.*, China steers foreign direct investment toward favored export-oriented industries and particular regions, protects certain domestic companies from competition, and relies on industry-specific FDI rules and regulations).

(4) With regard to factor four, the extent of government ownership or control of the means of production:

China has made headway in privatizing SOEs and instituting limited market practices in state-owned firms. However, while ceding direct control over some parts of its economy, the Chinese government aims to maintain and enhance state control in other sectors, particularly those it deems “core” or “pillar” industries. In addition, property rights are poorly defined and inadequately enforced: private land ownership is still prohibited, and though individuals and firms may hold land-use rights, SOEs continue to hold a considerable quantity of land-use rights that they obtained either gratis or illegally.

(5) With regard to factor five, the extent of government control over the allocation of resources and over pricing and output decisions of enterprises:

Despite the attenuation of the state-owned sector in relative terms, evidence of some market-based resource allocation, the liberalization of most prices, the increasingly productive and profitable private sector, and the increase in bank lending to the private sector, all levels of China’s government continue to dictate resource allocation in the financial sector. Consequently, at the firm, industry and sector levels, the best use of investment funds is not fully realized, and the underperforming SOE sector continues to capture a disproportionate share of bank lending, fixed asset investment and other resources allocations.

(6) With regard to factor six, other factors that Commerce deems appropriate to the determination:

China is plagued by various institutional shortcomings regarding rule of law, property rights and bankruptcy.

Given Commerce's determination to reaffirm China's NME status in *Lined Paper*, that NME determination "shall remain in effect until revoked by the administering authority" (*i.e.*, Commerce).³⁶⁸

3. Regulatory Revisions to NME Methodology

a. NME Methodology

Normally, Commerce calculates antidumping duty margins based on the amount by which the "normal value" (*i.e.*, the price in the foreign market) exceeds the "export price" (*i.e.*, U.S. price) for the merchandise at issue. However, in antidumping duty cases concerning imports from an NME country such as China, Commerce does not base "normal value" on prices of the merchandise in the NME but rather uses a "factors of production" methodology for determining normal value.³⁶⁹

The "factors of production" typically are comprised of the labor hours, energy amounts, and quantities of raw materials needed to make the product.³⁷⁰ Commerce values these factors (except for labor) for the NME country based on costs from a "surrogate country." Commerce selects a "surrogate country" (or countries) at a level of economic development comparable to the NME country. For example, in numerous past cases, Commerce has used India as a surrogate country for China. For labor, Commerce publishes the rate that will be used.

³⁶⁸ See 19 U.S.C. § 1677(18)(C).

³⁶⁹ See 19 U.S.C. § 1677b(c) (nonmarket economy countries).

³⁷⁰ See 19 U.S.C. § 1677b(c)(4) (valuation of factors of production); *see also* 19 C.F.R. § 351.408.

Commerce often uses imports into the surrogate country to value raw materials and energy prices in the surrogate country to value energy. Commerce calculates the “normal value” by summing the products of the factors of production times their surrogate-country values and then adding to that sum an amount for factory overhead, selling, general, and administrative expenses (GS&A), and profit. The values for producers' factory overhead, GS&A and profit are taken from public sources in the surrogate country for producers of the same or similar types of products. There are a number of exceptions to the formula for calculating normal value that have developed over time and many domestic petitioners perceive that Commerce has developed a methodology that in many cases will result in a gross understatement of a realistic normal value.

Once the NME's normal value is calculated, it is compared to the export price, and if the export price is less than the normal value, then Commerce determines that the product has been sold for less than fair value (*i.e.*, dumped). For NME investigations, Commerce determines a “country-wide” dumping margin for imports from the NME country that have been manufactured by state-controlled enterprises (SOEs) and an individual company dumping margin for NME imports that have been manufactured by a particular company (provided that company has demonstrated that its export operations are not controlled by the government).

b. Modifications to NME Methodology

In 2005 and 2006, Commerce made several modifications to its NME methodology in antidumping proceedings, and is currently considering additional changes.

i. Separate Rates Practice

In determining dumping rates, Commerce starts with the presumption that all firms within an NME country are subject to government control and therefore that all should be assigned a single country-wide rate unless a respondent can show that its export activities are free of both *de facto* and *de jure* control by the NME government.³⁷¹ Where the respondent has made such a showing, Commerce in the past has assigned the respondent either an individually-calculated rate or, if the respondent is a non-investigated or non-reviewed firm, a weighted average of the rates of the investigated companies, minus any rates that were zero, *de minimis*, or based entirely on facts available.

In recent years, the number of separate rate requests by respondents in NME antidumping proceedings has increased greatly. As a result, Commerce faced an increased administrative burden in analyzing the factual bases for the requests. In response to the growing administrative burden and to address concerns that the separate rates test could be made more effective in determining whether a company is eligible for a separate rate, Commerce issued notices in May

³⁷¹ In the past, respondents fulfilled this requirement by completing a specific section of the NME questionnaire. Commerce then investigated certain respondents with regard to the absence of *de jure* control (assessing the existence of restrictive stipulations with regard to an individual exporter's business and export licenses, any legislative evidence of decentralization of companies, and other formal measures taken toward decentralization) and the absence of *de facto* control (assessing whether export prices are determined or are subject to approval by the government, whether the respondent has the authority to negotiate and sign contracts, whether the respondent has autonomy in making management selection decisions, whether the respondent retains the proceeds of its export sales and has autonomy in disposing of profits or financing of losses. *See Separate-Rates Practice in Antidumping Proceedings Involving Non-Market Economy Countries; Announcement of Change in Practice and Request for Comments*, 69 Fed. Reg. 77722, 77723 (December 28, 2004).

and September 2004 stating that it was considering changes to its separate rates practice and sought public comments.³⁷²

After considering the comments received, on December 28, 2004, Commerce provisionally decided to make a change in its separate rates by adopting an application process for evaluating separate rate requests by non-investigated firms.³⁷³ Under the new practice, non-investigated firms that request a separate rate will fill out an application instead of a Section A questionnaire (mandatory respondents, however, will continue to submit both the separate rate application and the completed questionnaire). Commerce stated that the change was made to streamline the separate rates analysis by focusing on issues most relevant to separate rate eligibility. Moreover, Commerce noted:

A primary goal of the separate rates application is to make it completely clear what documentation applicants must provide to demonstrate their eligibility for a separate rate, so as to avoid the need for the Department to issue supplemental questionnaires and avoid unnecessary rejections of applicants.³⁷⁴

Commerce finalized its new separate rates practice on April 5, 2005.³⁷⁵

³⁷⁴ See *Separate-Rates Practice in Antidumping Proceedings Involving Non-Market Economy Countries; Announcement of Change in Practice and Request for Comments*, 69 Fed. Reg. at 77724.

³⁷⁵ See *Separate Rates and Combination Rates in Antidumping Investigations Involving Non-Market Economy Countries – Announcement of A Change in Practice*, 70 Fed. Reg. 17233 (April 5, 2005); see also Import Administration, International Trade Administration, IA Policy Bulletin No. 05.1: *Separate-Rates Practice and Application of Combination Rates in Antidumping Investigations Involving Non-Market Economies* (April 5, 2005), available at <http://ia.ita.doc.gov/policy/bull05-1.pdf>.

At the same time as the change in separate rates practice, Commerce adopted a practice of applying combination rates to NME exporters eligible for separate rates that are specific to those producers that supplied the exporter during the period of investigation (this practice does not apply to reviews).³⁷⁶ Merchandise from NME exporters that was supplied by producers that did not supply the exporter during the period of investigation remain subject to the country-wide rate.

This change of practice addresses to a limited extent the problems that arise from confining scrutiny of state control to exporters, since only goods supplied by those producers that supplied the exporter during the period of investigation may be assigned the separate combination rate. Commerce stressed that it will continue to apply its separate rate analysis solely to exporters:

The Department's separate rates analysis and test is *not* being extended to producers. Firms that produce the subject merchandise are not required to demonstrate their eligibility for separate rate status unless they also export the merchandise to the United States. The Department's separate rates test, which focuses exclusively on the respondent's *export* activities, is not being altered by the extension of combination rates to all NME exporters receiving a separate rate.³⁷⁷

Subsequently, Commerce again requested comments regarding its separate rates practice. On March 21, 2007, Commerce issued a notice stating that despite the introduction of an application process for separate rates, the administrative burden of evaluating separate rate

³⁷⁶ *See id.*

³⁷⁷ Import Administration, International Trade Administration, IA Policy Bulletin No. 05.1: *Separate-Rates Practice and Application of Combination Rates in Antidumping Investigations Involving Non-Market Economies* at 6 (April 5, 2005), available at <http://ia.ita.doc.gov/policy/bull05-1.pdf>.

requests increased. Commerce asked for public comments “on the separate rates test as a whole and how its implementation could be further improved.”³⁷⁸

ii. Market Economy Inputs

On October 19, 2006, Commerce published revisions to its methodologies for determining what share or volume of a given input sourced from market economy suppliers qualifies as “meaningful” in order for the import price to be used to value all of the input in cases where an NME producer sources an input from both market economy suppliers and from within the NME.³⁷⁹

Previously, in cases where an NME producer purchased a portion of an input from a market economy supplier, Commerce used the price paid for the input from the market economy supplier to value all of the inputs where the market economy input represented a meaningful share of the total purchases from all sources. The term “meaningful” was not clearly defined, forcing Commerce to decide what constitutes a meaningful, or significant, input on a case-by-case basis and creating unpredictability in the calculation of normal value in dumping investigations. The October 2006 change in methodology resolved this issue by addressing the unpredictability of the normal value calculation, and providing for rebuttal of the presumption of

³⁷⁸ See *Antidumping Methodologies in Proceedings Involving Non-Market Economy Countries: Surrogate Country Selection and Separate Rates*, 72 Fed. Reg. 13246, 13248 (March 21, 2007).

³⁷⁹ See *Antidumping Methodologies: Market Economy Inputs, Expected Non-Market Economy Wages, Duty Drawback; and Request for Comments*, 71 Fed. Reg. 61716 (October 19, 2006). See also *Final Rule*, 62 Fed. Reg. 27296, 27366 (May 19, 1997) (“[W]e would not rely on the price paid by an NME producer to a market economy supplier if the quantity of the input purchased was insignificant the amounts purchased from the market economy supplier must be meaningful”)

validity of the market prices on a case-specific basis. Commerce stated its new policy as follows:

The Department is now instituting a rebuttable presumption that market economy input prices are the best available information for valuing an entire input when the total volume of the input purchased from all market economy sources during the period of investigation or review exceeds 33 percent of the total volume of the input purchased from all sources during the period. In these cases, unless case-specific facts provide adequate grounds to rebut the Department's presumption, the Department will use the weighted-average market economy purchase price to value the entire input. Alternatively, when the volume of an NME firm's purchases from market economy suppliers as a percentage of its total volume of purchases during the period of review is below 33 percent, but where these purchases are otherwise valid and meet the Department's existing conditions ..., the Department will weight-average the weighted-average market economy purchase price with an appropriate surrogate value according to their respective shares of the total volume of purchases, unless case-specific facts provide adequate grounds to rebut the presumption. In determining whether market economy purchases meet this 33 percent threshold, the Department will compare the volume that the producer purchased from market economy sources during the period of investigation or review with the respondent's total purchases during the period. When a firm has made market economy input purchases that may have been dumped or subsidized, are not *bona fide*, or are otherwise not acceptable for use in a dumping calculation, the Department will exclude them from the numerator of the ratio to ensure a fair determination of whether valid market economy purchases meet the 33 percent threshold. ... Moreover, because this 33 percent threshold constitutes a rebuttable presumption, parties will have an opportunity to demonstrate that case-specific facts outweigh the presumption.³⁸⁰

³⁸⁰ See *Antidumping Methodologies: Market Economy Inputs, Expected Non-Market Economy Wages, Duty Drawback; and Request for Comments*, 71 Fed. Reg. at 61717-61718.

iii. Surrogate Country Selection

Commerce is currently considering changes to aspects of its methodology by which it selects an economically-comparable market economy country to serve as a surrogate for the NME country under investigation or review.

Commerce's current practice in antidumping proceedings involving NME countries is to calculate normal value by valuing the NME producer's factors of production, to the extent possible, using prices from a market economy that is at a comparable level of economic development and that is also a significant producer of comparable merchandise. The statute provides broad discretion to Commerce in the selection of surrogate market economy countries to value NME factors of production.³⁸¹ The statute also directs Commerce to base the selection of an appropriate surrogate country, to the extent possible, on its having "a level of economic development comparable to that of the nonmarket economy country."³⁸² The statute does not define "comparable level of economic development," but Commerce's regulations direct it to "place primary emphasis on per capita GDP as the measure of economic comparability."³⁸³ Moreover, in the Import Administration Policy Bulletin 04.1, Commerce established a sequential procedure for selecting a surrogate country, with economic comparability being the first factor considered.

On March 21, 2007, Commerce requested public comments on the following questions: "(1) how, given the requirement to base the determination on per capita income, the Department

³⁸¹ 19 U.S.C. § 1677b(c)(4).

³⁸² 19 U.S.C. § 1677b(c)(4) (A).

³⁸³ 19 C.F.R. § 351.408(b).

should determine which countries are economically comparable to a given NME country, and (2) whether and on what basis the Department should disregard certain economically comparable countries as lacking data suitable for valuing the factors of production.”³⁸⁴ In sum, Commerce noted that it was “interested in public comment on whether and how the Department can limit its initial analysis of countries that are economically comparable to a sub-group of countries more likely to have the data necessary to conduct an antidumping duty proceeding.”³⁸⁵

After considering the comments received, Commerce issued another notice on July 25, 2007, in which it sought a second round of public comments on the economic comparability aspect of the surrogate country selection process.³⁸⁶ In the July 2007 notice, Commerce stated that it sought additional comments on the following issues:

- (1) “[T]he Department would like to receive comments focusing on the statutory concept of ‘economically comparable.’ The Department is required by its statute and regulations to consider economic comparability in its selection of a surrogate country and to base ‘comparability’ on per capita income, but ... the term is not defined specifically. Therefore, the Department is particularly interested in comments and suggestions on specific guidelines the Department should follow in determining the economic comparability of countries in a given case.”³⁸⁷
- (2) “Under the Department’s established sequential process for selecting a surrogate country ..., the Department first determines a list of countries that are economically comparable and then analyzes each of these countries for production of comparable merchandise, whether there is significant production, and availability of data. The

³⁸⁵ *See Surrogate Country Selection in Proceedings Involving Non-Market Economy Countries; Request for Comment*, 72 Fed. Reg. 40842 (July 25, 2007).

³⁸⁶ *See Surrogate Country Selection in Proceedings Involving Non-Market Economy Countries; Request for Comment*, 72 Fed. Reg. 40842 (July 25, 2007).

³⁸⁷ *See id* at 40842.

Department invites comments on this process. In particular, it welcomes suggestions on how it should construct the initial list of economically comparable countries, how this set of countries should be balanced, and how many countries it should contain.³⁸⁸

- (3) “[T]he Department is also interested in inviting comment on whether certain comparable countries should be excluded, at least initially, from the Department’s analysis of which country is the best possible surrogate in a given proceeding on the basis of a general lack of country specific data. With regard to this issue, if the Department were able to determine that a group of countries does not generally offer the data necessary to conduct an antidumping proceeding, both the Department and parties would be relieved of the burden of examining those countries as potential surrogates in every proceeding. Please note, however, that parties would retain the ability to advocate the consideration of a country that would otherwise not be considered if they determined that there were case-specific arguments for doing so.”³⁸⁹
- (4) “Finally, the Department requests comment on how it should evaluate and weigh the production experiences and data availability of countries in cases where there may be more than one potential surrogate country with reliable data and significant production of comparable merchandise.”³⁹⁰

iv. Labor Valuation (Wages)

In 2006, Commerce made changes to its methodology for calculating expected NME wages in antidumping proceedings.

Commerce’s regulations generally describe the methodology used to calculate expected NME wages:

For labor, the Secretary will use regression-based wage rates reflective of the observed relationship between wages and national income in market economy countries. The Secretary will calculate

³⁸⁸ See *id* at 40842-43.

³⁸⁹ See *id* at 40843.

³⁹⁰ See *id* at 40843.

the wage rate to be applied in nonmarket economy proceedings each year. The calculation will be based on current data, and will be made available to the public.³⁹¹

Pursuant to the regulation, Commerce annually calculates expected NME wages in two steps: (1) through regression analysis, Commerce estimates a linear relationship between per-capita gross national income (“GNI”) and hourly wages in market economy (“ME”) countries; and (2) based on the regression and GNI data, Commerce estimates hourly wage rates for NME countries.³⁹² Commerce’s regression analysis relied upon four data series: “(A) country-specific wage data for 56 countries from Chapter 5B of the International Labour Organization’s (“ILO”) Yearbook of Labour Statistics; (B) country-specific consumer price index (“CPI”) data from the International Financial Statistics of the International Monetary Fund (“IMF”); (C) exchange rate data from the IMF’s International Financial Statistics; and (D) country-specific GNI data from the World Development Indicators of the World Bank (“WB”).”³⁹³

On June 30, 2005, Commerce issued a notice requesting public comment on its methodology for calculating expected NME wages.³⁹⁴ On October 19, 2006, following consideration of the public comments submitted, Commerce decided to revise its expected NME wage rates methodology in the following ways:

1. The Department will only use earnings data reported in Chapter 5b of the ILO statistics.

³⁹¹ See 19 CFR § 351.408(c)(3).

³⁹² See *Expected Non-Market Economy Wages: Request for Comment on Calculation Methodology*, 70 Fed. Reg. 37761, 37762 (June 30, 2005).

³⁹³ See *id.* at 37762.

³⁹⁴ See *Expected Non-Market Economy Wages: Request for Comment on Calculation Methodology*, 70 Fed. Reg. 37761 (June 30, 2005).

2. The basket of countries upon which the wage regression is based will include data from all market economy countries that meet the criteria described below and that have been reported within 1 year prior to the Base Year.
3. Each year, the Department's annual calculation of expected NME wage rates will be subject to public notice prior to the adoption of the resulting expected NME wage rates for use in antidumping proceedings. Comment will be requested only with regard to potential clerical errors in the Department's calculation in light of its stated revised methodology.³⁹⁵

With respect to Revision 1, Commerce's prior practice was to rely upon the data set contained in "Chapter 5b: Wages in Manufacturing" of ILO's Yearbook of Labour Statistics, which covers wages and bonuses, *i.e.*, pre-tax monetary remuneration received by the employee. Commerce, however, noted that the ILO also defines "earnings" under Chapter 5 of its Yearbook of Labour Statistics as being inclusive of "wages," and as including both bonuses and gratuities. Therefore, Commerce decided that, in order to ensure that its calculation of expected NME wage rates accurately reflects the remuneration received by workers, it should rely on "earnings," not "wages."³⁹⁶

With respect to Revision 2, Commerce's prior practice was to use Chapter 5 ILO data reported within five years of the Base Year,³⁹⁷ thereby considering a total of six years of data. Commerce decided, however, that due to inflation, six-year old wage data may not represent wage dynamics accurately. Thus, Commerce decided that it will only rely on ILO wage data that

³⁹⁵ See *Antidumping Methodologies: Market Economy Inputs, Expected Non-Market Economy Wages, Duty Drawback; and Request for Comments*, 71 Fed. Reg. 61716, 61721-22 (October 19, 2006).

³⁹⁶ See *Antidumping Methodologies: Market Economy Inputs, Expected Non-Market Economy Wages, Duty Drawback; and Request for Comments*, 71 Fed. Reg. at 61721.

³⁹⁷ The "Base Year" is the year upon which the regression data are based and is two years prior to the year in which the Department conducts its regression analysis. See *id.*

have been reported within one year prior to the Base Year, thereby considering a total of two years of data.³⁹⁸

Commerce's methodology for calculating expected NME wage rates has been challenged at the U.S. Court of International Trade (CIT). In *Dorbest Ltd. v. United States*, 462 F.Supp.2d 1262 (CIT, October 31, 2006) (CIT Ct. No. 05-00003), Judge Pogue found that Commerce's regression model appeared to produce distorted results that Commerce did not reasonably explain, and therefore the Court could not conclude that Commerce's selected calculation of its regression model was reasonable.³⁹⁹ Accordingly, the Court remanded the case to Commerce to explain its choice of data set for its wage rate calculation and to address any apparent statistical anomalies.⁴⁰⁰ Commerce filed its remand results with the CIT on July 25, 2007. The Court has not, as yet, issued a decision on Commerce's remand results.
